

ONEPOS

POINT OF SALE APPLICATION

OnePoS is an in store Point of Sale system that addresses the needs of today's retailers worldwide. It's a point of sale system minimising check out time for customers and empowering staff to offer higher levels of customer service. **OnePoS** provides a retail solution for the food and non food segments.

OnePoS provides customers with a great shopping experience with fast effective service and exciting graphical user interfaces for the operator and customer. It's designed to easily cope with the high volume transactions levels of supermarkets, as well as integrating to Enterprise-scale Customer Loyalty Applications. Being component-based it can be extended to provide new or enhanced functionality, a critical factor today.

OnePoS is based on flexible client-server architecture. It brings fast, expert solutions to the retail environment by dividing applications into a three tiered architecture: Graphical User Interface (GUI), Business Functions and a database compliant with the Association of Retail Technology Standards (ARTS) data model. This design accommodates

the need for total functional flexibility, allowing for unpredictable future changes required in today's worldwide retailing environment.

- **Freedom of Choice:** **OnePoS's** open platform enables retailers to adopt and adapt the best hardware and customer-interactive technologies as they emerge, whilst still protecting the retailer's current investment.
- **Responsiveness:** changes to **OnePoS** are fast to implement, retailers can cut the time-to-market with the implementation of new systems, processes and approaches – thus gaining a real competitive edge.
- **Valuable Customer Information:** **OnePoS** gathers, consolidates and manages the trading information throughout the retailer's organisation, providing real, usable data for better business decisions, faster customer service and more targeted customer relationships.

BUSINESS BENEFITS

OnePos was designed with the retailer in mind.

SIMPLICITY:

OnePoS is a one-stop shop for your in-store Point of Sale

RESPONSIVENESS:

Real-time improvement in business performance and customer service.

- Scalability allows system standardisation across different store sizes and formats
- Productivity features permit store personnel to concentrate on customers
- Simplified programming speeds future customisation
- Hardware independence ensures investment protection and choice of new "standards" hardware components
- OPOS and ODBC standards adherence eliminates proprietary restrictions
