Palm Vein Authentication “PalmSecure™ ”

■ PalmSecure™

■ Operating principal of Palm Vein Authentication

■ Leading-edge palm vein pattern authentication system

- Unique - vein patterns are unique to individuals and contain detailed characteristics
- Accurate - advanced matching algorithms produce high level of accuracy
- Universal Applicability - technology can be used by virtually everyone
- Versatile - readily deployable to wide range of applications
- Hygienic - contact-less user interface addresses hygiene concerns
- Non-invasive - simple to use user interface promotes high level of user acceptance
- Reliable - field proven technology with built-in forgery protection
