

# ***TRIOLE***

***- IT industrialization is here,  
and it works -***

May, 2006  
Fujitsu Limited

# What Business Needs

- **Efficiency**
- **Continuity**
- **Agility**

# Industrialized IT Infrastructure

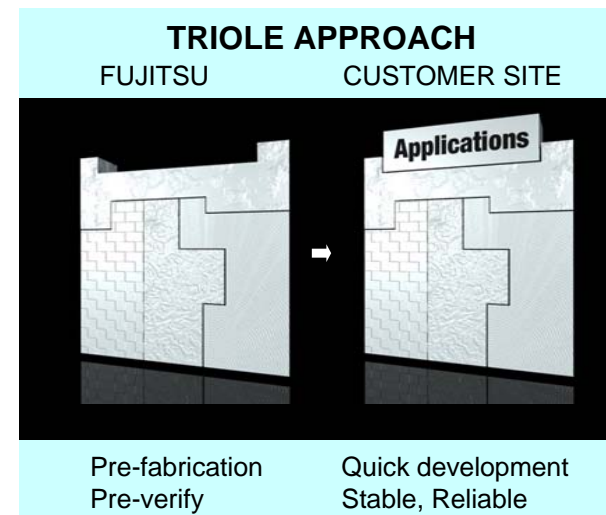

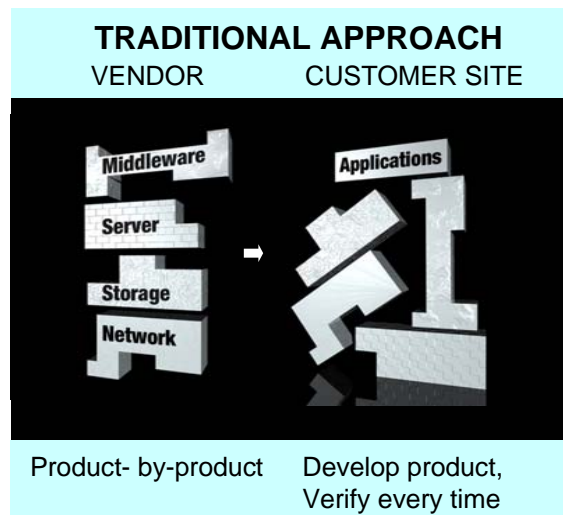

- Consistency of manufactured goods
- Standardized form and performance

Built-from-scratch infrastructure cannot meet these needs because they are:

- Expensive to implement or support
- Unreliable
- Inflexible

Industrialized IT infrastructure can meet all three because it is:

- Already virtualized and automated
- Repeatable at low cost
- Easy to maintain, change and grow

**Fujitsu TRIOLE is the process for creating Industrialized IT infrastructures and services**

- **Continually refined**
- **Standardized**
- **Usable in many different applications**
- **Technology-neutral**

