

Windows 10

FUJITSU

## Fujitsu's Windows 10 *express*

Employees now expect more choices in—and control over—how they manage their work life activities.

### Get the most from Windows 10 with Fujitsu's Windows 10 *express*

#### A fully tailored approach to help you benefit from Windows 10

- Rapid and effective Windows 10 adoption
- Native integration with Microsoft's Online Cloud Services
- Fujitsu centrally manages user access rights through the Microsoft Enterprise Mobility and Security Suite
- Enrolled Windows 10 devices will automatically be updated with the latest version of the operating system after validation by Fujitsu
- In-built security that includes improved authentication methods like biometrics
- Self initiated application management
- Reduce IT administration, security and upgrade costs

This is making CIOs and ICT leaders look outwards to enabling technology, like Windows 10, to meet changing market demands. For many, Windows 10 presents a platform for digital transformation, making the workplace of the future a reality. Windows 10 offers a major advance for forward-looking businesses who want to improve employee satisfaction and drive efficiency. It enables new levels of workplace mobility and is the first 'evergreen' Windows Operating System. Through automatic regular updates you can avoid major upgrades. At the same time as freeing up internal resources, you retain control and full visibility through centralised management and secure delivery.

#### Understanding the benefits of a new operating system is one thing, realising them is another

Deploying and upgrading an OS involves significant cost and resources and involves every part of the business. You need to manage application and platform lifecycles, growing types of devices, mobile IT and evolving security threats. With Windows 10 the rate of change is higher and you need to ensure that you can keep up with the pace. You also need to measure the benefits it delivers, both for technical and end users. Making the business aware of potential productivity gains, transforms a technical-led project to a business-led one.

#### Windows 10 *express* – You don't have to do it alone

Windows 10 *express* is Fujitsu's secure and flexible managed Windows 10 solution. Customers will no longer need a 'lock down' operating system, rather, Microsoft will deliver 'evergreen' Windows 10 while Fujitsu will manage the user access and rights through the Microsoft Enterprise Mobility and Security Suite. Fujitsu's Windows 10 *express* service provides our customers with rapid migration, seamless integration and effective delivery of Windows 10 ensuring that you get the most out of your upgrade.

Explore the potential of Windows 10 with Fujitsu's Windows 10 *express*

shaping tomorrow with you

## Fujitsu's Windows 10 *express*

This service from Fujitsu provides a mobile and secure Windows 10 managed operating environment on compatible corporate laptops and PCs for our customers. Windows 10 *express* leverages the Windows 10 OEM installation on customers hardware devices.

With Windows 10 *express*, Fujitsu uses a Microsoft centric set of enterprise management and security tools to set policies, make changes to rights and privileges, test base operating system functionality and confirm the readiness of the next Windows 10 operating system to be downloaded by the subscribing users. In addition Fujitsu's Windows 10 *express* service includes second and third line support for any incidents or service requests from customers. In the instance further support is needed from Microsoft, Fujitsu will directly raise and track progress for the incident. Fujitsu's Windows 10 *express* service allows corporate Windows 10 users to enjoy a 'consumer like' experience without compromising security, control and governance.
