

We're blowing
the whistle on
other storage
solutions

Upgrade nightmares, impossible to scale, multiple licences and platforms, escalating management fees and spiralling maintenance costs.

With Fujitsu Storage First, there's one product family, one platform management layer, one licence agreement and no surprises.

This is your pathway to **Fujitsu Storage First...**

Step 1

A 20 minute Fujitsu consultation

- to establish the current Storage solution challenges you are experiencing and your plans for the next 12 months and beyond.

Step 2

A complimentary Storage Assessment*

- to uncover your true storage infrastructure where you will find out what storage you really have, what you don't have, where it is, what it's doing (or not doing), efficiency levels, areas of risk or potential failure.

Step 3

A personalised Storage Whistle Blowers report

- based on the Storage Assessment findings, Fujitsu presents the truth about your current storage environment and a recommendations report that includes associated changes, improvements, benefits/costs, ROI and timeline.

*Optional - based on the Fujitsu Light Storage Assessment service (3 days)
