# **FUJITSU Software**

ServerView Infrastructure Manager Plug-in for

VMware vCenter Server Appliance 1.1

# Setup Guide

For vCenter Server Appliance 6.5

CA92344-2188-01 Dec, 2017

# Preface

# Purpose

This Setup Guide describes the installation procedure, precautions on usage and information for FUJITSU Software ServerView Infrastructure Manager Plug-in for VMware vCenter Server Appliance 1.1 (hereafter referred to as "ISM Plug-in").

#### Index

- 1. Product Summary
- 2. <u>Contents</u>
- 3. <u>Software Requirements</u>
- 4. Installation Procedures
- 5. Folder Structure after Installation
- 6. <u>How to utilize ISM</u>
- 7. Uninstallation Procedure
- 8. Precautions
- 9. Latest Information

#### **Intended Readers**

This guide is designed for readers who have sufficient knowledge on hardware and software, such as system administrators, network administrators, facility administrators and related service providers.

#### Notation in this guide

Notation

Keyboard

Keystrokes with no printed characters are displayed by key icons, such as [Enter] or [F1]. For example, [Enter] means press key labeled [Enter].

Multiple lines

Thick multiple lines are ruled before the important information for each procedure as follows:

#### Point

Describes important information for each subject.

#### Note

Describes subjects where attention is necessary.

#### Variables: <xxx>

Represents variables that can be replaced by numerical values or text strings in accordance with the environment.

Example: <IP address>

#### Abbreviations

In this guide, the following abbreviations may be used.

Product Name	Abbreviation
FUJITSU Software ServerView Infrastructure Manager	ISM
FUJITSU Software	ISM Plug-in
ServerView Infrastructure Manager Plug-in for	
VMware vCenter Server Appliance	
VMware vCenter Server Appliance	vCSA

#### Terms

For the major terms and abbreviations used in this manual, see "ServerView Infrastructure Manager V2.2 Glossary."

#### **High Risk Activity**

The Customer acknowledges and agrees that the Product is designed, developed and manufactured as contemplated for general use, including without limitation, general office use, personal use, household use, and ordinary industrial use, but is not designed, developed and manufactured as contemplated for use accompanying fatal risks or dangers that, unless extremely high safety is secured, could lead directly to death, personal injury, severe physical damage or other loss (hereinafter "High Safety Required Use"), including without limitation, nuclear reaction control in nuclear facility, aircraft flight control, air traffic control, mass transport control, medical life support system, missile launch control in weapon system. The Customer shall not use the Product without securing the sufficient safety required for the High Safety Required Use. In addition, Fujitsu (or other affiliate's name) shall not be liable against the Customer and/or any third party for any claims or damages arising in connection with the High Safety Required Use of the Product.

#### Trademarks

Microsoft, Windows, Windows Vista, Windows Server, Hyper-V, Active Directory, and the titles or names of other Microsoft products are trademarks or registered trademarks of Microsoft Corporation in the United States and other countries.

VMware, VMware logo, VMware ESXi, VMware SMP, and vMotion are trademarks or registered trademarks of VMware, Inc. in the United States and other countries.

All other company and product names are trademarks or registered trademarks of the respective companies.

All other products are owned by their respective companies.

#### Copyright

Copyright Fujitsu Limited 2017 All rights reserved.

This manual shall not be reproduced or copied without the permission of Fujitsu Limited.

#### 1. Product Summary

This plug-in software is designed to extend the user interface of VMware vCenter Server Appliance (hereafter referred to as "vCSA") to enable the use of the functions of FUJITSU Software ServerView Infrastructure Manager (hereafter referred to as "ISM") from vCSA console to integrate the infrastructure management. This plug-in software enables you to operate ISM directly from the vSphere Web Client.

#### 2. Contents

This plug-in software is composed of the following five (5) files:

- ISMvCSA\_INSTALL.zip
- Readme.txt
- Readme\_en.txt
- Setup Guide (Japanese)
- Setup Guide (\*this document)

#### 3. Software Requirements

Applications that must be installed:

- FUJITSU Software ServerView Infrastructure Manager V2.0 or later
- VMware vCenter Server Appliance V6.5

No	ot	e
----	----	---

Because this plug-in does not support the HTML5 version, make sure to select the Flash version of vCSA6.5.

Applications that may help installation (recommended):

- SSH Terminal Software (ex.Tera Term)
- File Transfer Application (ex. WinSCP)

Minimum Browser Version Requirements:

- Microsoft Internet Explorer 10.0.19 or later
- \* For the 3D view functions of ISM, you must install the latest version; 11.0.19 or later
- Mozilla Firefox 34 or later

Google Chrome does not support ISM Plug-in (as of Jan, 2017).

