SAP **DISCOVERY SYSTEM** for enterprise SOA

Server + Software + SOA Applications = easy evaluation of Enterprise SOA scenarios. The SAP Discovery System software for enterprise service-oriented architecture (enterprise SOA) was created specifically to help customers and partners map their paths to successful adoption of enterprise SOA.

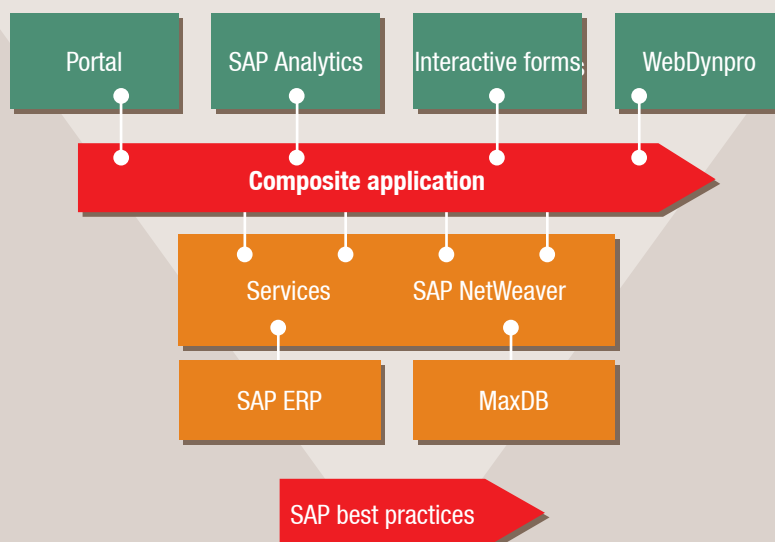

With the SAP Discovery System, enterprise architects, business process experts, IT development teams, consultants and systems integrators can effectively accelerate their learning curve with composite applications and SOAs. The SAP Discovery System will enable them to test-drive the simplicity and flexibility of composing new business processes using enterprise services in a stand alone SOA environment.

They also have a head start on using key SAP software, such as analytics and role-based portals, in conjunction with service-based applications.

Ultimately, businesses using SAP Discovery System will take a large, low-risk step forward on the path to enterprise SOA and will begin to benefit immediately from the competitive advantages of this new and important IT paradigm.

THE SAP DISCOVERY SYSTEM

SAP Discovery System V3

With the SAP Discovery System for enterprise SOA, you get a complete, fully documented system with standard SAP software components for developing and delivering service-based applications, including all the interfaces, functionality, data and guidance necessary to run a complete end-to-end business scenario.

The benefits of this are:
- Pre-installed, pre-configured and ready-to-go on an appropriately configured server that can be ordered directly from Fujitsu
- Landscape which allows you to accelerate your team's learning and experience. You will gain skills and experience which will enable you to cut your time to evaluate the Enterprise SOA of SAP
- Out-of-the-box demonstrations, business process scenarios and exercises
- Customer specific enterprise SOA coaching workshop available.

Included software:
- SAP ERP 6.0 SP09 (ECC 6.0) and ERP Enhancement Packs 1+2
- MaxDB 7.6
- SAP NetWeaver® 7.0 SP12 platform components:
  - SAP NetWeaver® Portal
  - SAP NetWeaver® Master Data Management (5.5 SP05)
  - SAP NetWeaver® Process Integration
  - SAP NetWeaver® Business Intelligence
  - SAP NetWeaver® Application Server
  - SAP NetWeaver® Visual Composer Tool
- SAP Solution Manager 4.0
- Pathfinder for Business User
- RFID (AII 5.1)
- GTS 7.1
- xMII 11.5
