# Systemwalker Desktop Keeper V13.2

# Systemwalker Desktop Patrol V13.2

*Systemwalker Desktop Keeper* and *Systemwalker Desktop Patrol* provide you with high levels of system status control. This includes: management of PC software licenses, security auditing, automated distributions, client operational log collection, application of security patches, prohibited software specification and remote operation.

They support a wide range of system environments, from department-level systems consisting of several dozen clients to large-scale systems consisting of thousands of clients.

## Desktop Management Challenges

The difficulties of managing large desktop populations are common to most Information system managers. How many desktops are in use, which software is installed and what is actually being used, which versions of antivirus software are deployed, and which operating system patch levels have been applied?

These issues bring their own risks, including the legal issues of running unlicensed software, operational dangers such as out-of-date virus definitions and cost of ownership risks from over-licensing of desktop software. In addition, there are increasing risks of information leakage due to unauthorized data copying and access.

## Systemwalker Desktop Keeper and Desktop Patrol Solution

*Systemwalker Desktop Keeper* and *Desktop Patrol* offers you centralized solutions for the above. Providing management of assets, patches, anti virus, software licensing, desktop security and logging.

## Desktop Security

*Systemwalker Desktop Keeper* collects operational logs from desktop clients. It assists you monitor use of unauthorized software as well as operations likely to create information leaks. Additionally, it can prevent desktop client users from printing sensitive data or copying files to external media.

## Software Management

*Systemwalker Desktop Patrol* is capable of remotely carrying out software audits, collecting patch levels, service packs and the versions of virus definitions installed.

*Systemwalker Desktop Patrol* Also lets you distribute and install software and patches either directly from a central management server or via relay servers to minimize network traffic.

You can also perform software license management and ensure efficient use of corporate software resources by metering frequency of software usage.

## Asset Management

*Systemwalker Desktop Patrol* can remotely identify both hardware resources and the software installed on desktop clients.

