

Important Notification:Solaris™ 10 Operating System 8/07

Applying following patch, problem and limitation of Solaris 10 Operating System 8/07 stated below can be resolved.

- Solaris 10 OS 8/07 Mandatory Recommended and Security Patches FJ RSPC 1.7.3 and ones following the No., or,
- Collected patch PTF R08021 and ones following version

Please be sure to apply relevant patches just after Solaris10 8/07 installation. For servers with Solaris 10 8/07 already installed, these patches above should be applied.

1.Limitation

2.Problem

3.Patch application order

3.Downloading mandatory patches

1. Limitation

Outline	Name Service Cache Daemon (nscd (1M)) in NFS cannot be used.
Treatment	By applying either FJ RSPC 1.7.3 or PTF R08021 both containing patch 127111-05, this limitation is released. Be sure to apply either patch above. After applying relevant patch, check the server configuration if Name Service Cache Daemon nscd (1M) can be started. If nscd (1M) starting is disabled, please reconfigure it using svcadm (1M) command. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"># svcadm enable svc:/system/name-service-cache:default <Enter></div>

2. Problem

Outline	If patches are applied under multi-byte locale using patchadd(1M) command, removing patch using patchrm command fails
Treatment	By applying either FJ RSPC 1.7.3 or PTF R08021 both containing patch 119254-50, this limitation is released. Be sure to apply either patch above.

3. Patch application order

After installation of Solaris 10 8/07, be sure to apply relevant patched according to procedures below. These procedures are applicable to Solaris 10 8/07 already used.

- (1) Apply Mandatory Recommended and Security Patches FJ RSPC 1.7.3 and ones following the No.
- (2) Apply other Mandatory Recommended and Security Patches
- (3) Apply collected patch PTF R08021 and ones following the No.

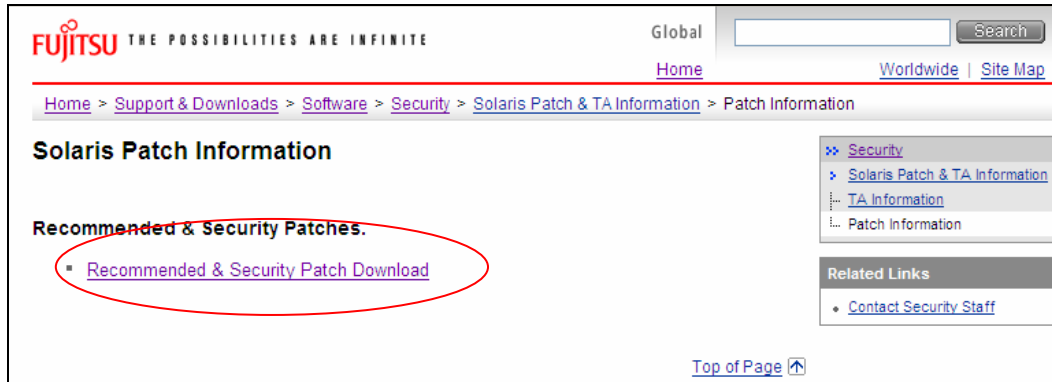

4. Downloading mandatory patches

Patch downloading procedures are as follows.

(1) Please select “Recommendation & Security Patch Download” on “Solaris Patch Information”.

- Solaris Patch Information

<http://www.fujitsu.com/global/support/software/security/products-s/patch-info/>

(2) On “Terms of Use” page, please confirm “The conditions for use of download function in security patches”. If you agree to the terms, select “Accept” after registering ID and password for download. If not, you cannot download patches.

(3) On “Recommended & Security Patch Download” page, please select “Solaris 10 OS 8/07 Mandatory Recommended & Security Patches”.

(4) On “SPARC Enterprise/PRIMEPOWER/GP7000F FJ Recommended & Security Patch Clusters”, please select and download relevant patches – FJ RSPC 1.7.3 and ones following the No. for Solaris 10.
