

# FY2020 R&D Strategy Briefing

October 13, 2020

FUJITSU

shaping tomorrow with you

# Fujitsu's R&D Strategy

Hidenori Furuta

COO & CTO

Head of Global Solutions Business

Head of International Regions

Responsible for Japan Region

Chairman of Fujitsu Laboratories

Our purpose is to make the world more sustainable  
by building trust in society through innovation

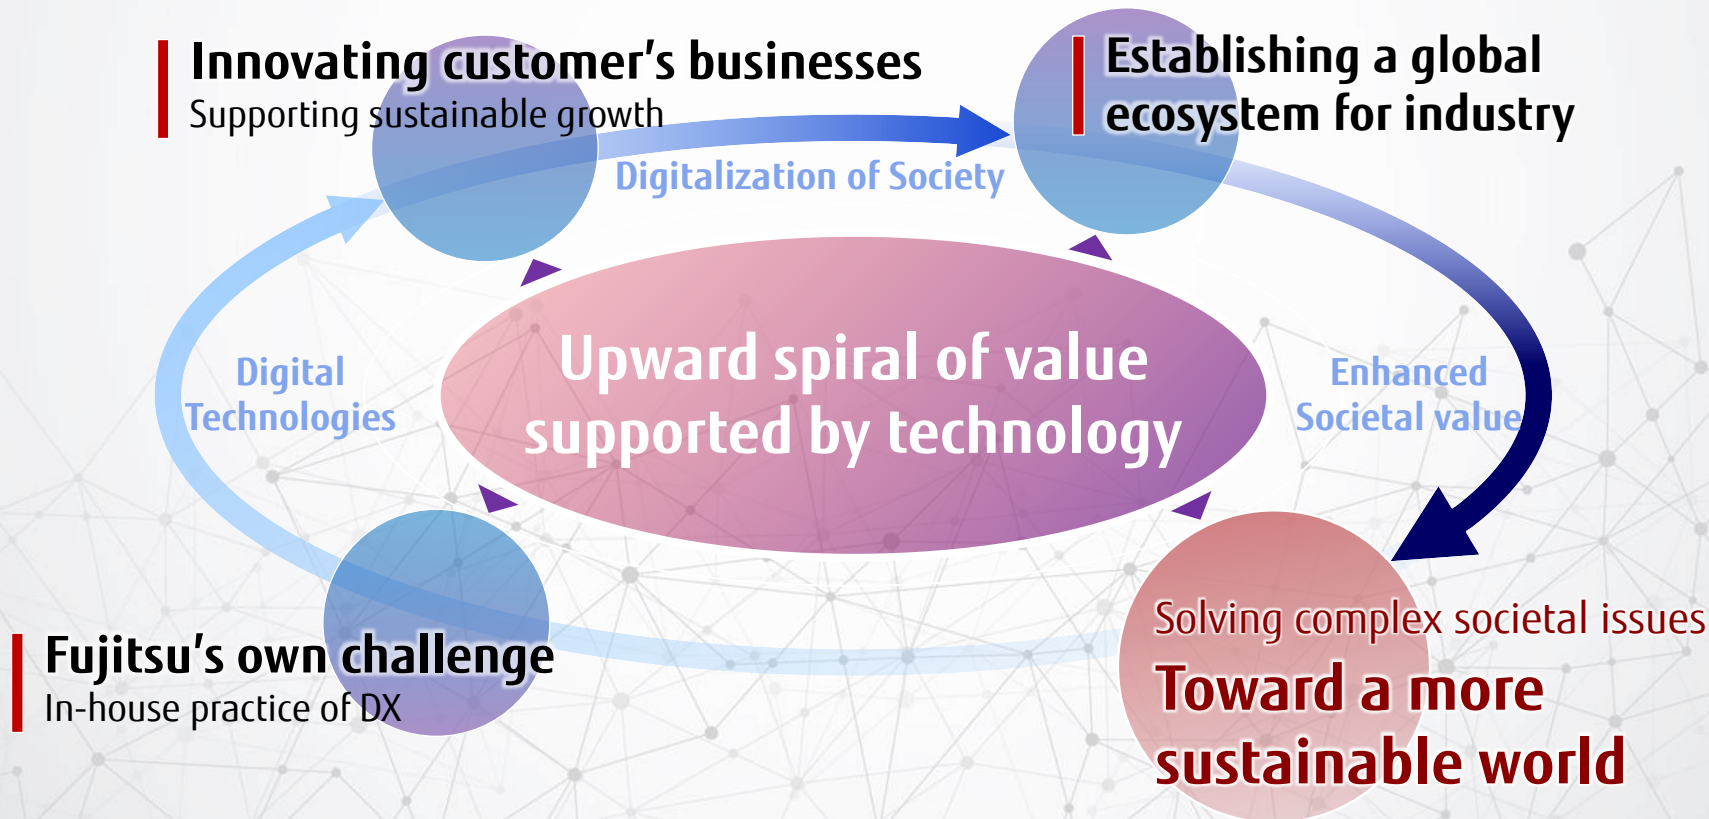

Our Purpose indicates why Fujitsu exists in society.

