IP-HE900E V01L020 Enhancement List

☐ Modified Items

No.	Affected region & Version	Description
1	V01L001～V01L011	Addressing CVE-2022-4304: OpenSSL vulnerability issue.

IP-HE900E V01L011 Enhancement List
(Released Date: July 26th, 2023)

☐ Modified Items

No.	Affected region & Version	Description
1	V01L001～V01L010	CVE-2023-38433: Vulnerable to use of hard-coded credentials Addressing the above problem that authentication information of the Web interface of the product may be obtained by reverse engineering, etc.

IP-HE900E V01L010 Enhancement List
(Released Date: February 16th, 2023)

☐ New Features

No.	Item	Description
1	Video cording method	Supports video encoding H.265/HEVC.

IP-HE900E V01L003 Enhancement List
(Released Date: September 20th, 2022)

☐ Modified Items

No.	Affected region & Version	Description
1	V01L001～V01L002	Addressed issue when the unit started with the down converter set to LetterBox, a rectangular green blink appears in the upper left of the screen.
2	V01L001～V01L002	Improved TTS timestamp (27 MHz counter) accuracy.

Enhanced Items

No.	Item	Description
1	Latency	When Encoding control mode is other than Ultra Low Latency, the latency is reduced by one encode frame. The reduction time depends on the encoding frame rate.
2	Video fidelity	Video fidelity improvement when Encoding control mode is set to Low Latency (PPPP) or Ultra Low Latency.
