

Cyber Security Incident Response & Readiness Services

Cyber attacks and data breaches are on the increase.

Consumers and business are too often disrupted and negatively impacted.

We provide expertise, knowledge and practical insights gained from responding to and resolving many high-impact security incidents, directly informing our modular incident preparedness and response services.

Understand Your Data Risk Exposure

AI-driven analysis of the data held in your data estate and the resultant risk exposure if a breach were to occur.

- ✓ AI-enabled discovery of sensitive data held both on-premises and in the cloud.
- ✓ Expert assistance to uncover data use risks such as unmasked data in non-prod systems.
- ✓ Data lifecycle reviews to identify data held past its use-by date, adding to data risks.

Prepare and Test Your Defences

Validate and baseline your organisation's ability to respond to security incidents as well as mitigate and contain business impact in the event of an attack.

- ✓ Benchmark against best practice with Australian Essential Eight Assessments.
- ✓ Test the effectiveness of controls and provide assurance to your executive.
- ✓ Accelerated remediation service to address critical findings.
