

Fujitsu's low-profile, high-capacity F610 media dispenser offers OEMs on-demand printing – and state-of-the-art reliability.

Designed for the OEM market, the Fujitsu F610 media dispenser features six cassettes that can hold up to 18,000 notes or other media. Fujitsu delivers the first media dispenser of its kind to offer personalized media on demand.

At Fujitsu, OEM stands for “outstanding equipment manufacturing” because our OEM partners will stand for nothing less. But legendary product quality isn't the only reason OEMs should turn to Fujitsu. Our easy order delivery process, worldwide network and ongoing support can help OEMs drive costs down and profits up.

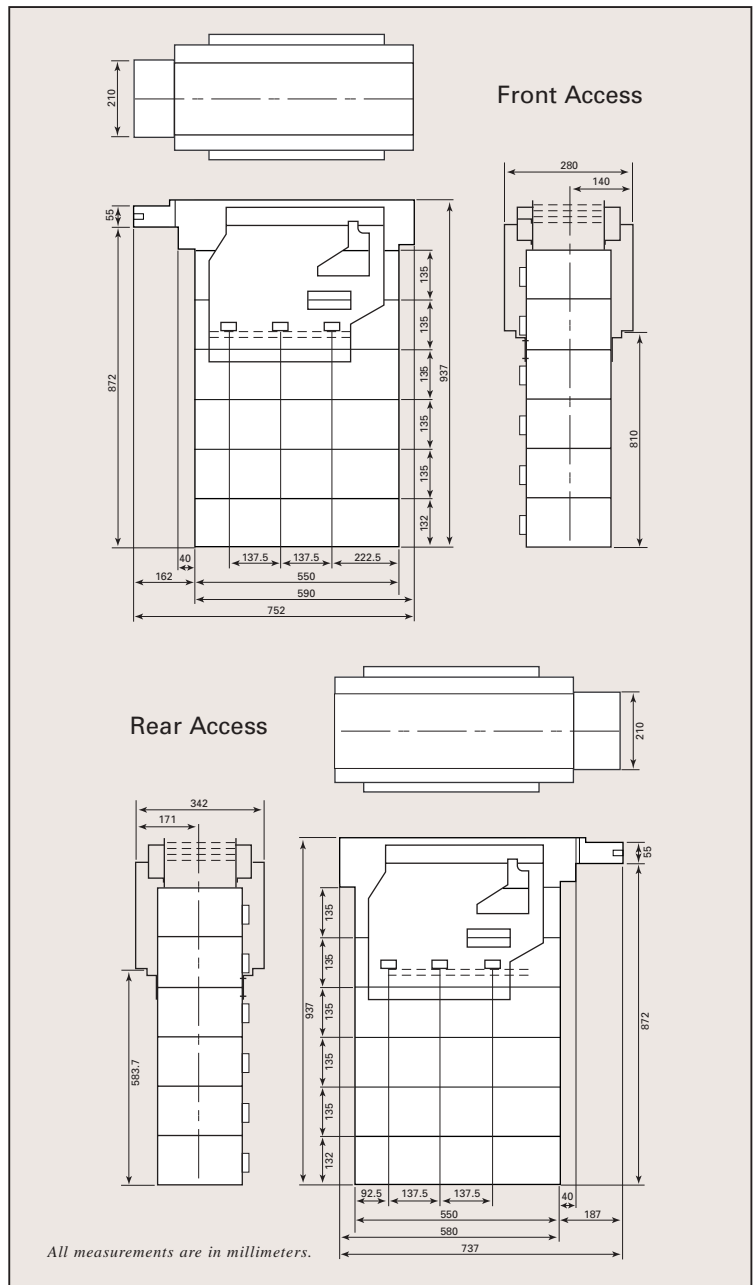

The Fujitsu F610

With the new F610 media dispenser, Fujitsu now brings to the OEM market the most advanced high-end dispenser in the world. Designed for applications that require high-capacity, high-volume transactions, the F610 is ideal for gaming and casino products, advanced ATMs, and high-volume banking products such as teller assist machines.

Each of the dispenser's six cassettes holds up to 3,000 notes or other media, and one cassette can be equipped with a printer to deliver personalized media options. That's why the F610 is the perfect solution for applications requiring multiple denominations, foreign currencies or a wide range of other media such as coupons, transit cards, event tickets, stamps or gift certificates.

And better yet, the low-profile F610 offers OEMs the lowest height and the smallest footprint of any same capacity media dispenser on the market today. In fact, despite its ability to handle high-volume transactions, the reliable F610 is compact enough to fit beneath standard bank teller counters.

For more information on the F610 – and how Fujitsu's OEM program can help you lower your total cost of ownership – contact Fujitsu today.
