## Message from President, Corporate Environmental Affairs Unit

### The New Environmental Protection Program typifies the Fujitsu Group from the "Green ICT", "Global" and "Biodiversity" Viewpoints.

The UN Framework Convention on Climate Change (COP15) held in Copenhagen in December 2009 drew attention from around the world. Similarly, the Biodiversity Conference (COP10) to be held in Nagoya in October 2010 is expected to trigger a surge in interest in the responsibility of corporations for preserving biodiversity.

Meanwhile, the Fujitsu Group has been using ICT to help solve various environmental issues for its customers and for society, and to make the products and services it offers, as well as its business activities, more environmentally friendly.

Fiscal 2009 was the final year for Fujitsu Group Environmental Protection Program (Stage V). We managed to achieve our targets in nearly all categories. For example, we greatly exceeded our initial targets for development of "Super Green Products", and reductions in transport CO2 emissions. The implementation of the Green Policy Innovation initiative, a Green ICT project, achieved cuts in CO2 emissions amounting to approximately 2.37 million tons.

Fujitsu Group Environmental Protection Program (Stage VI) was launched in fiscal 2010, designed around the keywords "Green ICT", "Global" and "Biodiversity". The essence of Green ICT lies in successfully achieving both economical and environmental performance.

Fujitsu has recognized this by strengthening the development of Green ICT from the upstream stage of R&D. Also, Fujitsu Technology Solutions, which possesses exceptional technologies, expertise, and product development capabilities for Green ICT, was brought into our corporate group from fiscal 2009. By sharing these technologies and expertise with those accumulated by the Fujitsu Group, we will take Green ICT to the next level on a global scale. Moreover, Fujitsu Group Environmental Protection Program (Stage VI) incorporates the new goal of preserving biodiversity as a foundation of sustainable corporate activity, reflecting our search for ways to make a contribution with ICT in the style of the Fujitsu Group.

Stage VI is the next step toward realization of the Fujitsu Group's medium-term environmental vision, Green Policy 2020. We will make a concerted effort as a corporate group to achieve this goal, and together with our customers and society, seek to realize a prosperous, low-carbon society.

President, Corporate Environmental Strategy Unit
