FUJITSU TeamPoS 7000 S-Series
Retail PoS Controller

Small Footprint, high performance, great connectivity and low energy consumption

The Fujitsu TeamPoS 7000 S-Series modular controller is available with a range of Intel® 4th generation Core™ processors from Celeron® to Core™ i5 to support the most demanding retail applications. With a volume of just 7 litres, it can be simply deployed in the most challenging environments. Enhanced connectivity, with powered USB and Serial ports, enables a full complement of retail peripherals to be connected and powered directly from the unit, removing the need for external power bricks so simplifying deployment and improving reliability. With its 90%+ efficient power supply, energy costs and heat output are minimised to deliver a low TCO and lengthen service life.

Compact Design with horizontal or vertical deployment
- Simple installation in the most constrained of environments. Can replace existing equipment without furniture changes. Provides maximum space at counter for other equipment, or display material

Intel® 4th Generation Core™ technology
- Future proof processing power from Intel® Celeron® processors to Intel® Core™ i5 processors scaling across the organisation. Latest AMT remote management technology reduce cost of ownership and helps increase availability

Great connectivity with full complement of retail ports and integrated dual storage drives
- Enhanced retail connectivity removes need for external power bricks and enables operation from single power outlet. This reduces installation costs, lowers energy consumption and improves reliability. Dual SSD / HDD storage drives with RAID delivers high levels of data protection

90% efficiency integrated power supply
- Reduces energy costs and carbon footprint. Lower heat output reduces store cooling costs and improves reliability. Patented power management controls processing power during peak peripheral demand to ensure reliable operation

Made in Germany in state of the art automated factory
- Quality manufacturing and engineering processes, with selected long-life components, ensures trouble-free 24x7 operation in retail environment