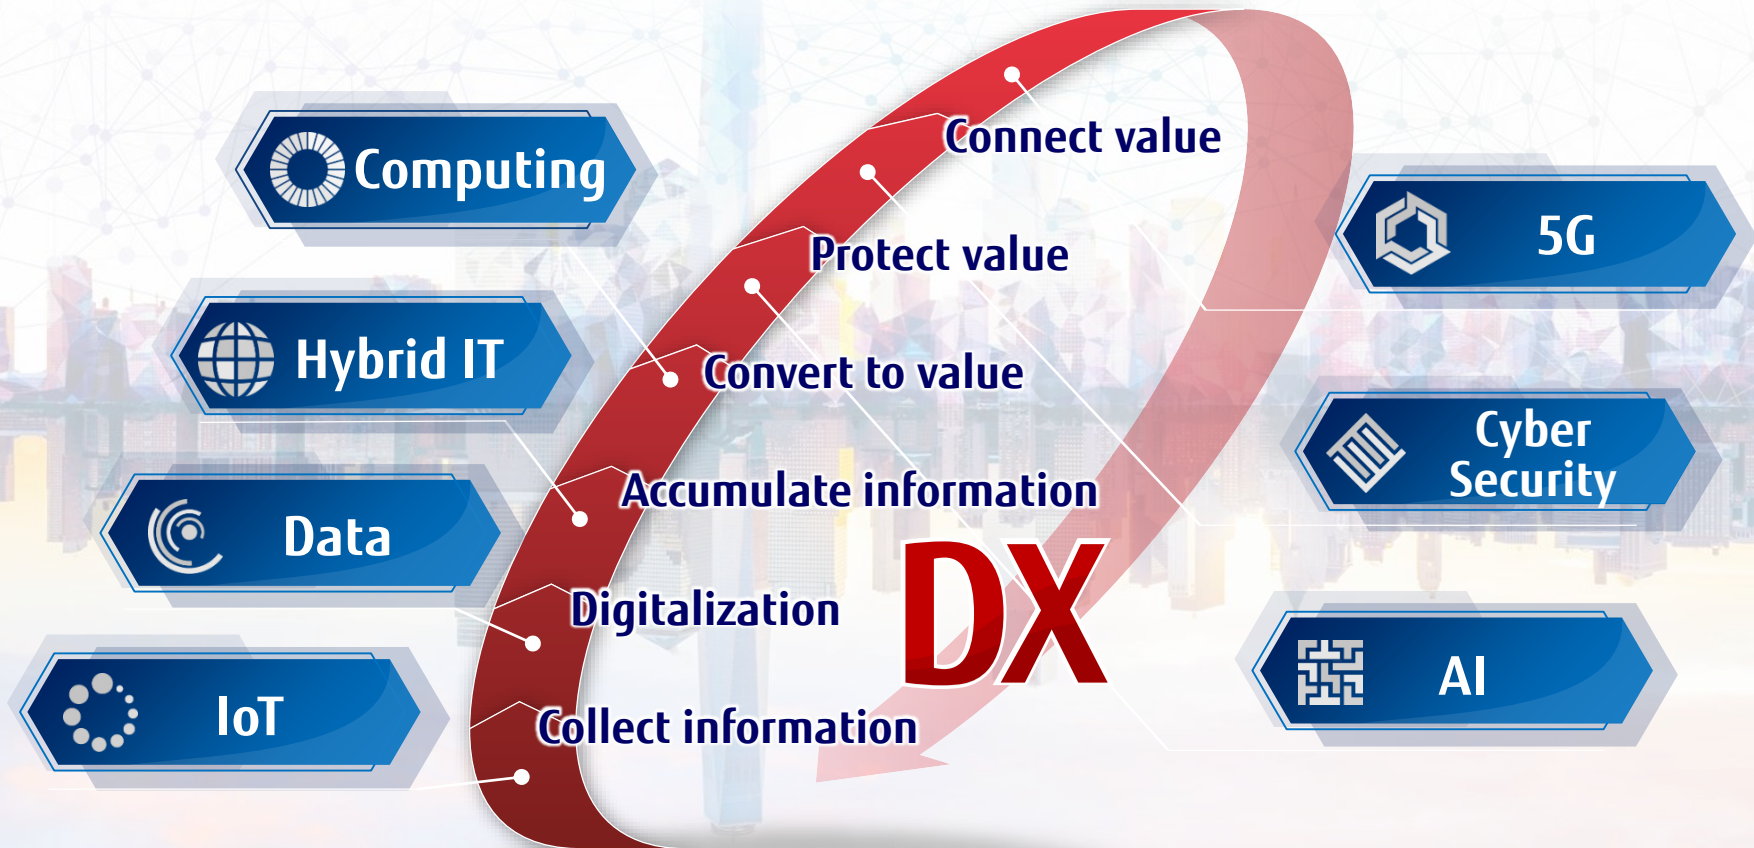

# FUJITSU Way

# Technology to Create a Better Society

# Focusing on 7 Key Technologies

# Computing

Providing the increasingly complex and vast enormous computing capabilities needed to solve a range of societal challenges

Compared with the stagnation of Moore's Law (refinement), the improvement in AI compute is enormous\*

**300,000 x** Increase in 5 years

## Innovation in Computing Technology ▶▶▶

**4 world records**

### Fugaku

Ranked No. 1 in the world for supercomputer performance

### Digital Annealer

Joint research in mid-molecular drug discovery (PeptiDream Inc.)

### Quantum Computing

Superconducting approach (RIKEN and University of Tokyo)

Optical approach (Delft University of Technology)

Quantum algorithms Error correction (Osaka University)

Press release on Oct 13

## Software Acceleration Technology ▶▶▶

### Content Aware Computing

Automated control of AI calculation accuracy

Software technology that maximizes computer performance

# AI

Innovative solutions to societal challenges using trustworthy analysis based on ethics and transparency

## Accountability of AI

Percentage of people who would trust AI if it showed substantial reasons for reaching its decisions

63%

Source: Fujitsu Technology and Service Vision 2019

FUJITSU

### Explainable AI

Deep Tensor

+

Knowledge Graph

Explains the reasoning behind AI's decisions

Reduced decision-making time for genomic medicine

### High Durability Learning

Degradation monitoring and automatic repair of AI accuracy

Automatic repair reduces AI degradation over time

POC at a factory of a major beverage manufacturer

### Deep Twin

(Dimensional reduction and compression)

Represents essential data structure by reducing data dimensions without compromising the distribution and probability of the information

Detecting thyroid abnormalities (academic benchmark)

# 5G

Providing new value to everyone by connecting people with data and things in our complex and rapidly changing society

## Global market forecast for Private 5G

Source: Japan Electronics and Information Technology Industries Association (JEITA) summary of 2019 report on trends in sectors to watch

