Fujitsu ServiceNow Practice	CASE	Customer Service Experience	Employee Service Experience	IT Transformation	Process & Procedure Innovation	Integrated Risk Management

Fujitsu Cloud & Modern Workplace

Empower your workforce with secure, flexible solutions that enable productivity from anywhere, at any time.

System Design & Deploy

FCMW designs systems that are a pleasure to use for end users and administrators. Systems we design allow client teams to work smarter, not harder.

From design to deployment, we make digital transformation journeys simple.

Strategic Development

Let us create solutions to meet your unique business automation requirements. With skills in DevOps, Terraform, PowerPlatform, Copilot Studio and Bicep, our teams can design, deploy and transition specialised systems at speed.

Modern Workplace

Transform your business by empowering a secure, mobile and distributed workforce, giving your teams the tools they need to get business done from anywhere. The technologies that a user interacts with everyday should be a pleasure to use.

AVD & Windows 365

A modern virtual desktop enables users to work securely from any device, anywhere. Secure by design, with autoscaling to maximise performance and minimise running costs of your virtual desktop.

Network Migrations

FMCW migrated some of the largest networks in Australia from one network to another, from on-premises to the cloud and from cloud to cloud.

Large and complex network migrations have earned us finalist spots in vendor partner of the year awards.

Hyperscale Cloud Migration

No two data centre migrations are the same, but a wealth of experience lets the team suggest tools and approaches to meet your migration requirements on schedule with minimal downtime.

Fujitsu Consulting

Navigate business challenges with strategic insights and tailored solutions that drive measurable outcomes and growth.

Trusted Advisory

Drawing on years of experience advising government and business on how to navigate the cyber threat security landscape, our Security Risk Assessment offering distils this knowledge into a targeted engagement uniquely tailored to your needs.

Our CISO as a Service offering provides access to experienced CISO expertise and support on a flexible basis to ensure robust cybersecurity strategies, governance and risk management.

Strategy & Planning

Organisational Change Management (OCM) is critical to the adoption of new ways of working and behaviours, including a return on investment in any technology. Our planning supports customers through the full lifecycle of change and works with you to codesign and mobilise your OCM strategy, to help you manage the implementation of change and maximise value.

Our OCM delivery approach provides you with a holistic service, from system design and technical implementation, through to user adoption and full implementation that delivers real business benefits.

Technology Roadmap

Creating your organisation's vision and roadmap for positive technology uplifts that enhance efficiency and performance.

With a tested, structured approach, our experienced technology team will guide you through functional validation, product consolidation and deliver a tailored roadmap.

A well-architected roadmap saves on licensing, product and vendor costs whilst addressing functional gaps, minimising support costs and reducing duplication.

Protect your organisation with comprehensive cybersecurity solutions that fortify your operations against evolving digital threats.

Advisory & Assurance

Comprehensive consulting services encompassing C-suite advisory services, strategy and roadmap development, governance, risk and compliance, SOCI Act support, virtual CISO, IRAP, audit preparedness support, security policy and architecture, supply chain reviews, gap assessments, and systems accreditation.

Assessments & Uplifts

Evaluate and enhance your organisation's readiness across key security frameworks such as Essential Eight and Zero Trust, along with specialised assessments for technology risk ensuring your systems are accredited and aligned with industry best practices.

Design, Deploy & Transition

End-to-end solutions that include designing, deploying, and transitioning sophisticated security controls, and security solutions for vulnerability management and Essential 8. We support you in integrating security vendor systems to implement, maintain, and optimise your security infrastructure.

Digital Forensics & Incident Response

We help you prepare with tabletop exercises and simulations, responding swiftly to address live security incidents. Backed by expert digital forensics team and comprehensive e-discovery tooling ensures thorough investigation and quick resolution of incidents.

Security Operations Centre

An extensive range of capabilities, leveraging advanced tools such as Managed EDR, SIEM, and the latest threat intelligence from 5-eyes countries. We help you set up your inhouse SOC or ingest your data to provide you a 24/7 SOC capability.

Security Testing

Robust penetration testing, breach attack simulations, red team exercises, and reviews of your internet footprint. We have customised testing for bespoke web applications, cloud and on-premises networks, as well as wireless and IOT security solutions.

Fujitsu Data & AI

Leverage powerful data insights and AI-driven solutions to solve complex challenges and unlock new opportunities for growth.

