

If your IT system goes down, will the rest of your business follow?

Our reliable architecture keeps you on firm ground.

The moment you think you're prepared for anything, the unexpected happens. Many businesses, such as large financial companies, face the challenge of balancing global reach with the need for system stability. This complexity requires development of mission critical IT systems that ensure the continuity of local branches while still allowing for architecture that can be managed remotely—no simple task given disparate computer platforms.

When disaster strikes, does your IT system provide a safety net? Our storage systems ensure that no matter what the world throws your way, your business infrastructure is able to land on its feet without skipping a beat.

Fujitsu builds IT systems uniquely suited to your situation. Fujitsu has experience in designing, building, and operating common platforms within central hosting

centers where numerous applications reside. Drawing on our expertise in multiple platforms and storage management, we are able to develop customized systems that meet the needs of regional offices of large operations—while still allowing for control at the highest levels. No wonder so many worldwide corporations are turning to us, looking for new ways to apply technology. As the world's third-largest IT solutions and services provider, Fujitsu can provide IT systems with the continuity and fast recovery required for your business to focus on what's next, instead of what if. For more information visit our website, send us e-mail at sarinya@th.fujitsu.com, or call 0-2302-1773.

ETERNUS World-class storage systems for the most demanding business environments.
