

Quick Guide - Installation of a SCSI Hard Drive

Installing the hard drive as a single drive:

1. Install the SCSI card per manufacturer's instruction.
2. If necessary set termination on your SCSI chain. Most SCSI cards have built in auto termination, which means you will not have to set termination on your SCSI card. Typically a newer SCSI connecting cable will have termination built in. If you have another type of SCSI configuration refer to the manufacturer's instructions. **Bottom line: The last physical SCSI device on the chain must be terminated.** Termination techniques vary slightly depending on the type of SCSI devices connected (see your SCSI card and drive instructions).
3. Most modern drives will auto select their own SCSI ID. If your drive is not the type to select its own ID then set the SCSI ID to 0 (ideal, but not mandatory).
4. Install the drive in your housing or computer and connect the SCSI cable and power.
5. When you boot, the SCSI BIOS should recognize the drive. You are now ready to partition the drive.

Installing the operating system - Windows:

- Windows 98 & ME - How to use the Fdisk Tool and the Format Tool to Partition a Hard Disk Drive: <http://support.microsoft.com/default.aspx?kbid=255867>
- Windows 98 - Refer to this URL for info: <http://support.microsoft.com/default.aspx?kbid=221829&product=w98>
- Windows ME - Refer to this URL for info: <http://support.microsoft.com/default.aspx?kbid=271673>
- Windows 2000 - Refer to this URL: <http://www.microsoft.com/resources/documentation/windows/2000/professional/reskit/en-us/part2/proch04.msp>
- Windows XP - <http://www.microsoft.com/windowsxp/pro/using/howto/gettingstarted/guide/installnew.asp>

Installing the operating system - Macintosh:

- Mac OS X (10.2) - Refer to this URL for info: <http://docs.info.apple.com/article.html?artnum=51764>
- Mac OS X (10.3) - Refer to this URL for info: <http://docs.info.apple.com/article.html?artnum=25735>
- Mac OS 9 - Refer to this URL for info: <http://docs.info.apple.com/article.html?artnum=50094>

Installing the operating system - Linux:

NOTE: Linux distributions vary greatly and their installers also vary considerably. Consult the installation documentation that is available for your specific Linux distribution. We have included links to only a few of the more common installations below.

- Red Hat 9.0 - Refer to this URL for info: <http://www.redhat.com/docs/manuals/linux/RHL-9-Manual/install-guide/>
- Debian GNU/Linux - Refer to this URL for info: <http://www.debian.org/doc/>
- SUSE Linux 9.0 - Refer to this URL for info: http://www.suse.de/en/private/products/suse_linux/i386/installation.html

Installing as a Secondary Drive - Windows:

- Windows 98 & ME, refer to the instructions linked earlier.
- Windows NT instructions can be found at the following URL:
<http://support.microsoft.com/default.aspx?scid=fh;EN-US;nts40&Product=ntw40>
- Windows 2000 detailed instructions can be found at the following URL:
<http://support.microsoft.com/default.aspx?scid=kb;en-us;308209>
- Windows XP detailed instructions can be found at the following URL:
<http://support.microsoft.com/default.aspx?scid=kb;en-us;309000>

Installing as a Secondary Drive - Macintosh:

- Mac OS X (10.2 & 10.3) and OS 9, refer to the instructions linked earlier.

Installing as a Secondary Drive - Linux:

- Refer to the documentation linked earlier.

If you experience any difficulty installing your Fujitsu hard drive contact the Fujitsu Computer Products of America Technical Assistance Center at 1-888-664-0672, select option 1.