Please refer to the User's Manual of ISM for more information.

#### 4. Installation Procedures

This section explains installation procedures of ISM Plug-in into vCSA.

Please execute the following seven (7) steps:.

- 4.0 <u>Before installation</u>
- 4.1 <u>Connect to vCSA with SSH</u>
- 4.2 <u>Allocate the install file into WinSCP</u>
- 4.3 <u>Unzip and execute the installation file</u>
- 4.4 Register the necessary information in ISM Plug-in
- 4.5 <u>Terminate the SSH connection to vCSA</u>
- 4.6 Import the SSL Server Certificates
- 4.7 How to use ISM Plug-in

#### Note

The following items and set ups must be completed before installation:

• Download the ISMvCSA\_INSTALL.zip file

The file can be downloaded from the designated folder.

- Activate SSH login on vCSA
  - Check the login status via the vCSA web console: [Administration] [Deployment] -[System Configuration] and select the designated node, [Manage] - [Settings] -[Access] Then check whether SSH login is enabled or not.
- Install a terminal emulator which can connect to SSH
  - In this guide, Tera Term is used. Change the commands accordingly if using another software.
- Install a software which can run SCP commands

In this guide, WinSCP is used. Change the commands accordingly if using another software.

#### Note

The commands and the messages in Tera Term are written in rectangle form.

- The commands are written in capitals and bold type.
- The wording of commands may vary depending on the version of Tera Term.
- Using the TAB function makes it possible shorten long keyboard commands.

#### 4.0. Before installation

#### Point

Uninstall the ISM Plug-in (version 1.0) in advance if it is already applied in ISM.

### 4.1. Connect vCSA with SSH

#### Point

Connecting vCSA to WinSCP while the shell is appliancesh(default shell) creates an error. Change the shell to bash shell before you start.

#### 4.1.1 Connect to vCSA with SSH

1. Open Tera Term and enter the host information. Then click [OK].

	Tera Te	erm: New o	connection		×		
TCP/IP	Host:	vCSA6.0			~	"Host"	must be an
	Service:	<ul> <li>History</li> <li>Telnet</li> <li>SSH</li> <li>Other</li> </ul>	TCP port SSH version: Protocol:	SSH2	~ C ~	IP addre register DNS.	ss or a name ed in the
⊖ Serial	Port.	COM1: 通	信ポート (COM1)		×		
	OK	Cancel	Help				

#### Point

If you receive a security warning message, kindly disregard and continue.

2. The SSH Authentication diagram is displayed. Enter [User name] / [Passphrase] and click [OK].

	SSH Authentication	- • ×	
Logging in to 10.20.2			
User name:			User name:root(Account name
Passphrase:			for vCSA]
	PRemember personal in memory		
	Forward agent		Passphrase : Password for
The plain pass	ord to log in		vCSA
	CDSA/ED25519 key to log in Private key file:		
O Une riterta ta k	ng in (59H1) Local user name:		
	Heat private key file:		
OUse challenge/	esponse to log in(keyboard-interactive)		
O Use Pageent to	i log m		
	OK Decennect		

3. The vCSA console is displayed as below:

4.1.2 Change the shell to bash shell.

```
Command> shell.set ---enabled True

Command> shell

------- !!!! WARNING WARNING WARNING !!!! -------

Your use of "pi shell" has been logged!

The "pi shell" is intended for advanced troubleshooting operations and while

supported in this release, is a deprecated interface, and may be removed in a

future version of the product. For alternative commands, exit the "pi shell"

and run the "help" command.

The "pi shell" command launches a root bash shell. Commands within the shell

are not audited, and improper use of this command can severely harm the

system.

Help us improve the product! If your scenario requires "pi shell," please

submit a Service Request, or post your scenario to the

communities. VMware.com/community/vmtn/server/vcenter/cloudvm forum.

localhost:" #
```

4.1.3 Change the default shell to bash shell while using commands for the procedures.

# chsh -s /bin/bash root
Changing login shell for root.
Shell changed.

- 4.2.1 Connect WinSCP to vCSA and allocate ISMvCSA\_INSTALL.zip file into the designated folder in WinSCP.
  - 1. Open WinSCP, enter the necessary information and click Login.

🌆 Login - WinSCP			- 🗆 🗙
New Site	Session Eile protocol: SCP Host name: vCSA6.0 User name: root Save	Passwo	
Tools	<u>1</u> anage 🔻	🔁 Login 🛛 🔻 🛛 C	ilose Help

2. Another dialog demanding to the user to enter a password is displayed. Enter the password again. 3. The WinSCP is now connected to vCSA.