## Log Collection and Management

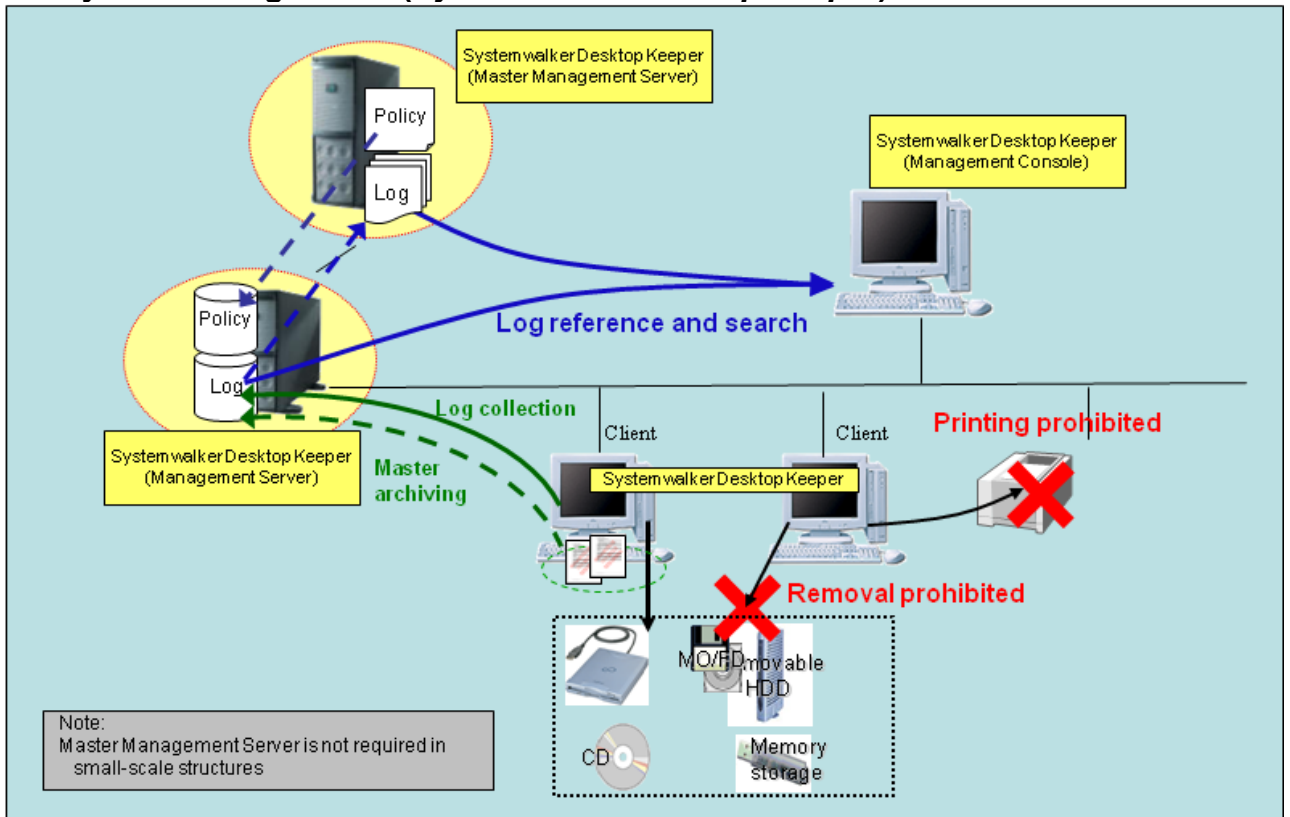

*Systemwalker Desktop Patrol* offers the ability to automatically collect log files from desktop clients, allowing you to proactively deal with problems before they occur.

## Remote Control

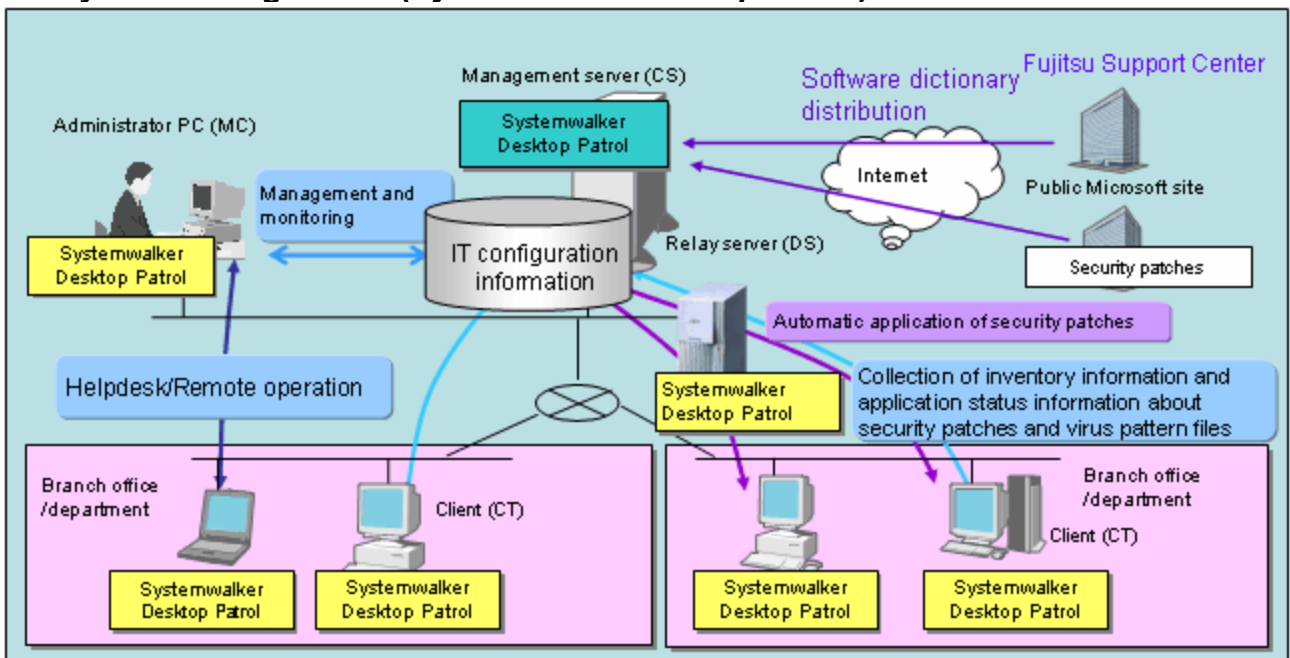

With *Systemwalker Desktop Patrol's* Live Help feature, you can also remotely assist client users. This reduces the cost of onsite visits and significantly improves response times to users.

## ■ System Configuration (Systemwalker Desktop Keeper)

## ■ System Configuration (Systemwalker Desktop Patrol)

- CS(Corporate Server)** : This server is responsible for the service that defines the operation policy for distributing content and the policy for collecting inventory information and distributes these policies to each agent
- MC(Management Console)** : This is a console to perform tasks such as managing distributed content and defining operation policy.
- DS(Domain Server)** : This is a server that provides services for relaying and storing operation policies, inventory information, distributed contents, and other data that are collected and delivered. A relay server is installed when relaying is necessary for load distribution.
- CT(Client Terminal)** : This is a managed client PC. It is installed to a PC asset of which is managed by inventory collection.

## ■ Product Lineup

*Systemwalker Desktop Keeper* comes in following edition.

1. *Systemwalker Desktop Keeper* Standard Edition

*Systemwalker Desktop Petrol* comes in following edition.

1. *Systemwalker Desktop Petrol* Standard Edition
2. *Systemwalker Desktop Petrol* Base Edition

### Features and Editions of *Systemwalker Desktop Petrol*

Main Features	Base Edition	Standard Edition
