Introducing – Developer and Integrator Program

Working with your development team to create a tailored document scanning solution for your customers

Recognising the need for sharing best practice, knowledge and experience with you, PFU Imaging Solutions Europe Limited have introduced the Developer and Integrator Program. This program offers you and your customers a better all round service.

Essentially, this will allow us to work closer with you, your applications and support you more proactively. This will allow you to gain a better understanding of our products, their appropriate environments and to recognise the areas and applications where they are suited.

Combine the knowledge of your software with our knowledge of deploying scanning to create a solution that is:
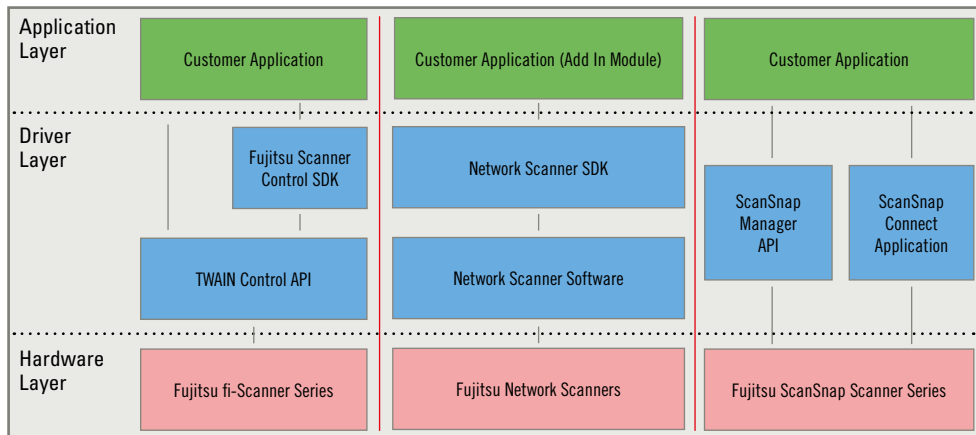

• Easy to develop

• Easy to install

• Easy to support

• Easy to operate

Providing maximum throughput and functionality for you and your customer.

shaping tomorrow with you

FUJITSU

Software Architecture Sample

Application Layer	Customer Application	Customer Application (Add In Module)	Customer Application
Driver Layer	Fujitsu Scanner Control SDK / TWAIN Control API	Network Scanner SDK / Network Scanner Software	ScanSnap Manager API / ScanSnap Connect Application
Hardware Layer	Fujitsu fi-Scanner Series	Fujitsu Network Scanners	Fujitsu ScanSnap Scanner Series

We can explore and integrate PFU technologies including Network scanner SDK, Scanner control SDK (TWAIN), ScanSnap integration, TWAIN API control and Scanner central administration software offering you prototype development and scanner interface support.

Please contact us with any questions or opportunities at sdk@fdg.fujitsu.com
