

# Comprehensive Cloud Assessment

Transform your cloud strategy today

Assessments and Uplifts

## Highlights of a Cloud Assessment

- ✓ Identify strengths and weaknesses
- ✓ Secure, optimise and transform
- ✓ Detailed analysis of your cloud environment
- ✓ Clear uplift plan
- ✓ Tailored to your needs
- ✓ Azure, AWS, Google
- ✓ Maximize cloud investment

In today's rapidly evolving digital landscape, ensuring your cloud infrastructure is not only robust but also optimised for performance and security is paramount.

Our cutting-edge Cloud Assessment is designed to provide you with a detailed analysis of your cloud environment, focusing on Azure, AWS, and Google Cloud platforms. Whether you're concerned about security post-incident or looking to enhance your current setup, our service is tailored to meet your needs.

**Don't wait for the next security incident to reveal the vulnerabilities in your cloud setup.**

Take a proactive approach with our Cloud Assessment service. Contact us to learn how we can help you secure, optimise, and transform your cloud infrastructure into a stronghold of efficiency and reliability.

## When was the last time you did a cloud assessment?

Regular assessments help maintain a robust and secure cloud environment, which is crucial for operational efficiency and data protection. It is generally recommended to perform assessments at least annually or whenever significant changes occur in the cloud infrastructure or related policies.

# Our approach

## 1 Tailored assessment

Using a blend of proprietary tools and industry-leading software, we conduct a thorough assessment of your cloud infrastructure, identifying strengths, weaknesses, risks, and critical findings.

## 2 Best practice alignment

Our assessments are designed in line with best practices, ensuring your cloud setup is resilient, secure, and efficient.

## 3 Insightful reporting

We translate complex data into actionable insights, providing you with a clear plan to uplift your infrastructure's security and performance.

## 4 Strategic remediation

Post-assessment, we guide you through a plan to address any vulnerabilities, enhancing your cloud environment's overall health.

## 5 Ongoing support

Leveraging tools like Tenable, we offer solutions that not only fix current issues but also provide ongoing monitoring and optimisation capabilities.

## Why choose Fujitsu Cyber Security Services?

### Expertise in cloud security

Specialising in IaaS and PaaS, our team is adept at securing big data and ensuring compliance across all major cloud platforms.

### Custom solutions

We understand that each business has unique needs. Our assessments are customisable, ensuring you get the most relevant and effective strategies.

### Preventive measures

Beyond immediate fixes, our goal is to equip you with the knowledge and tools to maintain a secure cloud environment proactively.

### Rapid and reliable

Our efficient methodology allows us to quickly assess, report, and recommend improvements, saving you time and enhancing your security posture.
