# FUJITSU Network IP Pathfinder S English Guidance Service User Guide

Thank you for your purchase of the Fujitsu communication system.

This user guide is intended for users of its telephones and system administrators, and the user guide explains the functions and operation of the Fujitsu communication system.

The user guide also provides important information on using this product safely.

Before using this product, read this user guide thoroughly.

Keep this user guide handy in a safe and convenient location for quick reference during use of the product.

Fujitsu makes every effort to prevent users and bystanders from being injured and to prevent property damage. To ensure no harm to you and bystanders, and no damage to the equipment itself, be sure to use the product in accordance with the instructions in this user guide.

This Product is designed, developed and manufactured as contemplated for general use, including without limitation, general office use, personal use, household use, and ordinary industrial use, but is not designed, developed and manufactured as contemplated for use accompanying fatal risks or dangers that, unless extremely high safety is secured, could lead directly to death, personal injury, severe physical damage or other loss (hereinafter "High Safety Required Use"), including without limitation, nuclear reaction control in nuclear facility, aircraft flight control, air traffic control, mass transport control, medical life support system, missile launch control in weapon system. You shall not use this Product without securing the sufficient safety required for the High Safety Required Use. If you wish to use this Product for High Safety Required Use, please consult with our sales representatives in charge before such use.

#### CAUTION

This is a Class A product.

In a domestic environment this product may cause radio interference, in which case the user may be required to take corrective actions. VCCI-A

- This telephone system is designed for use in Japan only and cannot be used in any other country.
- The specifications and information provided herein are for informational purposes only and are not a warranty of actual performance, whether expressed or implied. the specifications and information are subject to change without notice. Actual performance may vary based on individual configurations, use of collateral equipment, or other factors.
- This telephone complies with certification of technical standard conformance.

This user guide prohibits copying, and transcribing the content of the description of this user guide without the permission of the publisher.

#### About this user guide

The user guide also provides important information on using this product safely. Before using this product, read this manual thoroughly.

Especially, please use this product after you read "IMPORTANT NOTE TO USERS" described in user guide, and you understood. Moreover, please keep this book importantly.

We will explain some of telephone function on this user guide. Please see the IP Pathfinder S family's user guide ( $\otimes$ ) in detail.

☆ IP Pathfinder S family's user guide : IP Pathfinder RM10S GSM series, IP Pathfinder S

#### Conventions for Alert Signals

This user guide uses the following conventions to alert users to potential injury to themselves or bystanders and to potential property damage.

 $\lceil \underline{\land} DANGER \rfloor$  indicates a hazardous situation likely to result in serious personal injury if the user does not perform the procedure correctly.

 $f \land MARNING_J$  indicates a hazardous situation could result in serious personal injury if the user does not perform the procedure correctly.

 $\int \underline{\Lambda}$  CAUTIONJ indicates a hazardous situation could result in minor or moderate personal injury if the user does not perform the procedure correctly. This alert signal also indicates that damages to the product or other property, may occur if the user does not perform the procedure correctly.

#### Safety Precautions

Follow the safety precautions given below when using the telephone, and the AC adapter (these components are hereafter collectively referred to as the equipment). Improper handling of the equipment or failure to observe the precautions may expose users and bystanders to harm, lead to property damage, and may harm the environment and lead to injury and/or economic loss to third parties.

Anger 🕂

#### (1) Uses

Notes on the AC adapter	• Use the dedicated AC plug of the equipment. Otherwise, a fire electric shock, or product failure may occur.
·i	The dedicated AC plug

: FC164H12 (The dedicated AC plug of FC780BM)

WARNING

(1) Uses

Notes on reasonably foreseeable incorrect uses  Do not spill liquid on the equipment, and do not immerse the equipment in any liquid. Otherwise, a fire, electric shock, or product failure may occur.

