**RP SOLUTIONS, INC. ANNOUNCES QUALIFICATION OF
FUJITSU *fi-5650C*, *fi-4860C* AND *fi-5900C* DOCUMENT SCANNERS**

Full Page Scanning Enhances Remittance Processing Software

August 31, 2006 (Ithaca, NY) – RP Solutions, Inc., a leading software developer and provider of solutions for image based item and remittance processing, ATM deposit balancing and archiving, today announced that its solutions now support a full range of Fujitsu industry leading document scanners. RP Solutions verified the Fujitsu *fi-4860C*, *fi-5650C* and *fi-5900C* scanners meet all the requirements to interoperate with its remittance processing product suite, including ExpertRPS and AR Express.

“With over 20 years of industry experience, RP Solutions is committed to delivering innovative world-class remittance processing solutions to our customers,” said David Johnson, President, RP Solutions, “This announcement illustrates our dedication to seamless integration with our hardware partners. Fujitsu is a leader in their industry which made them a natural hardware choice for our solutions.”

“Check 21 legislation is facilitating the industry’s shift to electronic payment processing by allowing checks to be image captured and cleared electronically,” continued Mr. Johnson, “We offer progressive solutions to businesses seeking to make this transition. Our software uses the Fujitsu scanners to image capture incoming payment documents that are too large for traditional check scanning devices and then prepares them for electronic processing. This fully automates retail check and list processing and wholesale invoice processing.”

“We’re happy to announce that RP Solutions has tested and qualified our scanners with their software suite, to ensure a high level of integration and ease of implementation for our customers” said Tom Loeffler, director, business development, Fujitsu Computer Products of America, Inc. “We take pride in working with industry leaders such as RP Solutions that provide customers a powerful, optimized solution for their business.”

RP Solutions has integrated the Fujitsu *fi-5650C*, *fi-4860C* and *fi-5900C* production scanners which have scan rates ranging from 71 to 120 pages-per-minute and 114 to 200 images-per-minute. With true optical resolutions of 600 dots per inch (dpi) and by utilizing state-of-the-art charge coupled device (CCD) cameras in each of these scanners, Fujitsu offers a high level of image quality for forms processing applications. Depending on the model, automatic document feeders can hold 200 or 500 pages. All three Fujitsu scanners are equipped with ultrasonic double feed detection ensuring all images in a batch are reliably captured.

ABOUT RP SOLUTIONS, INC.

RP Solutions, Inc., based in Ithaca, NY, is a leading software developer and provider of solutions for image based item and remittance processing, ATM deposit balancing and archiving. RP Solutions helps organizations realize the benefits of Check 21 with products ranging from a desktop remote deposit capture solution for commercial sites to advanced customizable product suites for high volume payment processors.
