FUJITSU

Fact sheet
Fujitsu PROGRESSION RPG to .NET – Smart Move Made Simple

Fujitsu is a leading provider of customer-focused information technology solutions for the global marketplace. Fujitsu's Legacy Modernization Services enable organizations to leverage the years of investment in software assets, deliver more from IT budgets and reduce the risk of implementing new technologies.

The offering

Fujitsu PROGRESSION service offering / tool suite (to .NET) offers the best solution to support migration from older systems such as AS/400® and iSeries to Microsoft .NET. Our expertise in legacy system Modernization protects your organization's valuable systems so that our clients stay competitive with cutting edge technology.

Fujitsu rely on our listening skills, ingenuity, and attention to detail to craft your unique solution. The foundation of Fujitsu services is a combination of our experts and solutions to assist you from the initial diagnosis via Proof of Concept (PoC), to fully understanding your needs, to development and delivery, and full support of the total solution.

Business Challenges:

- For 66% of AS/400 installations, lack of trained staff is the biggest concern
- More than half of AS/400 users are dissatisfied with RPG green screen applications
- Ability to meet programming requirements
- Concern about aging hardware and cost

Fujitsu Solution:

- RPG, CL and DDS migrated to Microsoft® .NET (VB, C#)
- DB2 data files converted to SQL Server® 2008 tables (retaining the database on System i also available)
- Automated conversion executed via our proven tool set
- Not a black box solution – we deliver the source code
- Based on the successful Fujitsu legacy modernization solution implemented at Washington State Department of Licensing

Business Benefits
Key benefits delivered by the Fujitsu solution include:

- Business logic is unchanged: You maximize your investment in your existing applications
- No additional Fujitsu software licensing fees or upkeep
- Users do not require retraining: Look-and-feel and functionality are consistent with the legacy implementation
- No more hassle with terminal emulation and client-side components: Migrated RPG applications become web-based