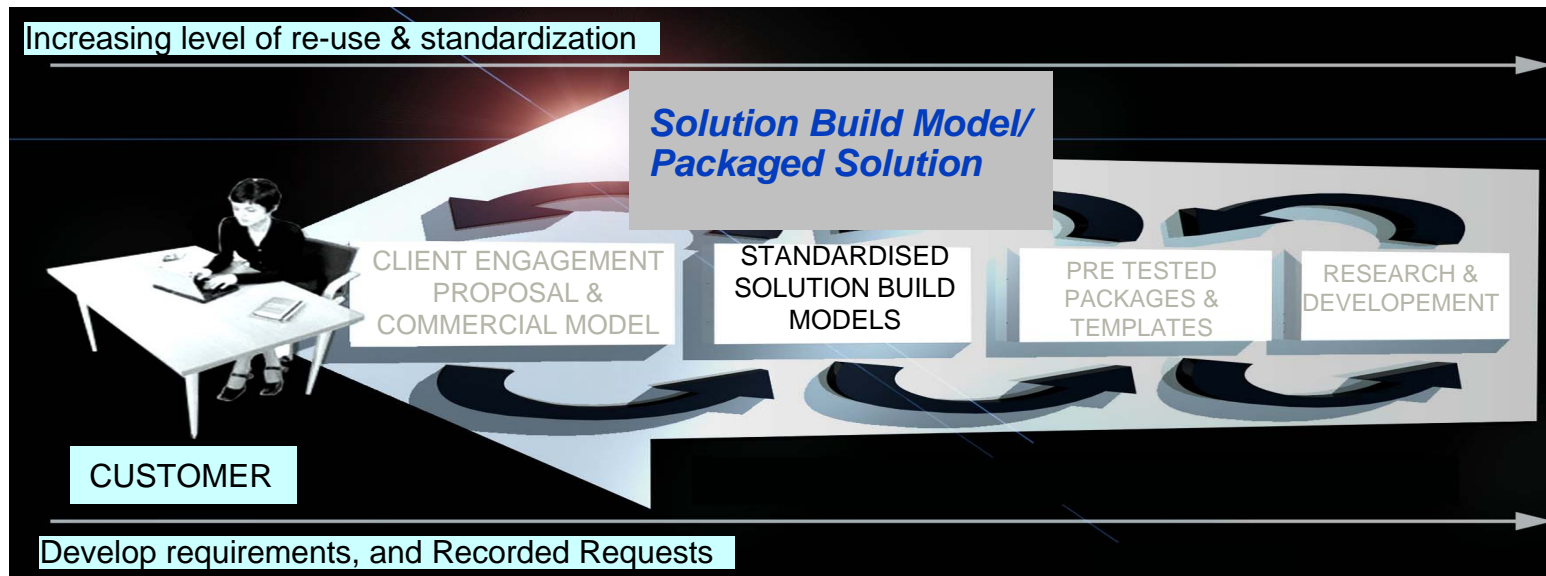

# TRIOLE Development Process

## - Step1: Solution Build Model -

Fujitsu designs, runs bench tests and refines a infrastructure solution as a ***Solution Build Model (SBM)***. ***Packaged Solution*** is a SBM tuned for specific application.

