Preparing

Checking the Components

Make sure that all items shown below are included in the package.

*1 : The contents may vary depending on the country and the ScanSnap model purchased.

*2 : Bundled with FI-IX500-D

If any other packaging is provided, make sure to store it as well. Make sure to handle the components with care. The box and packaging materials are required for storage and transportation of the ScanSnap. Do not throw them away. If anything is missing or damaged, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

Read the Safety Precautions

Before using the ScanSnap, make sure to read and understand the information provided in the "Safety Precautions" document.

Symbols Used in This Manual

Symbol	Description
	This indication alerts operators to an operation that, if not strictly observed, may result in safety hazards to personnel or damage to the product.

Referring to the "Operator's Guide"

To refer to the "Operator's Guide", insert the Setup DVD-ROM into the DVD-ROM drive, and follow the procedure below.

Click the [Manuals] button in the [ScanSnap Setup] dialog box, and then the [Operator's Guide] button.

Double-click the [Operator's Guide] icon in the [ScanSnap] window.

Using in a Wireless LAN Environment

ATTENTION

No more than one computer can be connected to the ScanSnap via wireless LAN.

The ScanSnap can be connected to a computer or a mobile device via wireless LAN. To use this function, make sure a wireless LAN is available in advance. When you connect the ScanSnap to a wireless LAN, information for a wireless access point or router such as a SSID (network name) or security key (password) may be required. For details, refer to the manual of your wireless access point or router.

Removing the Protective Packaging

Follow the procedure described below to remove the protective packaging before using the ScanSnap.

1. Open the ADF paper chute (cover) (1), and pull the tape to remove the protective foam sheet (2) from the stacker. Open the stacker (3) and pull the tape to remove the protective sheet from the ADF top section (4).

2. Pull the ADF release tab to open the ADF top section, and pull the tape to remove the protective card from the side guides.

If the magnetic part of the ADF top section makes contact with the black magnetic part of a magnetic card or IC card, the data on the card may be lost.

Installing the Software

Windows® Installation (→ [page 4](#))

Mac OS Installation (→ [page 7](#))

ATTENTION

- Do not connect the ScanSnap to your computer before installing the software.
- If you have no DVD-ROM drive, please visit the following web page:
<http://scansnap.fujitsu.com/g-support/en/>

HINT

When you export the data scanned by the ScanSnap to your mobile device, download ScanSnap Connect Application from an available source such as iTunes, App Store, or Google Play.

Connecting the ScanSnap

ATTENTION

- Only one ScanSnap can be used by a computer at a time.
- Use only the cable supplied with the ScanSnap.

Do not use AC adapters other than the one supplied with this ScanSnap. Doing so may cause damage to the ScanSnap.

1. Connect the AC cable to the AC adapter (collectively called the "power cable").

2. Plug the power cable into the power connector at the back of the ScanSnap, and the other end to an AC outlet.

3. Remove the tape seal on the USB connector of the ScanSnap.

4. Connect the USB cable to the USB connector on the ScanSnap and the USB port on your computer.

ATTENTION

- When connecting to USB hub, make sure to connect the ScanSnap to the USB hub which is connected to a USB port of your computer. Use a powered USB hub (with AC adapter).
- If USB port or USB hub is USB 1.1, scanning speed will slow down.
- Connect the USB cable with the USB mark facing up.

5. Open the ADF paper chute (cover) of the ScanSnap.

⇒ The ScanSnap is powered on and the [Scan] button lights in blue.

ATTENTION

- The bottom of the ScanSnap may become hot when the ScanSnap is used, but this heat does not affect operation or cause any physical harm. However, be careful not to drop the ScanSnap when carrying it.
- When the ScanSnap is turned on and left unused for 4 hours, it will turn itself off automatically. To turn the ScanSnap back on, perform one of the following operations:
 - Press the [Scan] button (Scanning does not start).
 - Close the ADF paper chute (cover) and open it againThe time until power-off can be changed. For details, refer to the Operator's Guide.

ADF Paper Chute (cover)

HINT

When you close the ADF paper chute (cover), the ScanSnap will turn off.

6. Check the ScanSnap Manager icon.

Windows

⇒ The ScanSnap Manager icon  is displayed in the menu that appears when you click  on the notification area, at the far right of the taskbar.

To have the ScanSnap Manager icon  always displayed on the notification area, drag the icon and drop it onto the notification area.

ATTENTION

If the ScanSnap Manager icon is , right-click on  and select [To establish connection] from the menu. You can reference the appropriate actions for connecting the scanner.

Mac OS

⇒ The ScanSnap Manager icon  appears in the Dock.

