Fujitsu Cyber Security Consulting Services is a comprehensive independent service delivering leading expertise, proven methodology and extensive industry experience.

Today’s organizations are operating in a highly complex, competitive, and changing environment that is increasingly digitized and interconnected. Technology managers are challenged to deal with new paradigms for leveraging and defending their intellectual assets, emerging business models and securing the technologies that underpin these.

Information and knowledge underpinned by Risk Visibility will differentiate a good organization from a great organization and can drive sustainable competitive advantage, built on Digital Trust Assurance. Executives and boards of directors are realising the implications of the highly motivated cyber attackers and the always-evolving threat landscape that are presenting to disrupt their organizational goals.

Your cyber security strategy is to protect your information assets; infrastructure, applications and data which are integral to innovation in enterprise architectures. Cyber Resilience must be a core tenet of business transformation.

Fujitsu Cyber Security Consulting Services will provide invaluable security and risk insight tailored to your organization’s needs - and enable you to better protect, improve and optimize your business’ cyber resilience. As a market leading systems integrator and managed service provider, Fujitsu has extensive experience in identifying, assessing and remediating genuine cyber security risks.

Through our pre-emptive, targeted, and pragmatic consultative engagement model we enable our clients to make intelligent risk decisions - accept, transfer, treat - and then apply appropriate countermeasures.

By engaging Fujitsu Security Consulting Services, you benefit from independent cyber security consultant expertise and advice relating to your business, and to inform the design, implementation, and integration of security controls that you need to manage your organization cyber risk profile.

Service Outcomes Provided:

- **Threat Landscape**: Keeping you up to date on your real-world security posture and exposure to active threat attacks and campaigns.

- **Eliminating Blind Spots**: Provide you with visibility of technology vulnerabilities including previously unidentified ‘shadow’ infrastructure.

- **Reduce & Secure Attack Surface**: Identify and validate technology points of compromise that threat actors will exploit and recommend appropriate controls to mitigate these.

- **Expert Security Insights**: Our consultants use industry tested tools, processes and deliver engagement outcomes to help you understand and take action to mitigate your exposure to cyber threats and vulnerabilities.

- **Industry Practice Alignment**: Ensure your security strategy, controls and architecture align with industry best practice and regulatory requirements and remedy any gaps.

- **Digital Risk Assurance**: Providing a wide range of services that enable you to prioritize and address business risk and focus on the vulnerabilities that pose the greatest impacts to your organization - avoiding an over-reliance on non-specific technology risk rating.

**Why Fujitsu?**

**Strong Partner Ecosystem**

We have strong technical and commercial partnerships with security technology providers so that we can recommend the right technologies to meet your requirements.

**Customer-Focused Operations**

We are the trusted advisor to help you build secure measures that enable digital transformation.

Our dedicated security experts provide ongoing tailored support and proactive recommendations.

**Broad Consultancy Expertise**

We bring together cyber security and industry expertise to drive high-performing vulnerability management security strategies that help you create a strong security posture that satisfies your industry regulations and meets business demands.

**Flexible Service Delivery**

We provide you with the right service levels, at the right cost, from a choice of on-shore or off-shore delivery locations, 24/7.

Fujitsu Cyber Security Services and Solutions Portfolio

At Fujitsu, we offer a broad range of services and solutions that are based upon best-of-breed security technologies. From local and global Security Operations Centres we deliver 24/7/365 cyber security services which can be tailored to your individual business requirements. The strength of our proven experience, vendor relationships, and global scale means that we’re well placed to optimise your approach to security and provide real-time intelligence and visibility on the state of your IT environment.