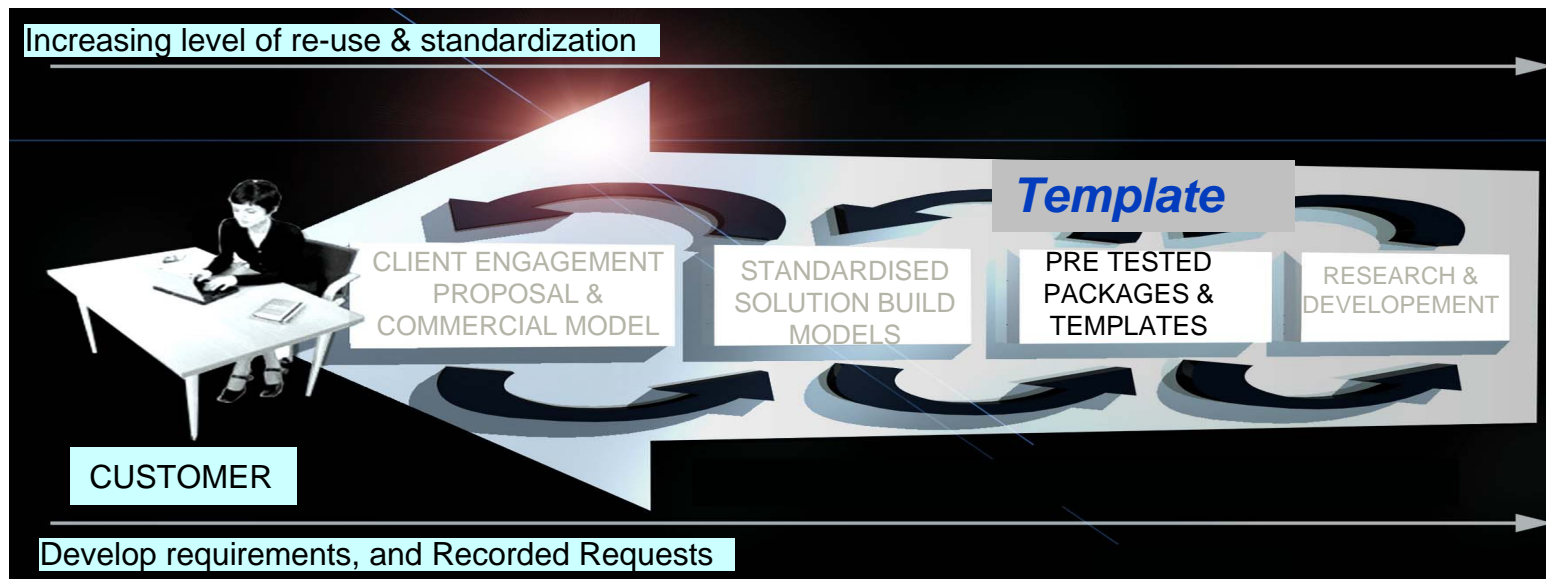

- Stable business development
- Cost reduction through pre-verification
- Works the first time

# TRIOLE Development Process

## - Step2: Template -

Where there are multiple demands, a *Template* is created, making all or parts of the model repeatable and modular

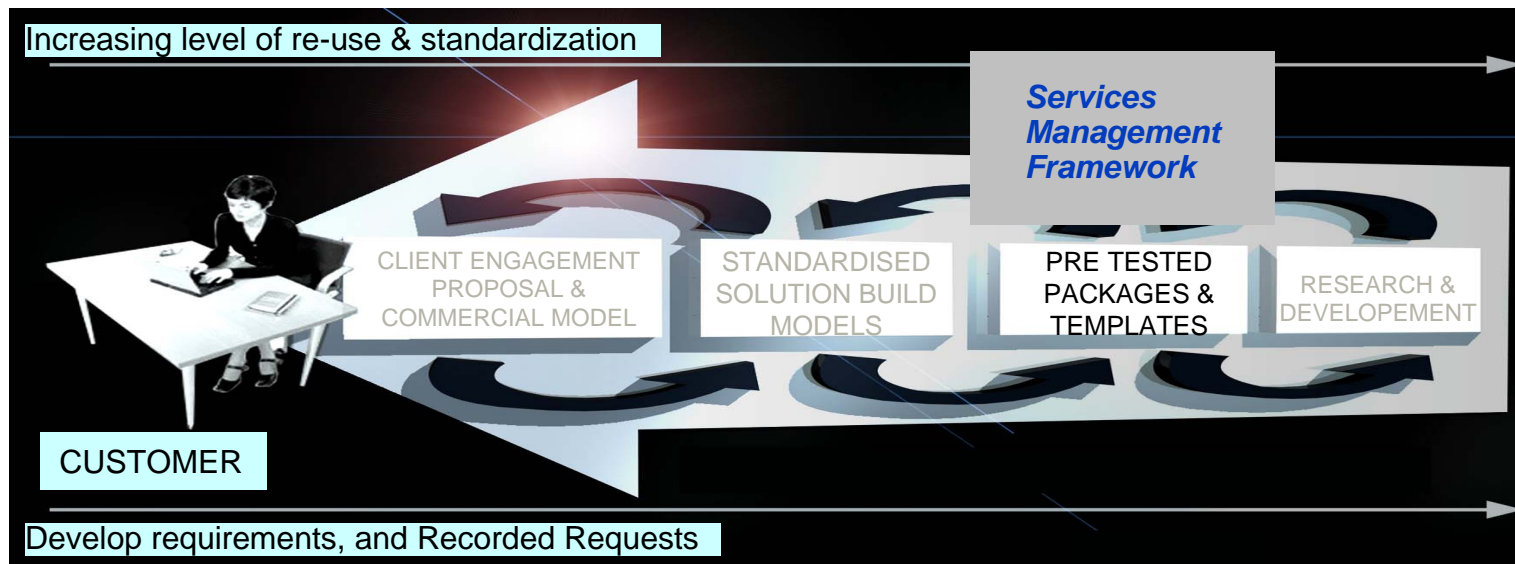

- Robust and secure system through verification
- Flexible and repeatable for change
- Works the first time

# TRIOLE Development Process

## - Step3: Services Management Framework -

The TRIOLE *Services Management Framework* gives you industrial levels of support consistency that is ITIL and ISO 20000 compliant.

