

Accelerate your journey to AWS

Overview

Fujitsu Cloud Service for AWS cuts through the complexity so your business can quickly exploit everything AWS has to offer.

Amazon Web Services (AWS) enables your business to thrive in the digital age. It offers leading development tools and cutting-edge technologies that can transform how your organization operates. But moving to AWS is a complex process – especially if you have critical legacy systems and well-established processes and procedures in place. This complexity can mean a lengthy and costly migration with greater operational risk.

Fujitsu Cloud Service for AWS provides the simplicity you need. Our transparent approach offers you way to accelerate your journey to AWS. If you want to take full advantage of AWS, Fujitsu Cloud Service for AWS will get you there safely and quickly.

Key benefits

- End-to-end services: Co-Creation, Modernization, and Optimization.
- Well-established methodology and clear cost structure so no hidden surprises.
- Bespoke and standardized services depending on your needs.
- Pick and choose what you need us to do and what you want to do yourselves.

Why Fujitsu?

- One of the world's largest IT service providers with insight into the full potential of AWS.
- Focused on business outcomes, not just technology. We ensure that technology change delivers your organization real business benefit.
- We deliver within every recognized Standard and legislation for different markets, including ISO20k, ISO27017, PCI, SOX, and GDPR.

shaping tomorrow with you

What can I expect?

Fujitsu Cloud Service for AWS offers a complete portfolio of services to support your journey to AWS. With a defined deliverable approach, we simplify key areas of your AWS planning, migration and on-going management.

1. Co-Creation

- Business Accelerator
- Strategic Assessment Service
- Roadmap

Fujitsu Cloud Service for AWS Co-Creation lays the foundations to speed up your migration to AWS. Our four-stage process includes:

- Business Accelerator – Defines your AWS strategy and creates an action plan with quick wins.
- Strategic Assessment Service – A 360° view of your estate, including people and technology elements.
- Roadmap – A detailed programmatic plan of your journey to AWS and beyond, utilizing the in depth information from the Strategic Assessment Service. A detailed programme plan will be put together to deliver your transformation to AWS.

2. Modernization

- Infrastructure and Connectivity Modernization
- Application and Database Modernization
- Organizational Modernization

Fujitsu Cloud Service for AWS Modernization keeps you on-track so you can exploit the benefits of AWS faster. It focuses on three key areas that can make or break your migration:

- Infrastructure and Connectivity Modernization – Architect, Build and Configure, and Test services for your entire estate.
- Application and Database Modernization – Cost-effectively re-host, re-platform, or re-architect your applications.
- Organizational Modernization – A change program covering your people, services, and business processes.

3. Optimization

- Infrastructure Management
- Application Monitoring

Fujitsu Cloud Service for AWS Optimization saves you time so you can take advantage of AWS. It gives you the flexible services you will need to simplify, manage and improve the way you use AWS, including:

- Infrastructure Management – Delivers the most value from your estate and new AWS products.
- Application Monitoring – Offers performance insights to improve digital experiences, in partnership with Dynatrace.