Microsoft Partner
Azure Expert MSP

Gen AI Accelerator

Not just any GenAI Accelerator. Our targeted and specialist tuning has helped solve big data challenges for clients large and small.

We have proven experience achieving great outcomes for our customers.

Lakehouse Accelerator

The Lakehouse design pattern optimises the best of the data warehouse and the data lake solutions with low cost, flexible and responsive data access.

Digital & Data Analytics Strategy

We work collaboratively to define a clear vision for your data strategy, aligning it with your overarching business goals. Our expert team will then develop a prioritized roadmap, outlining the most impactful initiatives to achieve a tailored outcome.

Modern Data Platform

To remain competitive, organisations need to make effective use of data and analytics. A Modern Data Platform provides actionable insights that deliver better products, improve efficiency, and increase customer engagement.

Data Governance Assessment

Our data governance maturity assessments provide a clear picture of your current state, identifying strengths and areas for improvement.

Our vast experience in design and deployment is distilled into a rapid reporting engagement.

IaaS to PaaS Migration

Re-platforming from on-premises to the cloud is often simpler than re-designing to optimize for cloud, but it can be expensive in the long term.

Our experienced team saves you money in IaaS costs by redesigning with a cloud-first approach.

Fujitsu SAP Practice

Accelerating your
business
capabilities from
the top floor to the
shop floor

SAP customers represent over 80% of the global economy. The Fujitsu SAP Practice uses real - world experience to deliver solutions to drive efficiency, improve user - experience and keep your business running smoothly.

Advisory & Roadmaps

Comprehensive consulting services encompassing C-suite advisory, strategic guidance, and roadmap development to navigate through your business processes, IT landscape, and strategic journey towards the achievement of desired business outcomes of growth and ROI with SAP solutions.

ERP and Supply Chain Strategy

Interested in migrating or considering transforming? Fujitsu's BPI Journey Framework offers data and insights driven services to transform your ERP or Supply Chain business processes. We guide you in measuring, calibrating, and optimising your business processes to deliver to your benefits and value streams.

System Design & Implementation

We design and deliver high - impact SAP solutions tailored to make every part of your business perform at its best. This delivers immediate value with a data-driven foundation that helps accelerate your path to innovation and growth. You focus on your core business while we optimise your SAP landscape.

Solution Extension and Integration

Let us design what's right for you. SAP is infinitely extendable and has native connectors for a huge number of products. We know how and when to use which tools, and how best to integrate them to maximise your investment. We will help solve your business challenges with custom integrations.

Line of Business & Industry Solutions

Unlock growth with SAP's industry-specific solutions. Enhance your core processes and drive innovation with solutions designed for your sector. We leverage deep industry expertise to tailor SAP solutions to your unique challenges and help you outpace the competition.

Licensing & Managed Services

Optimise your SAP investment with our comprehensive licensing and managed services. Our experts manage your SAP estates ensuring compliance and cost-effectiveness reducing costs, mitigating risks, and maximising the value of your SAP solutions.

Fujitsu ServiceNow Practice

Accelerate business results with ServiceNow solutions that streamline workflows and deliver value faster.

servicenow®

CASE

Receive ongoing strategic guidance and practical support to enhance your ServiceNow investment.

Scaled subscription options to meet your demand of your business.

Customer Service Experience

Delight your customers through small, streamlined service and support.

Expand capacity, create operation resilience, improve the safety and efficiency of location-based work. Lift CSX to new heights.

Employee Service Experience

Help HR teams to resolve requests and provide employees with the right information, quickly.

ServiceNow HR Service Delivery expertise combined with deep Employee Management help employees on an engaging digital journey.

IT Transformation

Deliver great user-centric services by engaging a modern ITSM.

Enhance and optimise your workflows and risks with AI Ops.

Scale IT ops using virtual agents and integrate with the ITSM.

Process & Procedure Innovation

From Catalogues to OH&S solutions to Digital App Factories, we have vast experience building targeted solutions on the ServiceNow platform to maximise your investment and turbocharge your business.

Integrated Risk Management

Our IRM practice embeds risk management, compliance activities, operational resilience, and intelligent automation into your business processes. Our IRM practice is well-regarded in the industry for thought-leadership, expertise, and exceptional delivery.

We're dedicated to empowering you at every step of your digital journey
