

[EDITOR'S PICKS]

BY STEVE COOPER

MAKE IT SNAPPY

It looks like we'll be using paper forever. But if you'd like a little less stacked on your desk, feed some into Fujitsu's ScanSnap S500. It can turn 18 double-sided color documents of various shapes and sizes into searchable PDF files in just 60 seconds!

The S500 scans in a single pass and is loaded with software that lets you scan documents directly into applications like Microsoft Word and Excel. And to slim down your card file, the S500 comes loaded with Card-Minder V3.0, which scans both sides of business cards simultaneously and can read contact information written in seven languages.
