

EYefi Cloud Smart Waste

All of your remote monitoring needs in the one platform.

About EYefi Cloud

Remote monitoring, situational awareness and intelligence gathering from fixed and mobile autonomous sensors.

Why EYefi Cloud?

EYefi Cloud is a next generation application platform that enables customers a secure and centralised environment to manage all of their EYefi devices, applications and data.

The EYefi Cloud web application securely connects EYefi field equipment with end users, providing comprehensive information tailored to the type of deployment and corresponding application being utilised within EYefi Cloud.

EYefi Cloud is purpose-built with government and industry customers in mind, providing entirely new levels of situational awareness and intelligence gathering for emergency management, incident response, asset and infrastructure monitoring applications.

EYEFI Cloud Capability Plugins

EYEFI Cloud users can gain access to a variety of applications (plugins) within the platform, depending on the particular hardware you have deployed and how it is being used in the field.

Smart Waste

- Monitor waste levels in public space and commercial bins
- Receive on-demand alerts and only service bins that need emptying
- Manage waste network performance
- Optimise route scheduling for collections
- Use statistical insights to drive waste network efficiencies

Smart Drain

- Monitor rising water levels in roadside stormwater pits and drains
- Target the location of a flood event in advance
- Proactively notify crews
- Reduce the need for routine pit inspections
- Reduce the risk of costly flooding
