FUJITSU

Fujitsu Secure Workplace Solution

Empower your people with the freedom to connect, collaborate and innovate securely

We live in an exciting and fast changing digital age that is transforming the way we lead our lives. Rapid advances in technology have radically changed our expectations, both as consumers and employees. In this digital age, organisations need to become more agile and more innovative than ever before. They need to provide a work environment for their employees that nurtures collaboration, agility and innovation.

COVID-19 has rapidly developed into a global crisis, requiring everyone to take action

In this uncertain time, Fujitsu can offer practical advice and support on how you can engage and support your workforce to stay safe and be productive.

Whether it's enabling people to work from home or understanding how to best support your customers, technology has a critical role to play in coping with these unprecedented times. We are here to help.

Here you will find valuable insights from our teams and partners, providing tangible guidance on safely and securely driving productivity within your workforce.

With security coming under ever-increasing levels of scrutiny, digital adoption can pose substantial threats, especially in the Defence and National Security space.

Empowering your people with the freedom to connect, collaborate and innovate securely is now a business imperative. The challenge is finding the right balance between giving your people the agility and freedom they expect, and you expect of them, without compromising security in any way.

Finding the right balance

Fujitsu Secure Workplace Solution has been specifically developed to address this challenge, delivering the right balance of agility and security. As a fully managed IT solution, it underpins the ambitions and aspirations of today's modern organisations seeking digital transformation in environments where security is of paramount importance.

Capable of accreditation up to OFFICIAL SENSITIVE, this supported desktop solution is both secure and highly resilient to ensure business continuity. With in-built flexibility, the solution has been designed to scale from a small number of users up to thousands, offering a relatively cost-effective solution at each end of this scale.

The solution is fully adaptable; it can be hosted on-premise in secure data centre facilities, in the cloud, or as a hybrid combination of both, dependent upon the customer's requirements. Fujitsu's solution also recognises your user's desire to work on multiple devices – smartphone, tablet, laptop or desktop - allowing users to connect to any accredited device securely, from any location with complete peace of mind.

43%
of the workforce are using 3+ devices

Result
high support costs, security and compliance risks

74%
of employees use consumer technologies, due to lack of alternatives from IT

Result
limited flexibility in access, devices and mobility of desktops

Nurturing collaboration across organisational boundaries

In this digital age, collaboration is becoming more prevalent. Whether that's between internal teams, departments in disparate locations, or across organisational boundaries with partners and agencies, collaborative forms of working are the new norm. Fujitsu Secure Workplace Solution has collaboration at the heart of its design and is fully configurable with collaboration, interfacing and interoperability options. This enables interaction with corporate systems and other supplier's or partner's systems alike, within the confines of the security classification settings, up to OFFICIAL SENSITIVE.

Another notable trend in the digital workplace is employee's expectations of flexibility and agility. No longer do they tether themselves to a single location or constrain themselves to normal office hours. And nor do you expect them to. Instead, they work from anywhere at anytime, connecting to their apps and accessing their data on whatever devices they choose. And they expect your IT department to deliver a seamlessly consistent and unified experience across these platforms.

Providing your employees with the ability to work anywhere on any device at up to Official Sensitive level of security is now a reality with Fujitsu Secure Workplace Solution. By removing the inhibitive technology, you can drive the focus up the value chain and fade IT into the background. That leaves employees free to concentrate on generating innovative ideas that drive your business forward, collaborating and co-working with the partners and agencies that matter, while dramatically improving productivity.

Secure and Safe
- Capable of accreditation to OFFICIAL SENSITIVE
- Interoperability with corporate systems
- Access apps and data critical to business operations
- **Flexible hosting options** – on-premises, in the cloud, or a hybrid of both

Proven security and information assurance

Fujitsu's ability to deliver services and solutions at heightened security levels is well proven. Our approach builds on extensive global experience of delivering highly secure solutions for numerous Government services that operate at various levels of classification.

In the UK, Fujitsu is certified for Cyber Essentials Plus and is also certified to ISO 27001, an independent international information security management standard.

Fujitsu will work closely with customers to ensure our information security standards meet the customer's own security and risk management requirements. In addition, Fujitsu shall adhere to all requirements stipulated by industry regulators, including the Defence Cyber Protection Partnership, and HMG Security Policy Framework and supporting Security Policies.

Digital Co-creation: creating value together, shaping a better future

Fujitsu is empowering people through information and connectivity at every life stage. We're delivering our vision through co-creation with customers, partners and institutions globally, bringing our insight into problems and technology as well as the practical capability to deliver solutions. Digital co-creation means blending your business expertise and digital technology and creating new value together to shape a better future.

Innovation is critical to our success, which is why we devote more than $3bn to R&D every year, with a global network of labs and extensive partnerships with credible co-creators. We call this our strategic partner eco-system – a network of the very best technology partners that we work with to create and deliver cohesive end-to-end solutions.

Why Fujitsu in Defence & National Security?

Our world is being disrupted. But together with you, Fujitsu's ambition is to build a brighter, more sustainable future for us all.

We want to work together to navigate this digital disruption collaboratively, and explore solutions to the evolving threats we face today. Together, we can exploit technology that will drive high-impact improvement, transform our digital future, and help to make us more sustainable in every way.

We can do this by harnessing technologies such as AI, machine learning, digital twin, quantum, and high-performance computing. Our vision uses the power of everyone, bringing together our integration capabilities and knowledge in managed services with cognitive and advanced technologies that will drive your digital transformation. By elevating people higher up the value chain allows the smartest ideas to emerge to tackle tomorrow's big challenges today – whatever they may be.

With our technological inspiration and business vision from Japan, we touch the lives of millions of people around the world every day. For over 60 years, we've been working at the highest levels of security demanded by militaries, governments, and industry to ensure the UK's most critical infrastructure operates smoothly, 24/7.

We've continually had to adapt to a changing world, and we will keep evolving in the face of future threats. We are diverse, creative, talented, and different. And we are committed to building new possibilities for everyone. By connecting people, technology and ideas, we are making the world more sustainable by building trust in society through innovation.
