

Microsoft Dynamics 365 Business Central

Grow and Take Control

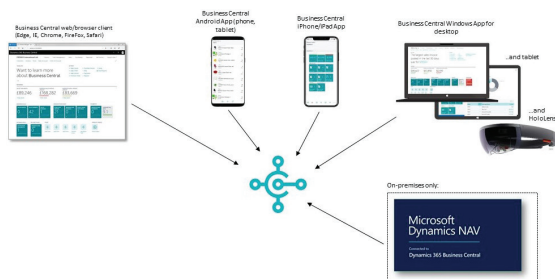

About Microsoft Dynamics 365 Business Central

Business Central (previously known as Microsoft NAV) is a flexible, comprehensive Enterprise Resource Planning (ERP) solution designed specifically to help small and medium-sized businesses grow and take more control over their key financial and business data. Unlike single-focus accounting packages, Business Central pulls information together from across your business, from supply chain and stock management through accounting, human resources and customer management, giving you a complete, end-to-end view of your business's performance.

The system offers specialised functionality for manufacturing, distribution, government, retail, and other industry sectors. Fujitsu have implemented financial and ERP solutions to dozens of Australian and New Zealand companies for the last 20 years. We can migrate or upgrade you from your solution, integrate with your office 365 and customer relationships management solutions, providing a fully integrated Microsoft working space.

Dynamics 365 Business Central

- Financial management
- Supply chain management
- Sales, Marketing and Service management

- Human Resources Management (HRM)
- Business Intelligence using Power BI

shaping tomorrow with you

Architecture

Business Central sits within on a standard the Microsoft Dynamics platform environment, utilising SQL Server, reporting and analysis services, web services and Microsoft Office to provide an easy to use utilising repeatable processes for, easy to install business IT installation on standard infrastructure or cloud environments.

Solutions can be for delivered as SaaS or, On-premise and Cloud hosted. The benefit of this environment is that Microsoft provides up to date integration with all its latest platforms and tools and removes the integration risk from the customer. The core technology along with any recommended add-ons provide the capability, enabling successful business change in the effectively and efficiently.

Business Central can be viewed as an ERP system delivered in an application development environment. As a result, the standard Business Central functionality can be widened using standard integration tools, API's and a range of certified add-on products. Fujitsu has partnerships with a number of Third Parties to implement NAV specific Add-on solutions including:

- Power BI
- JetReport/Jet Analytics
- Contina Document Capture and Expense Management
- ForNAV report management
- Soft4 Lease Management
- Tag Asset Management
- A separate overview for each of these is available.
