Our Hybrid IT Managed Services for:

Oracle Cloud

FUJITSU

Consumption-based Managed Services that flex up and down as your needs change. And you only pay for what you use, when you use it.

Support for the complete Oracle Cloud portfolio, including:

Compute:
- Virtual machines
- Windows/Linux VM
- Container Cloud Service

Networking:
- Virtual cloud network
- Load balancing
- DNS
- VPN
- FastConnect

Storage:
- Block volumes
- Object storage

Databases:
- Oracle Database Cloud Service
- SQL server on VM
- Oracle on VM
- MYSQL
- DB2
- Mongo DB
- PostgreSQL

Complete management

Our Hybrid IT Managed Services for Oracle Cloud gives you freedom with costs. It scales up and down as your usage of the service changes. So, we:

- manage configuration changes, and implement new features and solutions within the estate.
- monitor usage across the Oracle Cloud estate to identify threshold limits and proactively identify faults.
- support your business and solve workload issues related to Oracle Cloud – before they impact your operations.
- report on your Oracle Cloud estate, including billing, change, incident and monitoring reports.

Complete confidence

We have wealth of experience in managed services, along with a deep partnership with Oracle, so you can have complete confidence in the security and reliability of your cloud estate. With our services, you can:

- comply with regulatory requirements, with three different locations that offer global and in-country delivery.
- implement our expert security policies within your Oracle Cloud estate, giving you confidence that it's secure, compliant and resilient.
- learn and receive help from over 3,500 Oracle-accredited staff in over 20 countries.

Fit for the future

We're focused on making sure your hybrid estate continues to deliver for you now, and in the future. How? Through:

- agile service development, offering support for new features as you require them.
- support for our own K5 cloud platform, as well as multiple platforms from other major providers
- further offerings to orchestrate within and between your different platforms, and provide further insight and visibility to continuously evolve your estate.

On your terms

Our Hybrid IT Managed Services have been designed to be as flexible as Oracle Cloud itself. You get:

- daily charging for each day an individual component is used.
- no minimum or maximum number of components to be managed.
- SLAs designed around your specific needs.
