FUJITSU

Fact Sheet
FUJITSU G60: Multi-Cassette Currency Recycling Module

G60 Combines Slim, Compact Design with High-Capacity and Versatility

Benefits

Some of the benefits that can be realized with the Fujitsu G60 Multi-Cassette Currency recycling module are:

- Lower cost of ownership by more efficiently managing currency requirements and cash-in-transit costs

- Increased up time with the flexibility of adding a loading cassette for increased capacities, start of day replenishment or additional denominations

- Management of the quality of notes by accepting and separating unfit currency, while dispensing only fit currency to end customers

G60 Solution Overview continued

As a value added feature, the G60 can support mixed new and used currency and mixed paper and polymer notes.

The G60 can be installed for front or rear access and provides easy access to the polling area and the entire length of the transport system to clear jammed notes or foreign objects.

The G60 protects your investment by using many of the same Fujitsu components found in other applications. For example, the F53 cassette from a self-checkout application can be loaded into the G60 to count, sort and replenish funds for secondary applications like bill payment.

To make the G60 as user-friendly and secure as possible there are optional LED displays to prompt and guide customers through a transaction. In addition, there are optional locks for all cassettes and an optional locking bar that can secure all of the recycle cassettes in place.

If you are unsure if the G60 is the right investment for your customer, Fujitsu has developed the Asset Planning Tool (APT). This Excel®-based tool, will enable you to enter your customer's currency handling data, and calculate replenishment benchmarks vs. usage patterns.

Enhanced functional features

Fujitsu G60: Multi-Cassette Currency Recycling Module Features:

- Reliable currency reviving at a lower price, broadening the array of potential applications while ensuring a more rapid ROI

- Quickly and accurately verifies currency denominations, detects and separates counterfeit and unfit currency with the best-in class bill validator.

Introduction / G60 solution overview

The G60 recycling unit by Fujitsu is a real game changer for the currency recycling marketplace.

For the first time there is a truly reliable smaller recycling unit. Built to the exacting standards of Fujitsu, the G60 does not compromise features or capabilities for a smaller footprint.

The G60's lower price point now makes currency recycling a viable option in a greater number of applications. With 4 recycle cassettes, 1 deposit box and 1 optional loading cassette, the G60 has the highest currency capacity in the industry. With greater capacities, the G60 may be the ideal OEM solution for teller assist, ATMs, self-checkout, bill payment or retail cash management environments.

With the Fujitsu best-in-class bill validator, mixed denominations can be deposited in a bundle of up to 20 notes with the complete image of each note captured (front and back), and used to support provisional credit on "questionable" items. In addition, the bill validator verifies the note denominations, checks for counterfeit notes, separates notes by degree of fitness and stores them in a secured cassette from which they can then be dispensed to another customer.

- Excellent capacity, 5 cassettes, (4 recycling cassettes and 1 deposit cassette) and an optional 6th cassette for beginning of day replenishment, added capacity or additional denominations when necessary

- Top performance with the fastest deposit and dispense transactions in the industry

- Supports major world currencies including mixed and used notes, paper and polymer notes

- CEN XFS service provider is available to enable easy development of application software

G60 specifications
Dimensions (W x D x H)

- 6.30 ins. X 13.39 ins. X 26.77 ins. (160mm x 340mm x 680mm)

Weight (without bills)

- Approx. 55.11 lbs (25kg)

Bill Transaction (deposit)

- 20 Bills at a time

Bill Transaction (dispense)

- 20 Bills at a time

Recycle Stacker Capacity

- 100 Bill (Approx.) x 4 Stackers

Loading Cash Cassette Capacity (Option)

- 500 Bills (Approx.)

Cash Box Capacity

- 1,000 Bills (Approx.)

Acceptable Media Range

- Maximum– 3.1 ins. X 6.53 ins. (78mm x 166mm TBD)

- Minimum– 2.36 ins. X 4.72 ins. (60mm x 120mm)

Thickness

- .0035~.008 ins. (0.09~0.20mm)

Processing Performance

- Deposit 1 Bill/1.5 sec – 20 Bills/10sec

- Dispense 1 Bill/2.0 sec – 20 Bills/12 sec

Interface Specification

- USB 2.0 Full Speed CEN / XFS

Electrical Power Requirements

- DC +24V +/- 10% MAX 15A

Temperature Operation

- 32°F to 122°F (0°C to 50°C) Stop State: 23°F to 122°F (-5°C to 50°C)

Relative Humidity

- Operation: 10 to 85%
- Stop State: 8 to 95%

RoHS-compliant unit

- Yes

ECB6 Compliant

- G60 is ECB6 compliant if installed in an ATM/self-checkout configuration

UL Compliance

- Yes

Why Fujitsu
Enabling the Global Enterprise

Fujitsu provides a full array of managed infrastructure solutions. As part of those solutions, Managed Office Services is a component of the dynamic infrastructure offerings from Fujitsu. Fujitsu is your trusted partner for making managed office and managed infrastructure services simple. We are arguably the most global vendor, with leadership market share in Europe, Asia, and North America. With more than 170,000 employees worldwide in over 100 countries, we can service your infrastructure in place, with a two-hour response, to cities throughout the world. Fujitsu can deliver unique value to global clients by helping them standardize global delivery, operations, and support. At the same time, we have the local presence and understanding to do business with clients who have regionally diverse languages and cultures. Fujitsu leverages best-of-breed infrastructure solutions to reduce risk, complexity, and cost.

About Fujitsu America

Fujitsu America, Inc., is a leading ICT solutions provider for organizations in the U.S., Canada and the Caribbean. Fujitsu enables clients to meet their business objectives through integrated offerings and solutions, including consulting, systems integration, managed services, outsourcing and cloud services for infrastructure, platforms and applications; data center and field services; and server, storage, software and mobile/tablet technologies. Fujitsu retail solutions

Point-of-Sale Peripherals
Fujitsu offers a full range of peripherals designed for ultimate serviceability and manageability. We've combined user-friendly design with best-of-breed hardware to create the components you need to keep your operations running smoothly.

Point-of-Sale Hardware
Fujitsu point-of-service solutions come in a variety of form factors including compact all-in-one and traditional POS controllers. All are highly configurable to ensure the ideal feature/functionality/price fit for each retailer's unique requirements. TeamPoS® systems meet the demanding needs of today's store operations, from standalone point-of-sale to mission-critical applications.

Self-Checkout Systems
The Fujitsu U-Scan Genesis line offers retailers flexibility, scalability, reliability and usability. Advanced features include high capacity, space saving footprint, ATM-style "follow me" LED lighting, and "above scanner" bill and coin accepting/dispensing.

OEM/ODM Products
A global leader in electronics manufacturing services, Fujitsu provides integrated services and solutions to support original equipment manufacturers and original design manufacturers operating in the automotive, communications, computing, consumer, industrial, medical, retail and financial sectors.

Fujitsu Retail Suite
Fujitsu Retail Suite provides retailers with a broad portfolio of solutions to better enable them to implement customer loyalty programs, increase customer service, and implement cost effective stored value card management solutions.
