

Windows Server 2019: The operating system that bridges on-premises and cloud.

The enhanced Fujitsu PRIMERGY M4 Mono-socket servers

Why SME's should upgrade their IT hardware now!

Every FUJITSU mono-socket server ...

... maximises efficiency

... optimises workloads

... simplifies complexity

... supports the Fujitsu Lifecycle Management

... revolutionises data centre management

... promotes the achievement of your individual IT and business goals

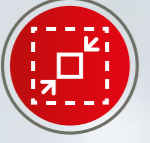

PRIMERGY TX1320 M4

The computing space miracle

Advantages

Space-saving, ultra-compact design, ideal for environments with little space

Perfectly aligned for standard workloads (individual & virtual) with the Intel® Xeon® E-2200 processors

Flexible for future upgrades (investment protection)

Enhanced reliability and lower energy expenditure

Comprehensive software management suite

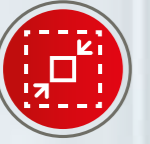

Latest technical equipment (fully-fledged) for fast & seamless work routines

Designed for the daily work requirements in small & medium enterprises

Choose the TX1320, when you need ...

... workplaces with constrained space

... to execute standard SME workloads - file/print, web, email, messaging, ERP/CRM, or more demanding industry specific applications, light virtualised W/L

... to cover legal needs or offices with requirement for compact, secure data storage

... very easy to use servers

... to equip public facing offices

PRIMERGY TX1330 M4

The highly flexible performer

Advantages

Can be optimised for most appropriately sized standard workloads across industries with the Intel® Xeon® E-2200 processors

Designed for expanding usage scenarios and efficiency

Full server management features and easy serviceability

High expandability for performance-oriented workload versatility

Ideal investment for office deployments, retail or branch offices or demanding SME environment

Future ready plus capabilities for enhanced utilisation

Choose the TX1330, when you need ...

... workload versatility - Infrastructure, collaboration, ERP/CRM, centralised data storage/databases, light virtualised W/L

... meet secure, and high storage scalability needs

... deployment flexibility for today and tomorrow

... to reduce downtime and or IT costs

PRIMERGY RX1330 M4

The 1U powerhouse

Advantages

Advanced features for enhanced performance including Intel® Xeon® E-2200 processors

Improved scalability for future growth

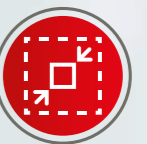

Enterprise-class reliability and operational efficiency

Rich in optional features

Simplified management and enhanced security

Low space capacity required

Choose the RX1330, when you need ...

... a small file server

... simple Infrastructure services like domain server, virus scanner, SME applications

... to run small ERP and database applications as well as collaboration and communication applications

... a server for web hosting & virtualisation

... a head-unit for e.g. building service apps

Key Features

PRIMERGY TX1320 M4

- Compact and secure storage with up to 8x drives with 4x NVMe drives
- 4x PCIe Gen3 slots
- Advanced RAID and networking options for performance boost
- High-efficiency redundant power supply capability

PRIMERGY TX1330 M4

- Highly expandable and secure storage: Up to 24 x SFF or 12 x LFF drives. Can support up to 4x NVMe drives
- Future ready with 4x PCIe Gen3 slots
- Advanced RAID and networking options for enhanced performance
- High-efficiency redundant power supply capability plus rack-upgradeable kits

PRIMERGY RX1330 M4

- Versatile storage expandability: Up to 10x2.5-inch or 4x3.5-inch disk drives. Up to 4x NVMe drive capability
- Upgrade ready with 3x PCIe Gen3 slots
- Advanced RAID and networking options for improved performance
- High-efficiency redundant power supply capability

- Windows Server 2019 Datacentre
- Windows Server 2019 Essentials
- Windows Server 2019 Standard
- Latest generation Intel® Xeon® E-2200 processors plus other CPU options
- 4 DIMMs (up to 128GB DDR4 memory) at 2,666 MT/s
- Free ISM Essentials for enhanced server management apart from iRMC S5 and the ServerView Suite