ATTENTION

If the ScanSnap Manager icon is , while holding down the [control] key, click  and then select [To establish connection] from the menu. You can reference the appropriate actions for connecting the scanner.

Scan Test (USB Connection)

After you perform a scan, check the linkage with applications.

For details on documents that can be scanned with the ScanSnap, refer to "ScanSnap Overview" in the Operator's Guide.

ATTENTION

If the ScanSnap Manager icon is  (Windows) /  (MacOS), exit ScanSnap Connect Application on the mobile device. When the connection between the mobile device and the ScanSnap is disconnected, the ScanSnap Manager icon changes to  (Windows) /  (MacOS).

1. Load a document in the ScanSnap.

1. Pull the stacker on the ADF top section towards you.
2. Prepare to load a document in the ScanSnap.
3. Load the document on the ADF paper chute (cover), and adjust the side guides to the size of the document.

2. Press the [Scan] button on the ScanSnap.

- ⇒ Scanning starts. The Quick Menu appears when scanning is completed.

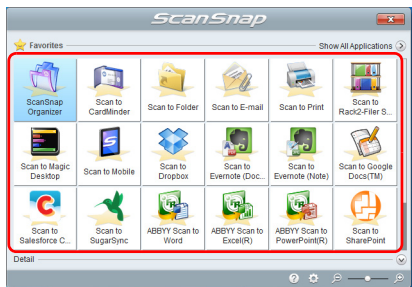

ATTENTION

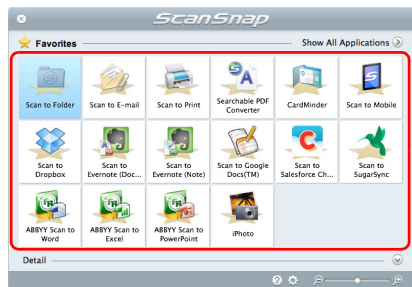

If scanning does not start, refer to "Troubleshooting" in the ScanSnap Manager Help.

3. In the Quick Menu, click the icon of the application to link with ScanSnap Manager.

Windows

Mac OS

⇒ The selected application is started.

Confirm that ScanSnap Manager is linked with the application that was selected from the Quick Menu.

Connecting the ScanSnap to a Wireless LAN

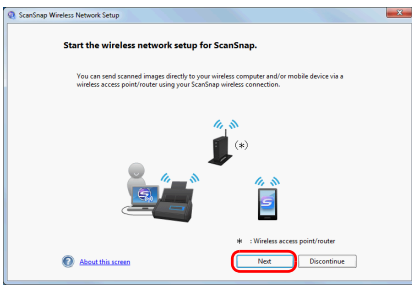

To connect the ScanSnap to the wireless LAN, follow the instructions on the screen that is displayed after the installation.

HINT

If the ScanSnap is already connected to a wireless LAN, some steps may be skipped. Follow the instructions on the screen that is displayed.

1. On the wizard screens for connecting the ScanSnap to the wireless LAN, click the [Next] button (Windows) or the [Continue] button (Mac OS).

Windows

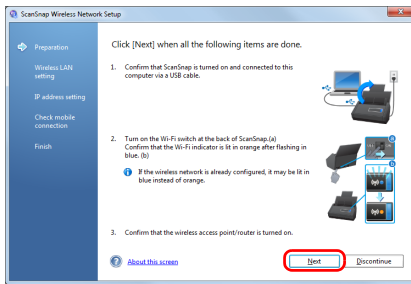

Mac OS

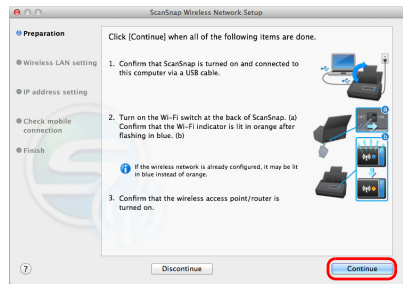

⇒ The [Preparation] screen appears.

2. After performing the preparations as described on the screen, click the [Next] button (**Windows**) or the [Continue] button (**Mac OS**).

Windows

Mac OS

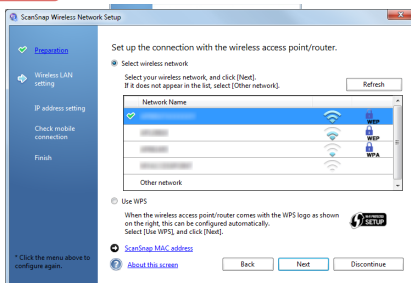

⇒ The [Wireless LAN setting] screen appears.

