Niche Police
Shared Platform

Police work is becoming more complex, especially with the increasing need for multi-agency collaboration and rising volumes of data. Managing the flow of information is central to delivering results and retaining public confidence.

Fujitsu's Niche Police Shared Platform offers full, flexible and secure case management with workflow on a pay-as-you-go basis, giving cost and service benefits with the best quality police support application around.

What is it?

- Niche RMS software providing dedicated capabilities for Police Force case and records management.
- Provided through a shared, multitenant environment.
- The efficient way to replace multiple existing case and records management systems
- The case and records management system that aligns with your organisations needs.

The benefits of Niche Police Shared Platform

- **Share information** within the organisation, across jurisdictional boundaries and at the front line.
- Move up to a **single, unified, operational policing system** based around incidents.
- **Gain efficiencies and better control** from tasking and workflow functions – with automated progression of incidents including information transfer and task creation.
- Features a sophisticated **security** model at domain and role levels with additional Access Control Lists as needed.
- **Move to the new service with confidence**, from Proof of Concept (POC) through configuration and provision, to full ITIL-conformant service management, updates and end user support – all on a **low-cost, per-user, per-month basis**.
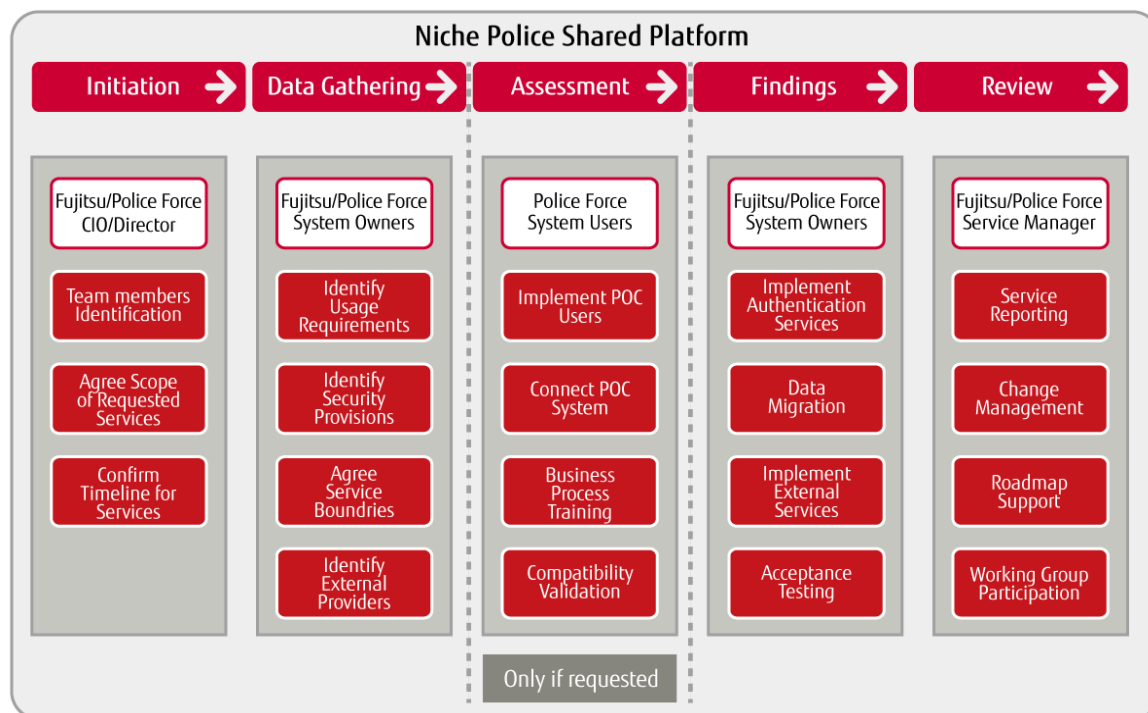

Niche Police Shared Platform

Initiation ➜	Data Gathering ➜	Assessment ➜	Findings ➜	Review ➜
Fujitsu/Police Force CIO/Director	Fujitsu/Police Force System Owners	Police Force System Users	Fujitsu/Police Force System Owners	Fujitsu/Police Force Service Manager
Team members Identification	Identify Usage Requirements	Implement POC Users	Implement Authentication Services	Service Reporting
