

# See your way ahead with the Fujitsu Business Process Intelligence (BPI) Journey

Transform your business so that nothing will hold you back

## Fujitsu BPI - modernizing business processes with intelligence

Bring your organizational processes and IT together with data-driven insight to achieve true business transformation and operational excellence. The Fujitsu Business Process Intelligence (BPI) data-driven approach understands your end-to-end processes, enabling a sustainable and intelligent enterprise.

Utilize the Fujitsu BPI services and enhance your digital transformation plans. Work with us to realize value at every stage of your journey and deliver better outcomes across your organization.

## The Fujitsu BPI Journey Framework

The Fujitsu BPI Journey Framework, powered by SAP Signavio, provides a comprehensive suite of solutions and capabilities that includes process insights, process mining, business process management, customer journey, process governance and automation.

Taking a technology-agnostic approach, we focus on delivering tangible business outcomes rather than just solution features, allowing us to transform business processes for any organization — irrespective of its size or industry.

Offered as a value-added service, our BPI Journey Framework sets us apart as a capable business transformation delivery partner and thought leader for SAP and non-SAP customers.

### Start your journey now with a process insight workshop

A discovery workshop leveraging the power of SAP Signavio to deliver a data-driven Value Heat Map in just a few days.

### Take a deep dive with process mining POC

A rapid deployment engagement using the power of SAP Signavio to perform deep-dive analysis and deliver data-driven insights for continuous improvement.

# Adapting to evolving business

Today's enterprises operate in a complex business landscape, with pressures around:

## Global uncertainty

Against a backdrop of supply chain issues, volatile energy costs, geopolitical tensions, and increasingly sophisticated cyber threats, enterprises are seeking to adapt their business processes. Through process transformation, we help you to enhance security, maintain compliance, and be flexible to adapt quickly to the next global crisis, all while maintaining a sustainable growth trajectory.

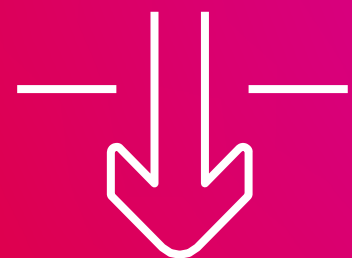

## Sustainability

In every sector, it's recognized that we must adjust business in a way that makes a positive impact on our environment, society, and economy. As a result of gaining a comprehensive understanding of key processes at different levels, you'll be able to make better-informed decisions, and develop more effective strategies around sustainability issues in the future.

## Cost optimization

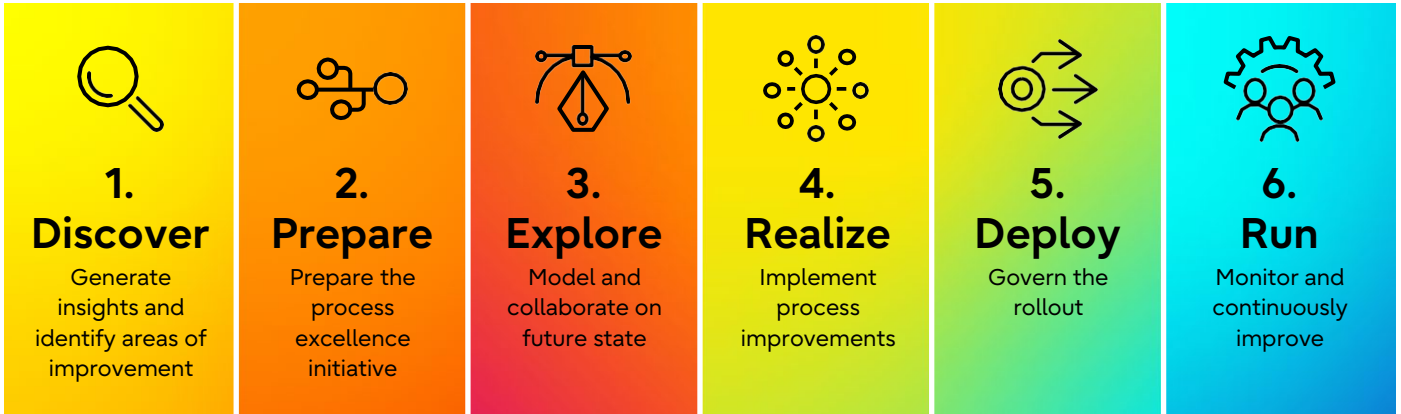

Organizations are under pressure to lower costs and increase process efficiency, all while delivering more value to customers. To achieve this, it's crucial that businesses and their IT no longer operate in isolation. Instead, you need to understand how to streamline your existing business processes by integrating them more closely with your IT operations. And when you have this, you can meet the high expectations of your customers, vendors, and employees for less of the cost.

# Supporting your SAP S/4HANA transformation with Business Process Intelligence (BPI)

Leveraging BPI, Fujitsu will support you to adopt, refine, and manage your critical business processes, regardless of where you are in your S/4HANA transformation journey.

To deliver value, we combine the Fujitsu methodology for value realization with a BPI workstream powered by the **SAP Signavio Process Transformation Suite**. Aligned with SAP's Activate methodology, together we:

As a customer-centric, results-driven organization, we work closely with our customers to map existing processes, identify potential challenges during transition, and align strategies according to unique business requirements, targets, and desired outcomes.

## The Fujitsu SAP offerings with Business Process Intelligence

Business Process Intelligence is integrated with various Fujitsu global SAP offerings, including:

### Fujitsu S/4HANA Value Assessment

Reliant on SAP Signavio, our S/4HANA Value Assessment helps you see the way ahead from a desired business outcome standpoint.

### Fujitsu S/4HANA Transformation Services

In combination with SAP Signavio, our team guides you through the migration, adoption, and day-to-day operations of S/4HANA, helping you to transform and manage your critical business processes.

### Fujitsu iAMS

The Fujitsu intelligent Application Managed Services (iAMS) helps you modernize your application landscape, executed through Fujitsu Global Delivery Centers along with Regional Centers.

### Fujitsu industry solutions

Combining our industry solutions and technical capabilities with SAP Signavio, we connect information across your business at every level. Delivering visibility and insight like you've never experienced before. Working with us means you'll gain greater control to improve areas such as profit protection, energy efficiency, waste reduction, circular economy, and overall sustainability.

## Why Fujitsu?

For over 40 years, Fujitsu has been working with SAP to deliver sustainable solutions across a range of industries.

As both a strategic partner and SAP Signavio customer, we actively participate in co-development initiatives that drive process innovation and enhance the SAP Signavio Process Transformation Suite. The Digital KAIZEN, Talent Acquisition Journey, and the Master Data Lifecycle Management are just some of our SAP-Signavio-powered solutions.

Additionally, we continue to embrace key initiatives launched by SAP Signavio, such as OPAL (One Process Accelerator Layer), Process Explorer, the Seeding Partner Program, and Plug-and-Gain among others.

Drawing on our highly skilled consultants and extensive partner ecosystem, we'll help you to leverage the power of SAP Signavio to transform your critical processes – unlocking tangible business value and co-creating solutions that enable you to innovate and thrive.

Ultimately, you can rely on us to help you see the big picture, from productivity to business outcomes, and sustainability.