If the ScanSnap is able to connect to the wireless LAN using the wireless settings of this computer, a confirmation message appears instead of the [Wireless LAN setting] screen. Clicking the [Yes] button on the screen connects the ScanSnap to the wireless LAN. Proceed to step 4..

3. Connect the ScanSnap to the wireless LAN.

Proceed by following the instructions on the screen.

Windows

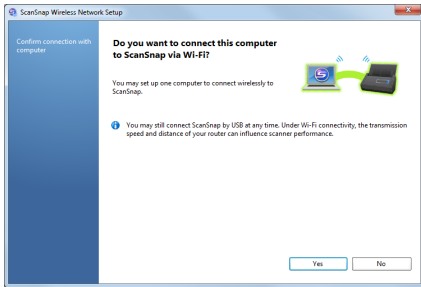

Mac OS

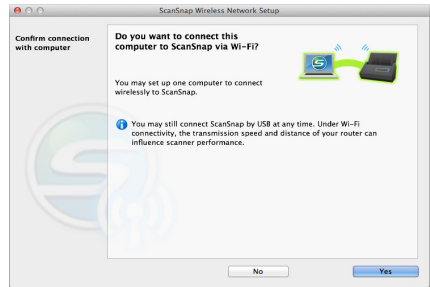

⇒ The [Confirm connection with computer] screen appears.

4. Select whether to register the current computer to the ScanSnap as a computer to be connected to the ScanSnap via wireless LAN.

Windows

Mac OS

ATTENTION

- No more than one computer can be connected to the ScanSnap via wireless LAN. If you register the current computer to the ScanSnap, other computers cannot be connected to the ScanSnap via wireless LAN.

- To change the computer that is connected to the ScanSnap via wireless LAN, click [] → [] on the screen that appears when you start ScanSnap Wireless Setup Tool.

Start up the ScanSnap Wireless Setup Tool in the following ways:

Windows

Select [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Wireless Setup Tool] (for Windows® 8, right-click the Start screen, and select [All apps] on the app bar → [ScanSnap Wireless Setup Tool] under [ScanSnap Manager]).

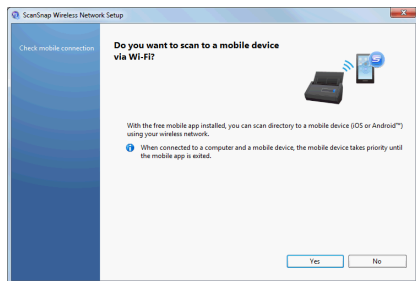

Mac OS

From the sidebar in Finder, select [Applications] → [ScanSnap] and double-click [ScanSnap Wireless Setup Tool].

⇒ The [Check mobile connection] screen appears.

5. Select whether to connect the ScanSnap and the mobile device via wireless LAN.
- If you want to connect them, click the [Yes] button and follow the instructions on the screen.
- If you do not want to connect them, click the [No] button. You can use the ScanSnap Wireless Setup Tool to connect the ScanSnap and the mobile device via wireless LAN at another time. For details, refer to the Wireless Setup Tool help.

Windows

Mac OS

⇒ When the mobile connection check is complete, "Wireless network setup is complete" appears.

6. Follow the instructions on the screen to close the window.

Scan Test (Wireless LAN Connection)

Check that the image scanned by the ScanSnap is sent to the computer or mobile device.

ATTENTION

If the ScanSnap Wireless Setup Tool or the Wireless Network Setup Wizard is running, exit them.

When You Connect a Computer to the ScanSnap

1. Disconnect the USB cable connecting the ScanSnap to the computer.

ATTENTION

If the ScanSnap Manager icon is  (Windows) /  (Mac OS), exit ScanSnap Connect Application on the mobile device.

⇒ The ScanSnap is connected to a computer via wireless LAN, and the ScanSnap Manager icon changes to  (Windows) /  (Mac OS).

2. Scan a document with the ScanSnap.

For details, refer to "Scan Test (USB Connection)" (page 11).

When You Connect a Mobile Device to the ScanSnap

1. Start ScanSnap Connect Application on the mobile device to connect to the ScanSnap.

For details, refer to the ScanSnap Connect Application User's Guide.

2. Scan a document with the ScanSnap.

For details, refer to "Scan Test (USB Connection)" (page 11).

⇒ The scanned image is displayed on the mobile device when the scanning is complete.

If the scanned image is displayed on the mobile device, then the scanning check is complete.

ATTENTION

- Depending on the ScanSnap installation location, it may take some time until the scanned image is displayed on the mobile device. For details, refer to "Troubleshooting" in the ScanSnap Manager Help.
- If the scanned image is not displayed on the mobile device after the scanning is complete, refer to the ScanSnap Connect Application User's Guide.
