

MOBILE INNOVATION

*Introducing the Windows® CE TeamPad 500G.....
from Fujitsu.*

With an industry standard platform, integrated printer, and a lightweight, rugged design, the Fujitsu TeamPad 500G is a mobile terminal suited to multiple applications, all supported by the powerful Intel X-Scale® Processor and Microsoft Windows® CE 4.2.

Wi-fi and GSM/GPRS capability can be implemented using the PCMCIA card slot, and a Compact Flash Card slot and RS232 port provide expansion for extra storage or external connectivity respectively.

The TeamPad 500G is a lightweight mobile terminal with a rugged case, so it is tough enough to withstand application uses in the harshest of environments. Its Lithium-Ion battery lasts for up to 15 hours supporting the busiest work schedule with battery backup to protect data during main battery changes.

The TeamPad 500G offers users the convenience of an all-in-one device incorporating printing, scanning, payment and wireless capability, reducing the need to carry or charge multiple devices.

TeamPad 500G – Fujitsu's Handy Mobile Terminal

Potential Applications:
