Highlights of a Zero Trust Assessment

Detailed report

An in-depth evaluation based on the CISA Zero Trust Maturity Model (ZTMM).

Human-centric security

Balancing security needs with user experience.

Tailored to your needs

Customisable assessment scope to meet specific organisational requirements.

Clear uplift plan

Roadmap for enhancing security maturity.

Route to compliance assurance

Ensuring alignment with industry standards and regulations.

The Zero Trust Assessment provides a comprehensive evaluation of your organisation's cybersecurity posture, focusing on eliminating implicit trust and ensuring verification at every stage of digital interactions.

This assessment is crucial for modern security needs, addressing internal and external threats while promoting secure access and data management.

Our approach

Understanding your environment

We acknowledge the uniqueness of each business. Our Zero Trust Assessment is customisable, ensuring relevant and effective strategies are delivered.

Using a blend of our proprietary tools and industry-standard frameworks, we provide a high-assurance scorecard and actionable recommendations without compromising user experience.

Uplift

Fujitsu Cyber Security Services has the capability to not just assess but also uplift your security posture. Our experienced team can elevate key areas based on the assessment findings, ensuring compliance with industry best practices and regulations.