4. Drag and drop the ISMvCSA\_INSTALL.zip file into the designated folder in the vCSA side in WinSCP.

#### Point

Transfer mode is changed to binary mode.

5. Close WinSCP.

#### 4.3. Unzip and execute the installation file

- 4.3.1 Unzip the ISMvCSA\_INSTALL.zip file.
  - 1. Unzip the ISMvCSA\_INSTALL.zip file using a command on Tera Term.

```
# unzip ISMvCSA_INSTALL.zip
Archive: ISMvCSA_INSTALL.zip
creating:ISMvCSA_INSTALL/
inflating:ISMvCSA_INSTALL/ISMvCSA_INSTALL.sh
extracting:ISMvCSA_INSTALL/ISMvCSA.zip
```

2. Confirm that the file is unzipped.

```
# Is -IR ISMvCSA_INSTALL
ISMvCSA_INSTALL:
total 3520
-rw----- 1 root root 3592765 Oct 25 08:01 ISMvCSA.zip
-rwx----- 1 root root 3265 Oct 25 11:07 ISMvCSA_INSTALL.sh
```

#### Note

Please note:

```
<u>ls</u> –<u>lR</u> ⇒ <u>"L in a small letter</u>"s –"<u>L in a small letter</u>"R
<u>*NOT " i " in capital letters.</u>
```

4.3.2 Install the ISM Plug-in into vCSA. Execute the ISMvCSA\_INSTALL.zip file.

# Note

After executing the file, vCSA automatically restarts. Wait until vCSA restart is completed.

# cd ISMvCSA_INSTALL # ./ISMvCSA_INSTALL.sh
Archive: /usr/lib/vmware-vsphere-client/plugin-packages/ISMvCSA.zip inflating: /usr/lib/vmware-vsphere-client/plugin-packages/ism/plugin-package.x
ml creating: /usr/lib/vmware-vsphere-client/plugin-packages/ism/plugins/
··· [omitted] ···
Start reboot! 

# Point

Wait for a while before reconnecting vCSA with SSH. For procedures to connect with SSH, see the 4.1 "<u>Connect vCSA with SSH</u>" section in this guide.

#### 4.4 Register the necessary information in ISM Plug-in

4.4.1 Register the necessary information in ISM Plug-in.

1. Add the environment variables in Tera Term.

# export LD\_LIBRARY\_PATH=\$LD\_LIBRARY\_PATH:/usr/lib/vmware-vpx/vimtop

2. Move to the ISM Plug-in directory.

# cd /usr/lib/vmware-vsphere-client/plugin-packages/ism/plugins/

3. Follow the directions and register the vCenter Server information in ISM Plug-in.

```
# ./ismvCenterConfig -a
Welcome to the setup wizard for vCenter registration. Please enter the following
information to register.
Please enter a IP address or FQDN of vCenter Server : <IP address or FQDN for vCSA>
Please enter a valid user name of vCenter Server : <administrator@vsphere.local>
Please enter a password for the user name : <*****>
Picked up JAVA_TOOL_OPTIONS: -Xms32M -Xmx128M
```

Registration completed successfully.

Point

• Execute the following command to check the registered information.

```
# ./ismvCenterConfig -I
```

Picked up JAVA\_TOOL\_OPTIONS: -Xms32M -Xmx128M

vCenter IP address or FQDN=<IP Address or FQDN for vCSA> Account=<administrator@vsphere.local>

• To correct or replace the server information, delete the information using the following command. Then register the information again.

# ./ismvCenterConfig -d <administrator@vsphere.local>
Picked up JAVA\_TOOL\_OPTIONS: -Xms32M -Xmx128M

Unregistration completed successfully.

4. Register the ISM server information in ISM Plug-in.

```
# ./ismServerConfig -a
Welcome to the setup wizard for ISM(ServerView Infrastructure Manager) Please enter
the following information to register.
Please enter a IP address or FQDN of ISM Server : <192.186.1.100>
Please enter a Port Number of ISM Server : <25566>
Please enter a valid user name of ISM Server : <administrator>
Please enter a password for the user name : <****>
Please enter a valid user name of vCenter that correspond to user name of ISM Server:
<administrator@vsphere.local>
Picked up JAVA_TOOL_OPTIONS: -Xms32M -Xmx128M
Registration completed successfully.</a>
```

#### Point

• Execute the following command to check the registered information.

```
# ./ismServerConfig -I
```

Picked up JAVA\_TOOL\_OPTIONS: -Xms32M -Xmx128M

```
ISM IP address or FQDN=<192.168.1.100> ISM Port=<25566> ISM Account=<administrator>vCenter Account=<administrator@vsphere.local>
```

• To correct or replace the server information, delete the information using the following command. Then register the information again.

```
# ./ismServerConfig -d <ISM user name>
```

Picked up JAVA\_TOOL\_OPTIONS: -Xms32M -Xmx128M

Unregistration completed successfully.