Now you can embrace change: .NET enables you to quickly and easily enhance migrated applications; you can leverage a powerful development environment, Visual Studio® 2008, along with a trusted data management system, SQL Server 2008
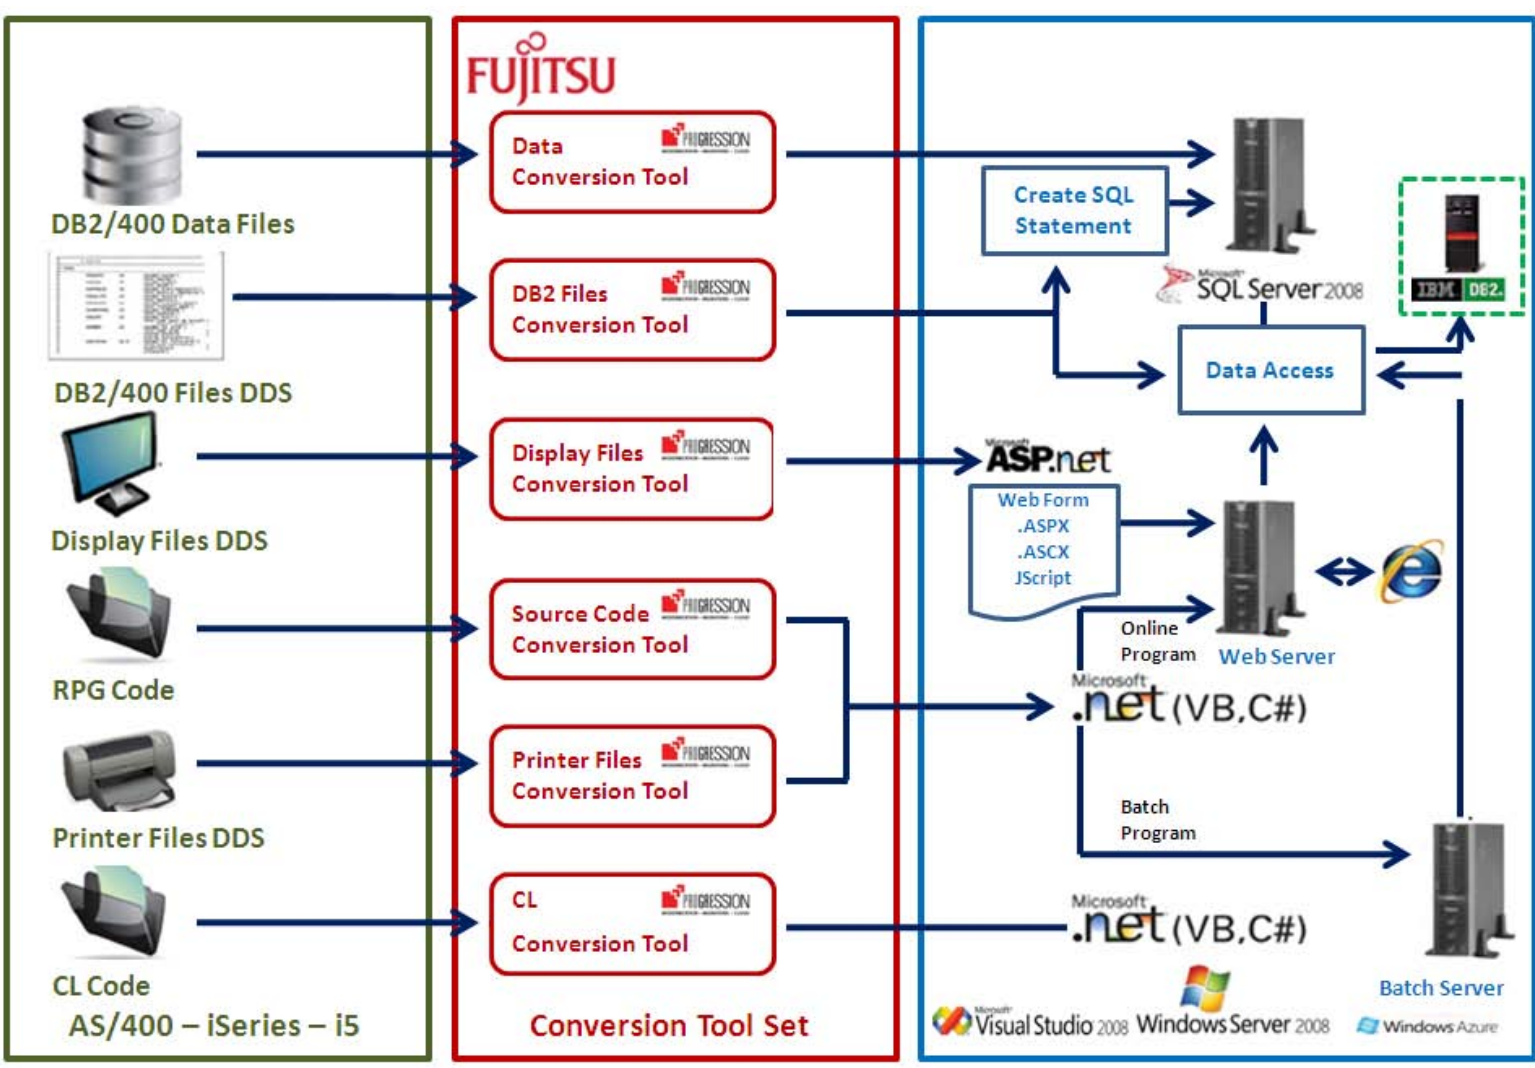

Experience the Fujitsu Difference

Progression from the legacy RPG applications to .NET is the smart way for companies to stay competitive with cutting edge technology. Fujitsu PROGRESSION offers a solution to revitalize and protect your organization's valuable systems. We rely on our listening skills, ingenuity, and attention to detail to craft your unique solution. Because you own the source code, it allows you to maintain your organization's internal repairs and provide immediate solutions independently going forward. Benefits include no additional Fujitsu software licensing fees or upkeep; intact business logic; and fast, simple, flexible deployment.

We work with you to create solutions and produce results that drive your business.

Please Tell Me More?

Fujitsu would be pleased to talk to you further about how we can work together to help you leverage the investments your organization has made in legacy applications.

If you would like to talk to us in person, please send an email to the Legacy Modernization team in your local area. Email addresses are on the final page of this brochure.

Or visit our website and take an online survey.
