

Interstage Business Process Manager V7

Answers to the Sample Examination Questions

Introduction

This document is designed to help you pass the examination to become an Interstage Certified Professional – Interstage Business Process Manager V7. It contains the answers to a set of questions that are based on the contents of the Interstage Certified Professional – Interstage Business Process Manager V7 Textbook. These sample questions are designed to give you an indication of the type and difficulty of the questions that you may encounter when taking the actual exam.

To obtain the most benefit from these sample questions, it is recommended that you study the Interstage Certified Professional – Interstage Business Process Manager V7 Textbook before attempting to answer them. That way you will be able to test your readiness for the real exam.

Once you have completed the sample questions, you should check your answers with the contents of the text book. If necessary, you can use this document containing the answers to these sample questions, which also includes the explanation for the answers.

Sample Questions

Question 1.

Which of the following is NOT an industry accepted work flow type?

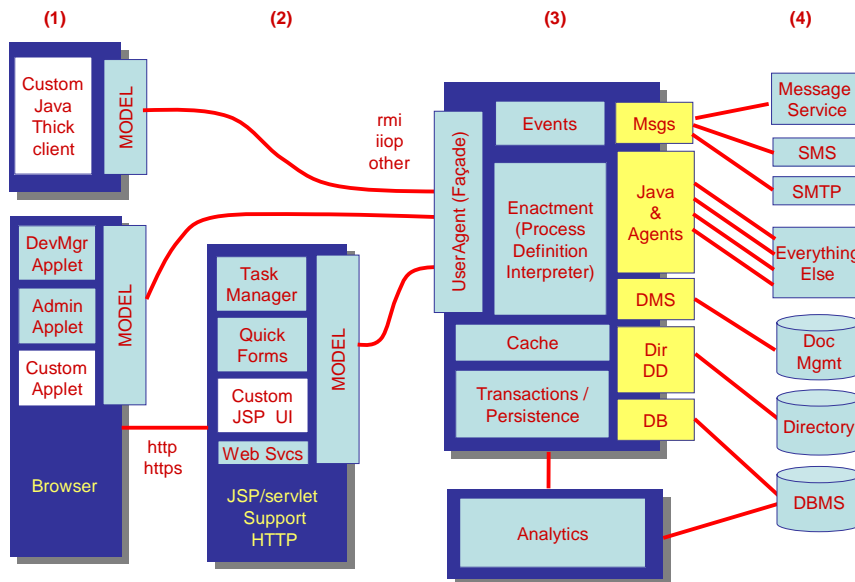

- A. Process Discovery
- B. Collaborative
- C. Internal
- D. Production

Answer: _____ C _____

See the section titled “Types of Workflow” in Chapter 1 for a list of the industry accepted work flow types.

Question 2.

The following diagram shows the overall architecture of Interstage BPM. Choose the answer from the following that correctly identifies the items numbered (1), (2), (3) and (4).

- A. 1 - Client Tier, 2 - BPM Tier, 3 - Web Tier, 4 - Repository Connectivity
- B. 1 - Client Tier, 2 - Web Tier, 3 - BPM Tier, 4 - Repository Connectivity
- C. 1 - BPM Tier, 2 - Web Tier, 3, Client Tier, 4 - Repository Connectivity
- D. 1 - Repository Connectivity, 2 - Web Tier, 3 - BPM Tier, 4 - Client Tier

Answer: _____ B _____

See Figure 1 in the section titled “Overall Component Architecture” in Chapter 2 for the correct names of the items.

Question 3.

Which of the following components is not normally associated with an adaptor function in Interstage BPM?

