

## Compliance covered

# Lighten the load on your security team

Compliance frameworks are not just regulatory requirements but are the cornerstone of robust cybersecurity. Whether you're just starting out, or looking to uplift your current compliance status, Fujitsu Cyber Security Services offer a full spectrum of support across all major regulatory frameworks, ensuring a tailored fit for your organisation's unique needs.

### Essential Eight

Building and implementing the strategy you need to address risk, meet compliance, and protect your people and data.

### Macro security

'Essential Eight, essentially becomes the Essential Seven with [Macrosine](#)' - Office macro and PowerShell security made simple.

### CPS 230

Encompassing the full scope of the CPS 230 program, including updates, risk profiling, continuity planning, and provider assessments.

### CISA Zero Trust

Thorough assessments to identify the current state of zero trust functions and maturity levels.

### ISO27001

Strategic consulting, including virtual CISO, information security management, and ISO27001 audit preparedness.

### SOCI Act

By leveraging our cross-sector experience, we offer targeted advice to guide through your SOCI compliance journey.

**We cover a range of frameworks, get in touch to find out how we can help**

**Cybersecurity enhancement** Our approach goes beyond mere box-ticking; we focus on enhancing your cybersecurity posture through strategic framework implementation, turning compliance into a competitive advantage.

**Strategic alignment** Align your cybersecurity strategy with regulatory requirements, ensuring that every step towards compliance also strengthens your defense against cyber threats.

**Journey support** Embrace regulation as a catalyst for security excellence; with FCSS, navigate the complexities of compliance with confidence, backed by our deep understanding of the cyber security benefits that regulation brings.
