Infrastructure blueprint for **further education**

1.0
It's a pivotal step for students. They're learning more and more, and they demand more from teachers and resources.

2.0
But what happens if their expectations aren't met? And if you can't give them the answers they need?

3.0
With the right technology, this won't be the case. They get uninterrupted teaching, and the best resources around.

The biggest benefits delivered to City College Coventry

Opening up new opportunities.
The college could explore augmented reality, helping students to engage with their courses.

Relieving frustration and boosting productivity.
Teachers can generate reports quicker thanks to enhanced performance.

25% reduction in costs.

70% reduction in time to deployment.

"Fujitsu vShape delivers the comprehensive performance we need in the most cost-effective way with simple installation and all the functionality we could ask for."

City College Coventry

PRIMEFLEX
Server / Software / Storage / Networking
vShape

Works with underlying **LEGACY** IT infrastructure
- Integrates easily with legacy IT as it uses leading virtualisation software from VMware or Microsoft

BUDGET is key to minimise TCO across infrastructure
- Reduces TCO through low operating costs
- Frees up IT resource thanks to easy management

Reduces administration by 20% and operating costs by 40%.

Solutions need to be **FUTURE** proof
- Rolls out new ICT in a simple way, with servers, storage and networking in a single enclosure that allows you to pay as you grow

ACCESS to information and apps
- Allows easier access and control of information by creating a highly available, centralised resource
- Meets all front-end demands without affecting teaching time, thanks to a robust back-end

Keep your data secure, and accessible.
You can keep sensitive data secure, but ensure it's still accessible to staff and students on the move.

IT that works – or your money back
We're now part of the **Server, Storage & Solutions National Agreement** (SSSNA) for Education. So, we've created a Reliability Promise: if your hardware breaks, we'll repair it – and refund you.*
