

PRIMEPOS 1500

The 8System PrimePOS 1500 is one of a series of Point-Of-Sale products designed to increase productivity and profit for your retail business. The PrimePOS has flexible designs, which allows different retail configurations, display and peripheral options and most of all expandability. PrimePOS 1500 was designed to be used as either a stand alone POS or in conjunction with other POS units connected to a full-featured back office systems.

The 12.1-Colored LCD Panel Passive Matrix display is mounted on a self-adjusting hinged enabling the user to position the screen to his convenience. The display is powered with an ELO touch screen system allowing accuracy at your fingertips.

PrimePOS 1500 features an external 170W Auto Volt Power supply to power your everyday operations unlike internal power supply that could easily heat up and create an undesirable temperature for your components.

Space has always been a problem for the retail business, so PrimePOS 1500 was designed to meet the needs of space conscious retailers. Weight was also taken consideration into the design to improve flexibility for strategic counter positioning. Liquid spills are common scenario in your business so PrimePOS 1500 spill proof touch screen displays prevents liquid spills from destroying your hard-earned investments. The PrimePOS 1500 is made of tough ABS plastic to withstand the pressures and punishments of your everyday operations.

Power is useless without connections. PrimePOS 1500 is equipped with more connectivity options than any other competitor in the market. With 4 RS232C ports, 3 external with D9 Pin Connector with +5VDC/+12VDC, a parallel port, 2 USB ports, Keyboard port, Mouse Port, External VGA, Cash Drawer Port (24VDC), Ethernet, 10/100 Base LAN Port, Audio Out, PrimePOS gives you unmatched flexibility and configuration options to choose from.

Looking into the heart of this powerful and attractive machine is an Intel Celeron and Pentium III type Processors. Two DIMM memory slots allow easy upgrades of up to 512 MB. It also features a PCMCIA or Fax/Modem (PC104) Slot, and Internal Smart Card Reader.

PrimePOS 1500 support numerous operating systems like DOS, Win9X, Win2k, WinNT, OS/2, Unix and Linux. Whatever operating system you prefer you can be assured that PrimePOS could meet your preferences.

To complete your system, PrimePOS 1500 could be connected with peripherals like but not limited to printers, cash drawer, customer displays, magnetic card reader, barcode scanners and internal floppy or CD-ROM Drive.