## 5G (Enterprise & Telcos) ●●●

### Accelerate DX in vertically integrated organizations

- Establishment of 5G Vertical Service Office to consolidate Fujitsu's technological capabilities and knowledge
- Private 5G Partnership Program
- FUJITSU Collaboration Laboratory

### Cloud Wireless Service

- Achieve seamless optimization from edge to cloud
- Managed service for license bands
- Covering everything from planning to operation
- Flexible software base stations

### Beyond 5G 6G

- Support for larger capacity, multiple connections, and low latency
- Advanced information communication closer to human sensing
- Achieve advanced cyber-physical fusion

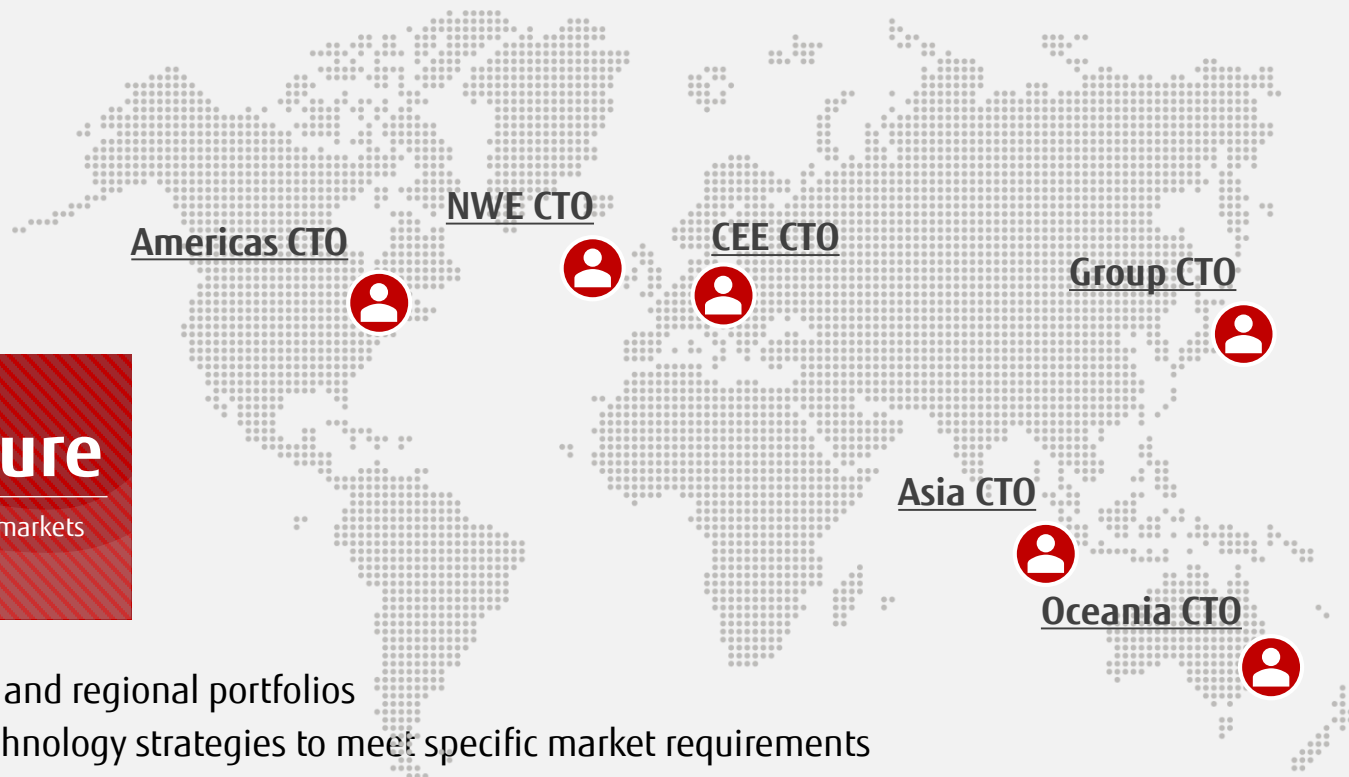

### Opening of 5G base stations / Global specifications

- Globally deployable O-RAN compliant
- Deployment results in domestic fields
- Under development in DISH Network

