

New Revenue Opportunities from an Expanded Customer Base

Many small-to-medium business (SMB) customers have settled for basic internet, because providers could not profitably deliver the services these customers needed...until now.

Did you know?

90% of businesses in North America are small to medium businesses (SMBs)

SMBs are an Under-Served Market

Truck Rolls cost time and money

Costly, purpose-built CPE reduces margins

Manual provisioning is time-consuming
