

Is your organisation compliant with all government and industry regulations?

SUMMARY OF KEY FACTS

Solution

Regulatory Compliance Gap Assessment Service

Key deliverables

- A list of regulations that apply to your organisation
- Clear recommendations in the form of actionable items to bridge areas of potential regulatory non-compliance.

Benefits

On completion of Fujitsu's recommendations, the organisation will:

- Become compliant with all the required regulations
- Improve effectiveness by enhancement of existing oversight and management practices.

Client Challenge

The management of an organisation and its ICT systems is becoming more and more regulated in response to financial scandals and losses, as well as safety and privacy issues. Where compliance considerations are not the core business of the organisation, it can be a significant challenge to determine what regulations apply and the extent of existing compliance.

Fujitsu's Solution

Fujitsu's Regulatory Compliance Gap Assessment Service identifies your requirements and current posture in relation to government and industry regulations. The assessment covers many regulations including the Data Protection Act, Sarbanes-Oxley (SOX), the Payment Card Data Security Standard (PCI DSS), Supervisory Control and Data Acquisition (SCADA) and much more. The Gap Assessment provides recommendations when appropriate to address any identified issues.

Benefits

Fujitsu's Regulatory Compliance Gap Assessment Service identifies any points of non-compliance with regulations that apply to your organisation, and provides recommendations in the form of clear, actionable items to close these gaps.

Additionally, compliance with these regulations ensures alignment with information management best-practices; this helps improve the organisation's business effectiveness and security.

Our Approach

Our team of experts works with key members of your organisation to assess your current posture vis-à-vis current regulations that apply to you. We provide clear recommendations explaining how to eliminate any identified areas of non-compliance.

Our Expertise

Fujitsu designs, implements, tests and manages large security projects for security-conscious organisations in Ireland and around the world. We have the specialised skills and tools to assist your organisation in becoming compliant with the relevant regulations.