- Less maintenance and effort
- Reduced operational cost
- Standardized service delivery

# TRIOLE Core Technologies

## ■ Virtualization

*Separate service / application from dedicated hardware*

## ■ Automation

*IT resources are assigned to services / applications based on business priorities*

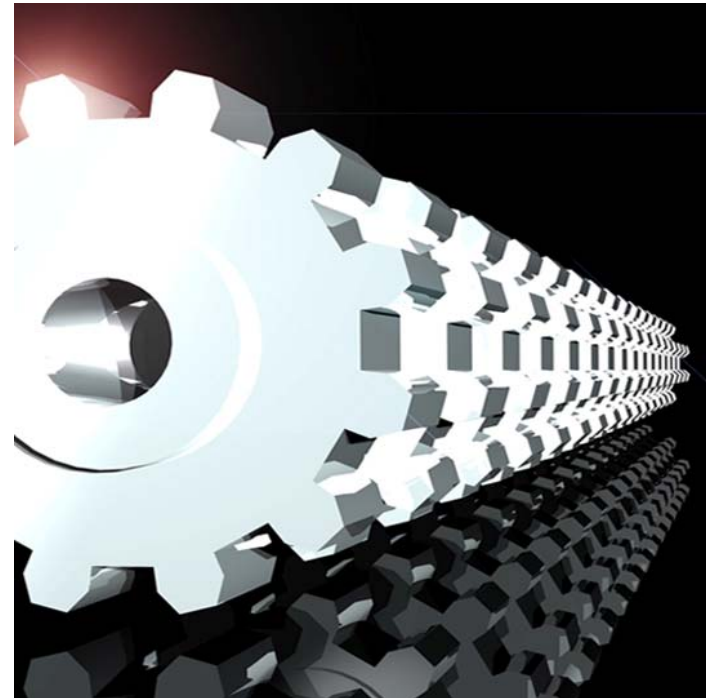

**Automation and Virtualization being already built in to Packaged Solutions, Solution Build Models and Templates delivering the benefits without the pain**

# TRIOLE Delivers Efficiency

- **Less maintenance**
- **Cost reduction through lifecycle**
- **Quick response for your business requirements**
- **Higher resource utilization**

# TRIOLE Delivers Continuity

- **High-availability**
- **Mission-critical**
- **Robustness & reliability**
- **Secure**

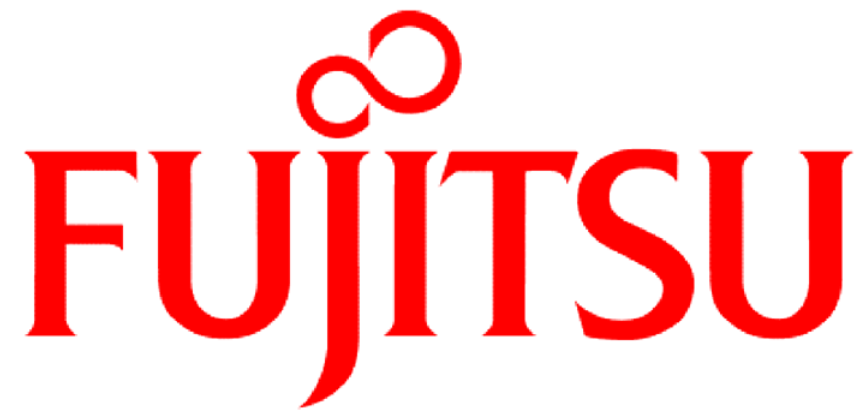

# TRIOLE Delivers Agility

- **Easy and inexpensive to change**
- **Grows as your business grows**
- **Allows your business to be faster on its feet**
- **Works the first time**

**FUJITSU**

**THE POSSIBILITIES ARE INFINITE**
