

Mobile

Fujitsu's mobile solutions help to empower people and raise productivity – anywhere, at any time – by delivering a personalized experience. Using desktops, laptops, or smart devices, employees can access the applications, data, and tools they need, while organizations can have peace-of-mind about security.

Services

■ Workplace Anywhere

Workplace Anywhere is an integral part of our Digital Workplace Services. With Workplace Anywhere people inside and outside your organization can use digital services to connect with the applications and data they need and do so in a way that feels personal to them. Once they're connected they can start to collaborate and innovate more effectively. Workplace Anywhere encompasses Cloud, Virtual and Managed Workplace services and we have securely combined these workplace services to get the right blend for your organization.

■ Cloud Managed Workplace Services

With these services, we use cloud-based tools to create a modern, secure and agile platform for your business. One that's securely managed, and optimized by our experts to deliver the best results. It's an evergreen service that draws on: Enterprise Mobility Management (EMM); Identity as a Service (IDaaS); and Microsoft 365 (Office 365, Azure AD and Win10). By getting the right blend of technology and features, we make sure you achieve the right level of security. In a cloud-managed workplace, you can manage all your devices – on any operating system – from one platform. It puts you in control, and helps you get new services to market faster.

■ Virtual Workplace Services

Through our Virtual Workplace Services, we can help you find the best way to virtualize your infrastructure – using public, private or hybrid cloud. We offer a range of virtualization options, including: virtual desktop infrastructure (VDI); virtual Desktop as a Service (vDaaS); hosted shared desktops; and applications solutions. Virtualization has many benefits. Beyond improving security, it can also introduce layers of control that take the user's context into account including location

data and what device they are using. This makes it an ideal way to meet local data rules or to give contractors temporary access.

With our Virtual Workplace Services, you can also ramp up resources swiftly and cost-effectively; while your data stays in the data center. You can instantly update your apps and desktops, safe in the knowledge that you can roll back a change in just a few minutes. At the same time as making it easier to manage your estate, you can ensure staff get the right user experience. They can get the information they need on the go – with the same look and feel as they're used to. And by matching user profiles to the right virtual resources, you can significantly improve productivity.

■ Managed Workplace Services

We can manage your standard desktops with the same model as cloud or virtual desktops. Our modern version of the managed desktop service combines on-premise tools to manage your devices with cloud-based services. It gives you up-to-date IT that you and your people can rely on. Options include full configuration, change, lifecycle, security and vulnerability management services. Microsoft Windows Image Lifecycle Management is also part of the service. Whichever version of Windows you use; we can customize it to suit your environment. And we test each update before we deploy it to minimize risk. A Managed Workplace helps you manage change – at the right pace for your business. By testing all changes before you deploy them, we manage risks and help prevent costly incidents. You achieve high levels of service and availability, and ensure your IT stays evergreen. Our Managed Workplace offering also supports self-service. Staff can download applications from a store and set them up themselves. With end-user analytics, you can get new insights and enhance the user experience over time.

Products

Client Computing Devices

Fujitsu empowers organizations to meet the requirements of today's social and demographic trends which result in new ways people live and work. This also helps businesses to reach out to a new generation of employees, while gradually moving toward digital work processes and enabling employees to reach a satisfactory work-life balance. Fujitsu's tablets have become the standard in a wide variety of environments including government, healthcare, sales force automation, and education. Fujitsu offers a complete range of environmentally conscious products and uses environmentally friendly technologies and processes throughout the entire product lifecycle.

■ Notebooks and Tablets

The FUJITSU LIFEBOOK Notebook and STYLISTIC Tablet portfolio empowers the user through powerful performance wherever the workplace, whatever the industry. Premium technology, unique biometric security, a comprehensive family concept, configuration options and innovative solutions interconnect to grant customers the freedom and reassurance to work with competence, stamina and style.

■ Desktops

The FUJITSU ESPRIMO family brings a complete range of fully featured and highly expandable desktops that dependably run the office applications of today and tomorrow. Their superior reliability comes from best-in-class Fujitsu development and outstanding production quality. The world's most efficient power supplies lower your energy bill and reduce your environmental footprint.

■ Workstations

Thanks to the end-to-end capabilities from design, engineering to production, CELSIUS workstations have gained a great reputation for being whisper quiet, offering ingenious thermal management and cooling as well as reaching world-leading benchmark results. All mobile, desktop and rack workstations are optimized for use with a host of leading workstation applications, like Autodesk, Dassault Systèmes, Siemens PLM or PTC.

■ Thin Clients

For optimized server-based computing or desktop virtualization, choose customizable FUJITSU FUTRO Thin Clients. Every device is designed and engineered to support best performance, security, easy manageability and cost-effectiveness. They also deliver significantly lower TCO over their lifecycle compared with a standard PC. Plus, ease-of-use, standardization and quiet operation ensure maximum user comfort.

■ Smart Devices

Fujitsu offers a diverse lineup of smart devices that can be tailored to customer needs. Fujitsu's smartphones and tablets are equipped with proprietary human centric technology that enables ultimate connectivity and smart functions for daily lives, such as 4G/LTE connectivity and intuitive touch-panel operation, and other features.

■ Peripheral Devices

Fujitsu delivers a comprehensive range of intuitive, useful peripheral products covering displays, human input, storage, connectivity, carrying cases, biometric security, multimedia, dot matrix printers and wearables. All peripheral products guarantee optimal compatibility across all Fujitsu systems.
