

Data protection that measures up

FUJITSU

Fujitsu ETERNUS CS

The ultimate data protection, backup and archiving.

Not all data is created equal. Surely then this means it doesn't all need mirroring and snapshotting, nor have long retention on disk.

DID YOU KNOW THAT

65%

OF ALL DATA IN THE ENTERPRISE IS A COPY

"It maybe that you're running out of storage capacity."

Or perhaps your backup window is too short to complete because that extra data you're dealing with has become too difficult to manage or has outgrown your budget.

"ETERNUS CS IS THE RIGHT TOOL FOR THE JOB."

It balances the speed and convenience of disk with the low cost of tape without the risk, complexity and management overhead.

DON'T TAKE OUR WORD FOR IT

Read the customer reviews below and take a look at our data protection resources...

ETERNUS shortens your backup and recover times

"If we started the backup process at 6am on Saturday, it would take us until Monday or Tuesday to complete.

With the new ETERNUS CS High-End data protection appliance our performance has increased by 50%"

Ulrich Voß,
Technical Director, GKD Paderborn
