- Machine ID: 0012-3F6F-48D4

At the bottom, there are three buttons: "Why Register?", "Register Now", and "Skip Registration". The "Skip Registration" button is circled in red.

The "Skip Registration" dialog box contains the following text:

You have chosen to skip registration.

Registering VRS has several benefits:

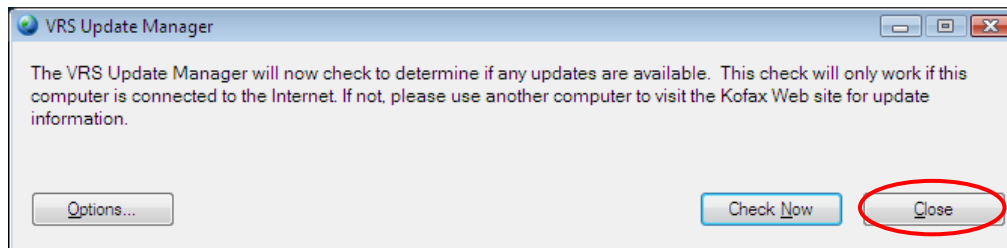

1. You must be registered to receive technical support for VRS.
2. You receive information about new product launches and upgrades.
3. You receive information about discounts and promotions.
4. You are informed about maintenance updates, including added scanner support.

Are you sure you want to skip Registration?

At the bottom, there are two buttons: "Yes" and "No". The "Yes" button is circled in red.

Privacy Notice:

The registration information, including your email information, will only be used to provide technical support and to send product related information to you.

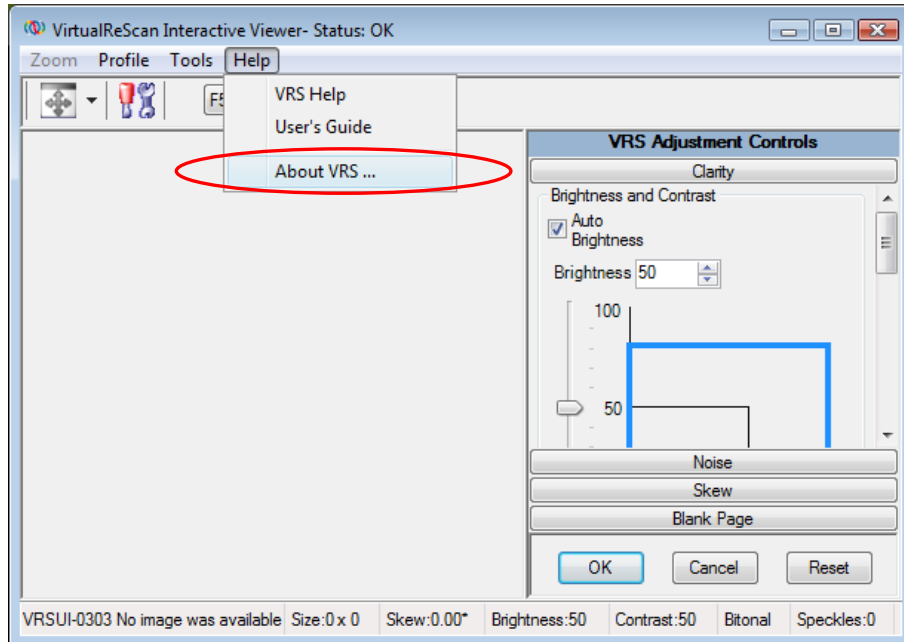

The "VRS Update Manager" dialog box contains the following text:

The VRS Update Manager will now check to determine if any updates are available. This check will only work if this computer is connected to the Internet. If not, please use another computer to visit the Kofax Web site for update information.

At the bottom, there are three buttons: "Options...", "Check Now", and "Close". The "Close" button is circled in red.

(c) How to confirm the version

- Start up VRS and select [Help]—[About VRS] from VirtualReScan Interactive Viewer.

- Version description : The description will be changed to “4.20.032.111 PFUPRO”.

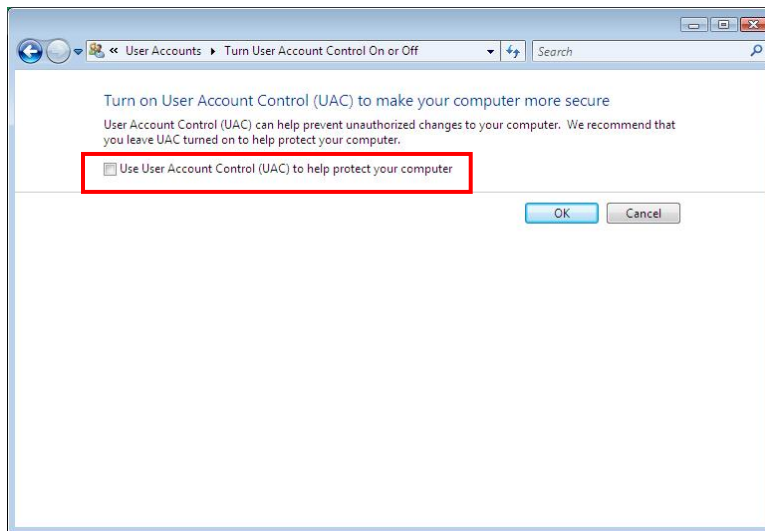

2. Precautions

In order to install VRS in a Windows Vista Enterprise/Vista Business environment, you need to disable the User Account Control setting before installing. Please disable it by the following procedures.

- Open "User Accounts" from "Control Panel".
- Select "Turn User Account Control on or off".
- Untick the "Use User Account Control (UAC) to help protect your computer" box.*
- Restart your PC.

* whether it remains ticked or unticked in the end does not affect the operation.

(Above: User Account Control setting disabled)