- Do not place the equipment near vases, flowerpots, glass, toiletries, containers of chemicals or liquids, and small metal objects. If liquid from a container were to spill onto the equipment, or if a foreign object were to get inside the equipment, a fire, electric shock, or product failure may occur.
- Be careful to not expose the equipment to insecticide or hair spray or cleaning spray (one including inflammable) etc. Otherwise, a fire, electric shock, or product failure may occur.
- Ensure that no foreign object such as clips and staples gets through openings and inside the equipment. Otherwise, a fire, electric shock, or product failure may occur.
- Do not place the equipment in a location that is not stable, such as on a wobbly stand, or in a location that is at an incline. Otherwise, the equipment may be drop off or fall over because of a problem with balance, which may cause an injury or product failure.
- Placing the AC adapter or the equipment in a microwave oven or high-pressure container could cause it to generate excessive heat, explode, or ignite, or a product failure.
- Prohibition against disassembly and modification
  Notes on the connection device
  Do not disassemble or modify the equipment. Do not overhaul or rebuild a used product for the purpose of reusing it. Otherwise, a fire, electric shock, or product failure may occur.
  Do not use a modified device in the equipment. Otherwise, a fire, electric shock, or product failure may occur.
  - Do not damage, break, or modify the cable. Otherwise, a fire, electric shock, or product failure may occur.
  - Ensure that no heavy or flammable object rests on the cable. Otherwise, they may become damaged, which may result in a fire, electric shock, or product failure.
  - Do not place the cable near a heater. Otherwise, the coating of the cord may melt, which may result in a fire, electric shock, or product failure.
  - Do not bend the cable. Otherwise, they may become damaged, which may result in a fire, electric shock, or product failure.

Notes on the cables

#### (2) Maintenance and inspection

Restriction and
prohibition
concerning
inspections
(maintenance
personnel)

 If inspection of the inside of the equipment or repair work is required, ask the shop where you purchased the equipment to carry out the work. Such work may result in an electric shock, injury, or product failure.

 If the equipment is emitting smoke or an abnormal odor, contact the shop where you purchased the equipment after taking the following action. For the telephone, remove the AC adapter and cable to turn off the telephone. For the connection device, use the power switch to turn off the system.

CAUTION

#### (1) Uses

Notes on the	
operating	
environment	

• Do not place the equipment in a location where it is hot or exposed to direct sunlight. Otherwise, the inside of the equipment becomes hotter, which may cause a fire or product failure.

- Do not place the equipment in a location that is extremely hot or cold or in a location that has large fluctuations in temperature. Otherwise, a fire, electric shock, or product failure may occur. (Use the equipment at a temperature ranging from 0°C to 40°C.)
- Do not set up or use the equipment in wet locations, such as in a bathroom and near a humidifier. (Use the equipment in an environment where the humidity ranges from 20% to 80%.)
- Do not place the equipment in a location where oil may splash on it, such as near a cookstove, or in a wet or dusty location. Otherwise, a product failure may occur.
- Do not place the equipment on an object that tends to accumulate static electricity, such as rugs and carpets. Otherwise, a fire, electric shock, or product failure may occur.
- Do not place the equipment in a location where the equipment is exposed to harmful gases, such as sulfur gas and the exhaust gas from automobiles. Otherwise, a fire, electric shock, or product failure may occur.
- Do not place the equipment in a location where the equipment is exposed to air from a nearby sea. Otherwise, a fire, electric shock, or product failure may occur.

Notes on reasonably	Ensure t	hat no	object	rests	on	the	equipmer	nt. The	object	may drop
foreseeable incorrect	off the	equipm	ent or	fall	over	, wh	ich may	cause	a fire,	electric
uses	shock, ir	njury,	or produ	uct fa	ilure	e.				

- Do not place the equipment near an unstable object that is likely to fall over easily. Such an object may drop off or fall over, which may cause a fire, electric shock, injury, or product failure.
- When mounting the equipment on a wall, be careful to make sure that the equipment cannot fall off. Otherwise, a fire, electric shock, injury, or product failure may occur.
- Do not place the equipment in a location that is exposed to frequent vibrations or impacts. Otherwise, the equipment may drop off or fall down, which may cause a fire, electric shock, injury, or product failure.
- Do not set up the equipment in a passageway. Otherwise, people may trip over the equipment, which may result in an injury or product failure.

#### (2) Maintenance and inspection

Inspection and	If drops of water are found on the equipment, wipe them up wit	:h a
cleaning	dry cloth. Drops of water left on the equipment may cause a	fire,
· · · · · · · · · · · · · · · · · · ·	electric shock, or product failure.	

• If the equipment is dirty, clean the equipment by wiping it with a soft dry cloth. Avoid using organic solvents, such as benzine and thinner. Otherwise, the equipment may corrode or melt, which may result in a fire, electric shock, or product failure.

#### (3) Disposal

,	1
Notes on disposal of	i.