#### 5. Change the permission to "read only."

# chmod 644 /usr/lib/vmware-vsphere-client/plugin-packages/ism/plugins/conf/\*.xml

#### 4.5 Terminate the SSH connection to vCSA

4.5.1 Change the login shell to appliancesh.

# chsh -s /bin/appliancesh root

4.5.2 Enter the "exit" command twice and close Tera Term.

# Note

When there is no action for a set period of time, it automatically logs out.

timed out waiting for input: auto-logout

Enter the "shell" command and call the shell back.

#### 4.5 Import the SSL Server Certificate

#### 4.5.1 Import the SSL Server Certificate

#### Note

It is necessary to import the SSL Server Certificate in advance into the devices which should be connected to vCSA. \*\*Without Certificate, an error message appears.

1. Prepare the SSL Server Certificate.

#### Point

- Prepare the SSL Server Certificate referring to Chapter 4.6.1 "Deploying SSL Server Certificates" in the ISM User's Manual. Make sure to complete the certificate import on the intended devices.
- If using Firefox, refer to Chapter 4.1 "Startup of ISM GUI" in the ISM Start Guide to complete the certificate import.
- 2. From the browser on the intended devices, select [Internet options] under [Settings].

3. Select [Contents] and click [Certificates].

4. Click [Import] and launch the import wizard.

Certificate	s					×
I <u>n</u> tended p	urpose:	<all></all>				~

10. Click [Next].

11. Click [Finish].

compressing the con-	ificate Import Wizard
The certificate will be imported a	fter you click Finish.
You have specified the following	settings: Trusted Root Certification Authorities
Content Pile Name	Certificate Crillisen/operator_lDesktop/ca.ort.txt
(Market Carles	an been a first and the second second second second

12. Click  $\left[ \text{Yes} \right]$  on the security alert dialog.

Security	Warning	$\times$
	You are about to install a certificate from a certification authority (CA) claiming to represent:	
	ISM test CA	
	Windows cannot validate that the certificate is actually from "ISM test CA". You should confirm its origin by contacting "ISM test CA". The following number will assist you in this process:	
	Thumbprint (sha1): 85C89BB1 3B23E34B C847C4F3 45C66044 9A710E04	
	Warning: If you install this root certificate, Windows will automatically trust any certificate issued by this CA. Installing a certificate with an unconfirmed thumbprint is a security risk. If you click "Yes" you acknowledge this risk.	
	Do you want to install this certificate?	
	Yes No	

13. The message [The import was successful] appears. Click [OK] to close the dialog box.

14. Login to ISM and confirm that there are no errors.

# 4.6 How to use ISM Plug-in

- 4.6.1 How to use ISM Plug-in
  - 1. Start vSphere Web Client from your device.
  - 2. Click [Hosts and Clusters], or select <designated node> under [Datacenter].

Point

If the ISM system guide dialog appears, scroll down to the bottom right and click [Close]. Change the settings from [Help]-[System Guide] in ISM.

# 5. Folder Structure after Installation

The following is the folder structure after installation.

#### 6. How to utilize ISM

Please refer to the User's Manual of ISM for how to utilize each function of ISM.

#### 7. Uninstallation Procedure

For uninstallation, delete the designated directory by using the command below and restart vCSA manually.

# rm -rf /usr/lib/vmware-vsphere-client/plugin-packages/ism
# reboot

#### Point

It is necessary to change the shell to bash shell. For procedures to connect with SSH, see the 4.1 <u>"Connect vCSA with SSH</u>" section in this guide.

#### 8. Precautions

- 8.1 NOTE: To use ServerView Infrastructure Manager Plug-in for vCSA, purchase and installation of ISM is required. Without installing ISM, this plug-in does not work properly. Refer to the ISM User's Manual for more details.
- 8.2 NOTE: To use ServerView Infrastructure Manager Plug-in for vCSA, purchase and installation of vCSA is required. Without installing vCSA, this plug-in does not work properly. Refer to the product guides of VMware for more details.

### 9. Latest Information

For the latest information about ISM and ISM Plug-in, please contact your local support.