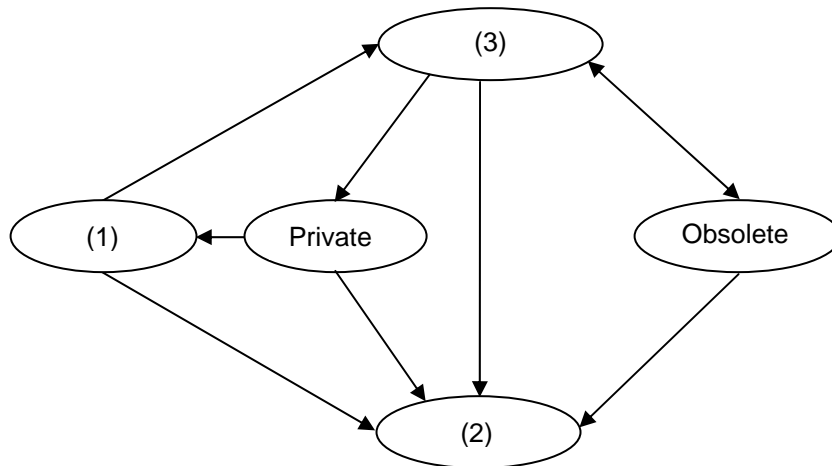

- A. Document Management System
- B. Directory Services
- C. Script
- D. Workflow

Answer: _____ D _____

Workflow is not a function of an adaptor. See the “Overall Component Architecture” section in Chapter 2 for the types of adaptors available.

Question 4.

The following diagram shows the valid states that a process definition can be in and it also indicates the transitions that are allowed between them.

Select from the list below the one that shows the correct names for the numbered states in the diagram.

- A. (1) - Draft, (2) – Deleted, (3) - Published
- B. (1) - Published, (2) – Deleted, (3) - Draft
- C. (1) - Deleted, (2) – Published, (3) - Draft
- D. (1) - Deleted, (2) – Draft, (3) - Published

Answer: _____ A _____

See the diagram in the “Process Definition States” section in Chapter 3.

Question 5.

In order for a user to be able to modify a template (process definition), a number of prerequisites must be fulfilled. Which of the following items is NOT required in order to modify a template?

- A. The template must be in Draft state and in edit-mode
- B. All process instances of the template must be in the Suspended state
- C. The user must be the template owner or have administrator privileges
- D. The user editing the template must acquire a lock on the process definition from the server

Answer: _____ B _____

There must be no instances of the process definition. See the “Process Definition Operations” section in Chapter 3.

Question 6.

Which of the following items is NOT a workflow building block group in Interstage BPM?

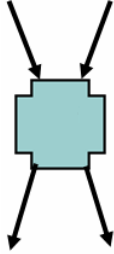

- A. Nodes
- B. Complex Nodes
- C. Sub processes
- D. Adaptors

Answer: _____ D _____

Adaptors are a means to communicate with other components; they are not a workflow building block group. See the “Introduction” section in Chapter 5.

Question 7.

What type of node does the following icon represent in a template (process definition)?

- A. OR node
- B. AND node
- C. Sub process Node
- D. Delay Node

Answer: _____ A _____

This represents an OR node. See the “Nodes” section in Chapter 5.

Question 8.

Which of the following statements about JavaActions in Interstage BPM is NOT correct?

- A. JavaActions are extensions to the core process enactment engine
- B. JavaActions can be used to extend the process engine to do anything that is possible to do in Java.
- C. JavaActions run in the context of the server and can modify User Defined Attributes in any process instance
- D. A JavaAction can be added to a process definition at design time

Answer: _____ C _____

JavaActions run within the context of a process instance, not the server context. See the “JavaActions” section in Chapter 6.

Question 9.

Which of the following nodes does Interstage BPM use to start a process on another server?

- A. Remote Sub Process Node
- B. Chained Process Node.
- C. Sub Process Node
- D. Complex Node

Answer: _____A_____

Integration is achieved through the Remote Sub Process Node. See the “Interstage BPM Integration” section in Chapter 7.

Question 10.

Which of the following is NOT an adaptor that is provided with Interstage BPM?

- A. Framework Adaptor
- B. Directory Adaptor.
- C. Process Adaptor
- D. Document Management System Adaptor

Answer: _____C_____

“Process Adaptor” is incorrect. See the “Introduction” section in Chapter 9.
