FUJITSU

Fujitsu ETERNUS Storage Systems Design Service

The ETERNUS® Design Service is designed for existing customers who currently have an ETERNUS Storage system, as well as potential customers who may be considering the ETERNUS Storage system as an option to facilitate Application Backup and Replication requirements.

The Fujitsu ETERNUS Design Service provides a detailed design document which represents the comprehensive findings and solution recommendations of a formal analysis performed by Fujitsu Professional Services. Fujitsu Professional Services solutions and recommendations are based on findings gathered from the ETERNUS Assessment Service, follow-up consultative-based discovery, and through Fujitsu, Oracle® and Microsoft® Best Practices in developing scalable, reliable, and secure backup and replication infrastructure.

The complexity of today's storage and application environments requires the expertise of a Professional Services organization that can deliver solutions that promote scalability, performance and reliability.

Eight packaged options are available that represent the most common client requirements.

- Local Backup & Replication for
  Generic Data Replication
- Local Backup & Replication for Exchange
- Local Backup & Replication for SQL
- Local Backup & Replication for Oracle
- Distance Backup & Replication Solution
  for Generic Data Replication
- Distance Backup & Replication Solution
  for Exchange
- Distance Backup & Replication Solution
  for SQL
- Distance Backup & Replication Solution
  for OracleDeliverables

Upon completion and approval of the roadmap, the customer will be presented with a deliverable detailing:

- Storage Detail Design Risks & Recommendations
- Connectivity Detail Design Risks &
  Recommendations
- Host Detail Design Risks & Recommendations
- Backup & Replication Design Risks &
  Recommendations
- Application Design Risks & Recommendations

Duration

The total assessment duration takes approximately one to four weeks.

Additional Fujitsu Services

- ETERNUS Assessment Services
- ETERNUS Implementation Services

The features of this server speak for themselves:

- World-class Fujitsu Professional Services Consultants

- Strategic roadmap for improving your application and data center services

- Current backup and replication policies, procedures, and service level agreement alignment review

- Current infrastructure, network connectivity, and application environment analysis