### OUTGOING CALL LOG AND INCOMING CALL LOG

#### Specification

Following PBX can use this function. And there is PBX that can't use this function by the version of PBX's software. Please contact the purchased shop in detail.
 ※ PBX that can use this function.
 IP Pathfider S family : IP Pathfinder RM10S GSM/GSM L. IP Pathfider S

- This telephone has the function of 8\* outgoing call log and 8\* incoming call log (using PBX's service
- function). If the call log becomes more than the registered number, it deletes oldest call log.
- \*: 20 for IP Pathfinder S Version 5 or later.
- The call log can operate only on-hook.
- If you are making a call or answering a call at the same telephone number as the call log that has already been registered, the call log is overwrited.
- This telephone can't display the information registered in the local telephone directory when you are making a call and answering a call.
- You can't see the call log while talking over the telephone.

#### Caution

When your telephone rings, the call log is displayed by pushing "outgoing call log button" or "caller's number save dial button". But if you push the UP/DOWN button to confirm the call log, the volume of the ringing tone changes at the same time as the content of the call log changes. Please note it.

# ABOUT OUTGOING CALL LOG

This is using <code>FOUTGOING CALL LOGJ</code> of <code>PBX</code>'s service function.

- The outgoing call log can register extension (forwarding is included), and the outside line, and one-touch dial. The outgoing call log is automatically registered.
- The outgoing call log can register to 8\* telephone numbers per a telephone, and can register up to 15 digits per a telephone number.
  - \*: 20 for IP Pathfinder S Version 5 or later.
- If the call log becomes more than the registered number, it deletes oldest call log.
- If you register the same telephone number in outgoing call log, the registered same older log is deleted.
- If you press 0 dial when the outgoing call log was displayed, the displayed outgoing call log is deleted and the next outgoing call log is displayed.
- If you lift a handset when you receive an incoming call while outgoing call log is displayed, you can't answer a call. Please lift a handset after pressing the FOUTGOING CALL LOG button whenever answering.

Method of operating the outgoing call log

#### Press the OUTGOING CALL LOG button.

The telephone changes the screen of the outgoing call log, and displays the telephone number of the outgoing call log. The lamp of outgoing call log button lights in red.

#### 2 Press $\blacktriangle$ or $\checkmark$ of $\bigcirc$ button.

0312345678

Please press the button until a desired telephone number is displayed.

3 You lift the handset or press the speaker button if a desired telephone number is displayed.

The conversation begins when the calling party answers. The lamp of OUTGOING CALL LOG button is turned off.

If you discontinue calling from OUTGOING CALL LOG, you replace the handset or press the speaker button.

# ABOUT INCOMING CALL LOG

This is using [CALLER ID SAVE DIAL] of PBX's service function.

- You can save manually the caller ID in two-party conversation at the outside line.
- The caller ID can register up to 8\* telephone numbers per a telephone, and can memorize up to 15 digits a telephone number.

\*: 20 for IP Pathfinder S Version 5 or later.

- If the INCOMING CALL LOG has already been registered 8 telephone numbers at 'the automatic save function' and 'the manual save function', the oldest telephone number is deleted.
- The automatic save function can work in the incoming call from the various outside line. (direct in-line, direct line, floating line, dial-in, ISDN dial-in, addition number dial-in, caller ID dial-in). However, the direct line and the floating line is saved automatically when you answer a call.
- The automatic save function and the manual save function is set with the special number (The example:130, 1(automatic operation), and 0(manual operation)).
- Please contact the purchased shop about the setting of the caller ID save dial.
- If you press 0 dial when the incoming call log was displayed, the displayed incoming call log is deleted and the next incoming call log is displayed.
- If you lift a handset when you receive an incoming call while incoming call log is displayed, you can't answer a call. Please lift a handset after pushing the 「caller ID save / display」 button whenever answering.

■ Method of operating the incoming call log

1 Press the CALLER ID SAVE / DISPLAY button.

The telephone changes the screen of the incoming call log, and display the telephone number of the incoming call log.

#### 2 Press ▲ or ▼ of (○) button.

Please press the button until a desired telephone number is displayed.

3 You lift the handset or press the speaker button if a desired telephone number is displayed.

The conversation begins when the calling party answers.

If you discontinue calling from INCOMING CALL LOG, you replace the handset or press the speaker button.
