

## [Category-specific Standards (Personal Computers)]

Major Category	Category	Criteria
Resource saving	Supply of maintenance parts	(1)Guaranteed supply of maintenance parts for a minimum of 5 years after completion of manufacture
	Simplification of installed equipment and function	(2)Equipment and function are simplified for notebook computers used for general administrative tasks
Recyclable design	Plastic parts	(3)Use of polymers (homo-polymers, co-polymers) or polymer alloys for any plastic parts of products weighing 25 grams or more
		(4)Elimination of metal implants (types of inserts) for any plastic parts of products weighing 25 grams or more (not applicable to metal implants allowing disassembly with general-purpose tools)
Energy saving	Operation guarantee after left for long time	(5)Normally operational after four or more weeks without power supply (with disappearance of such timer data as date and time not considered a fault)
Provision of environmental information	Long-term use	(6)Inclusion in product documentation of information on long-term use
	Energy consumption	(7)Inclusion in product documentation of information on energy consumption (power on/off status, maximum and minimum electricity consumption, ways to minimize energy consumption)
