THE POSSIBILITIES ARE INFINITE

# Fujitsu HandyDrive External Hard Disk Drive

Designed with today's data protection needs in mind, the Fujitsu HandyDrive External 2.5-inch Hard Disk Drive is the ultimate portable disk drive and backup system for PCs. This sleek, USB powered device is an ideal traveling companion, providing backup and access to stored data wherever you go. The drive's 500GB maximum capacity also makes it an excellent storage solution for your home computer.

The new HandyDrive features reduced power consumption, which is part of the Fujitsu Green Policy Innovation Program. The drive's utility management system decreases power consumption by stopping the spindle rotation in stand-by mode and reducing the spindle's revolutions per minute at start-up to save power.

The software bundle offers a password lock tool to prevent your data from unauthorized access. The backup tool of Acronis True Image Personal HDD allows for fast and easy backup of data on your computer. Both password lock tool and backup tool support 11 languages; English, Spanish, French, German, Italian, Portuguese, Russian, Japanese, Korean, Simplified Chinese and Traditional Chinese.
