

Relays Containing Cadmium
are Replaced by RoHS Compliant Relays

--- NOTES ---

1. RoHS compliant relays to replace existing cadmium relays

Proposal is shown in table 1.

2. Note :

- 1) Contact rating and guaranteed electrical life

Generally, contact rating and guaranteed electrical life are same as in cadmium relays with some exceptions listed below.

- 2) The following cadmium relays are replaced by RoHS compliant relays with less contact rating and shorter electrical life.

- * LZ-()V : No plan to provide alternative due to no sales history
- * VE-() H5 : Contact rating of N.C. contact will change from 5A to 3A.
- * JY-()H-K : Contact rating of alternative type will change from 5A to 3A.
- * JS-()-K : Electrical Life of N.C. contact will change from 100K to 50K.