# Globally Unified Technology Strategy

## New CTO Structure

A stronger technology strategy for global markets

- ▶ Creating a global portfolio and regional portfolios
- ▶ Implementing regional technology strategies to meet specific market requirements

# Supporting Customer Transformation on a Global Scale

NWE

CEE

Oceania

Asia

Japan

Americas

Provide Solutions Optimized for Each Region

Global portfolios, account plans, and offerings

Manufacturing

Mobility

Finance

Retail

Core technologies that support customer values

# Supporting Powerful Global Solutions

## FUJITSU Work Life Shift

Smart Working  
Borderless Office  
Culture Change

technology

### Remote working technologies

- FUJITSU Collaboration Space
- Remote Virtual Environment Computing

### Global strategic partners

- Microsoft
- Citrix
- VMware
- ServiceNow

## Mobility

Automobile insurance

Eco driving

Connected car security

technology

Digital Twin Analyzer

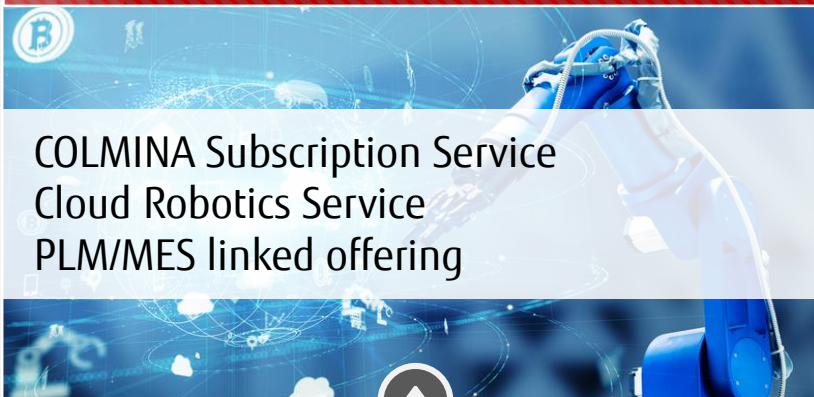

Digital Annealer

V-SOC Upstream

# Supporting Powerful Global Solutions

## *Monozukuri* - Manufacturing

COLMINA Subscription Service  
Cloud Robotics Service  
PLM/MES linked offering

technology

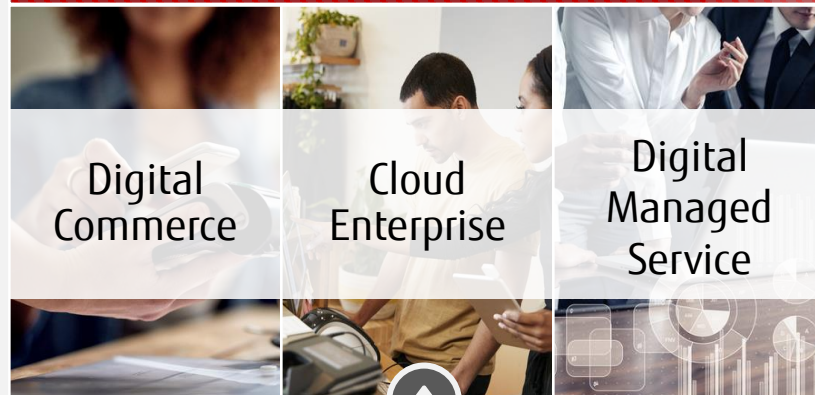

Subscription-based services technology

AI + Cloud Robotics factory automation technology

## Retail - Digital Commerce -

Digital Commerce

Cloud Enterprise

Digital Managed Service

technology

Face + Palm vein hybrid authentication technology

AI image recognition

# Promoting the practical application of technology **FUJITSU**

**Connect services across industries  
to create new value**

**Cross-Industry**  
(collaboration across sectors)

Social Design Business Unit

**Fujitsu  
Laboratories**

**Purpose**  
(societal issues)

Software Technology Business Unit

**Technologies**  
(fundamental and applied)

**Investigate the commercialization  
of technologies**

# Accelerating Growth in DX Business

No.1 Accuracy

## Behavioral Analysis Technology

Recognizes 100 basic actions

Crime prevention

Consumer behavior

Task monitoring

Driving

## Digital Annealer + Digital Laboratory Platform

## Drug discovery and research

Joint research with PeptiDream Inc.

# Working to Overcome COVID-19

## Predicting and controlling viral droplet infections

- Particles caught by mask
- Particles escaped from mask
- Particles that penetrated mask

## Identify candidate drugs

Over 2000 potential pharmaceutical drugs  
1~2 years → 10 days

Target protein of COVID-19

## Diagnostic support for COVID-19 pneumonia

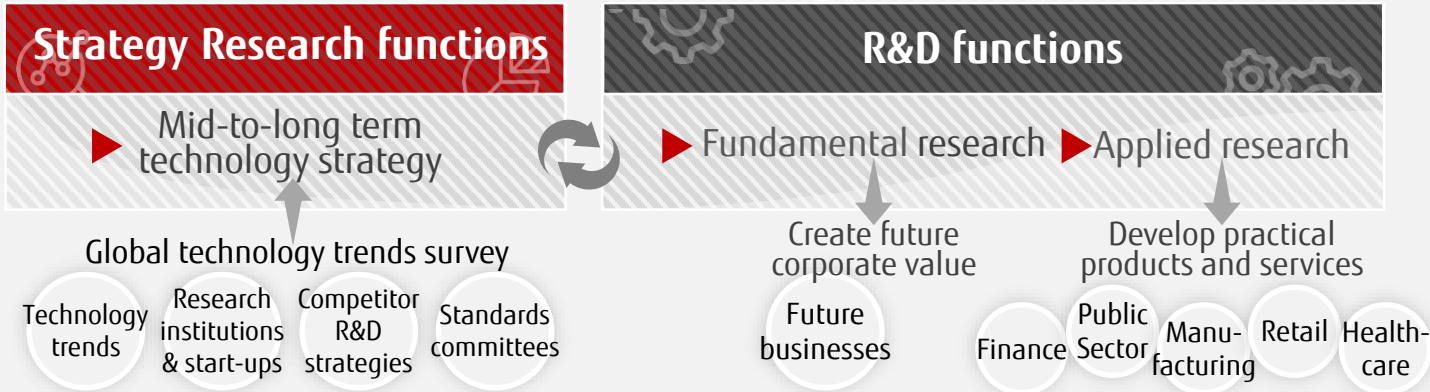

# R&D Approach for the Future

## 'Selection & Focus' in R&D for transformation into a DX company

- ▶ Shift to a technology development model that enables the rapid creation of products and services through open technology development

## Strengthen Strategy Research functions to realize strategic R & D through open technology development

## R&D to create future paradigm shifts and innovation

- ▶ Continue the R&D of cutting-edge technologies to achieve a sustainable society, while at the same time promoting technology development to address the social risks posed by innovative technologies

## Computing

Fugaku, Digital Annealer, Quantum Computing, Content-Aware Computing

## Hybrid IT

Auto Bug Detection/Fix, Hybrid Ops/AI Ops, CI/CD, Auto-Adjust Container Parameters

## Data

Digital ID Tech., Connection Chain, Chain Data Lineage

## IoT

Dracena, Real-time Digital Twin, MEC/Hyperconverged Edge, Human Sensing

## 5G

Private 5G, Software Base Station, Millimeter-Wave Radio, Optical Transmission, Next-Generation 6G

## Cyber Security

Multimodal Biometric Authentication, AI for Security, Security for AI, Security by Design, Privacy Protection

## AI

Behavioral Analysis Tech., Explainable AI, Trusted AI, AI×HPC, Topological Data Analysis, High-Durability Learning

shaping tomorrow with you
